

Contents

Contributing Authors	ix
Preface	xix
PART I THEMES AND ISSUES	
1	
On the Security Implications of Disruptive Technologies	3
<i>Neil Robinson and Lorenzo Valeri</i>	
2	
Cyber Security: Are Economic Incentives Adequate?	15
<i>Scott Dyne, Eric Goetz and Michael Freeman</i>	
3	
Government Intervention in Information Infrastructure Protection	29
<i>Dan Assaf</i>	
PART II INFRASTRUCTURE SECURITY	
4	
Security of Information Flow in the Electric Power Grid	43
<i>Han Tang and Bruce McMillin</i>	
5	
Securing Positive Train Control Systems	57
<i>Mark Hartong, Rajni Goel and Duminda Wijesekera</i>	
6	
Lessons Learned from the Maroochy Water Breach	73
<i>Jill Slay and Michael Miller</i>	
7	
Reducing Risk in Oil and Gas Production Operations	83
<i>Stig Johnsen, Rune Ask and Randi Roisli</i>	

PART III CONTROL SYSTEMS SECURITY

8	Securing Current and Future Process Control Systems	99
	<i>Robert Cunningham, Steven Cheung, Martin Fong, Ulf Lindqvist, David Nicol, Ronald Pawlowski, Eric Robinson, William Sanders, Sankalp Singh, Alfonso Valdes, Bradley Woodworth and Michael Zhivich</i>	
9	Security Strategies for SCADA Networks	117
	<i>Rodrigo Chandia, Jesus Gonzalez, Tim Kilpatrick, Mauricio Papa and Sujeet Sheno</i>	
10	Security Enhancements for Distributed Control Systems	133
	<i>Jeffrey Hieb, James Graham and Sandip Patel</i>	
11	Security Challenges of Reconfigurable Devices in the Power Grid	147
	<i>Suvda Myagmar, Roy Campbell and Marianne Winslett</i>	
12	Intrusion Detection and Event Monitoring in SCADA Networks	161
	<i>Paul Oman and Matthew Phillips</i>	
13	Passive Scanning in Modbus Networks	175
	<i>Jesus Gonzalez and Mauricio Papa</i>	
14	Formal Modeling and Analysis of the Modbus Protocol	189
	<i>Bruno Dutertre</i>	
15	Security Analysis of Multilayer SCADA Protocols	205
	<i>Janica Edmonds, Mauricio Papa and Sujeet Sheno</i>	
16	Remote Forensic Analysis of Process Control Systems	223
	<i>Regis Friend Cassidy, Adrian Chavez, Jason Trent and Jorge Urrea</i>	
17	Creating a European SCADA Security Testbed	237
	<i>Henrik Christiansson and Eric Luijff</i>	

PART IV NETWORK INFRASTRUCTURE SECURITY

18		
Protecting Internet Services from Low-Rate DoS Attacks	251	
<i>Yajuan Tang, Xiapu Luo and Rocky Chang</i>		
19		
Detecting Wormhole Attacks in Wireless Sensor Networks	267	
<i>Yurong Xu, Guanling Chen, James Ford and Fillia Makedon</i>		
20		
Detecting Non-Discoverable Bluetooth Devices	281	
<i>Daniel Cross, Justin Hoeckle, Michael Lavine, Jason Rubin and Kevin Snow</i>		

PART V INFRASTRUCTURE INTERDEPENDENCIES

21		
Risk Analysis in Interdependent Infrastructures	297	
<i>Yacov Haimes, Joost Santos, Kenneth Crowther, Matthew Henry, Chenyang Lian and Zhenyu Yan</i>		
22		
Analysis of Interdependencies Between Italy's Economic Sectors	311	
<i>Roberto Setola</i>		
23		
The ISE Metamodel for Critical Infrastructures	323	
<i>Felix Flentge and Uwe Beyer</i>		
24		
Multigraph Dependency Models for Heterogeneous Infrastructures	337	
<i>Nils Svendsen and Stephen Wolthusen</i>		
25		
Visualizing Cascading Failures in Critical Cyber Infrastructures	351	
<i>Jason Kopylec, Anita D'Amico and John Goodall</i>		

PART VI RISK ASSESSMENT

26		
A Service-Oriented Approach for Assessing Infrastructure Security	367	
<i>Marcelo Masera and Igor Nai Fovino</i>		

Analysis of Electrical Power and Oil and Gas Pipeline Failures	381
<i>Jeffrey Simonoff, Carlos Restrepo, Rae Zimmerman and Zvia Naphtali</i>
