## Contents

<b>Preface</b> .....	VII
<b>Notation</b> .....	XV
<b>Introduction and Summary</b> .....	1
A. Basic Notation .....	2
B. Stochastic Control Problems and Summary .....	3
B1. Optimal Classical Control Problem .....	5
B2. Optimal Stopping Problem .....	9
B3. Discrete Approximations .....	10
B4. Option Pricing .....	19
B5. Hereditary Portfolio Optimization .....	23
C. Organization of Monograph .....	34
<b>1 Stochastic Hereditary Differential Equations</b> .....	37
1.1 Probabilistic Preliminaries .....	40
1.1.1 Gronwall Inequality .....	40
1.1.2 Stopping Times .....	42
1.1.3 Regular Conditional Probability .....	43
1.2 Brownian Motion and Itô Integrals .....	45
1.2.1 Brownian Motion .....	45
1.2.2 Itô Integrals .....	48
1.2.3 Itô's Formula .....	52
1.2.4 Girsanov Transformation .....	53
1.3 SHDE with Bounded Memory .....	54
1.3.1 Memory Maps .....	54
1.3.2 The Assumptions .....	57
1.3.3 Strong Solution .....	58
1.3.4 Weak Solution .....	62
1.4 SHDE with Unbounded Memory .....	66
1.4.1 Memory Maps .....	67

## XII Contents

1.5	Markovian Properties	76
1.6	Conclusions and Remarks	78
<b>2</b>	<b>Stochastic Calculus</b>	79
2.1	Preliminary Analysis on Banach Spaces	79
2.1.1	Bounded Linear and Bilinear Functionals	80
2.1.2	Fréchet Derivatives	81
2.1.3	$\mathcal{C}_0$ -Semigroups	82
2.1.4	Bounded and Continuous Functionals on Banach Spaces	85
2.2	The Space $\mathcal{C}$	89
2.3	The Space $\mathcal{M}$	99
2.3.1	The Weighting Function $\rho$	100
2.3.2	The $\mathcal{S}$ -Operator	102
2.4	Itô and Dynkin Formulas	106
2.4.1	$\{x_s, s \in [t, T]\}$	106
2.4.2	$\{(S(s), S_s), s \geq 0\}$	112
2.5	Martingale Problem	116
2.6	Conclusions and Remarks	124
<b>3</b>	<b>Optimal Classical Control</b>	127
3.1	Problem Formulation	129
3.1.1	The Controlled SHDE	129
3.1.2	Admissible Controls	132
3.1.3	Statement of the Problem	133
3.2	Existence of Optimal Classical Control	134
3.2.1	Admissible Relaxed Controls	137
3.2.2	Existence Result	140
3.3	Dynamic Programming Principle	153
3.3.1	Some Probabilistic Results	153
3.3.2	Continuity of the Value Function	158
3.3.3	The DDP	159
3.4	The Infinite-Dimensional HJB Equation	165
3.5	Viscosity Solution	168
3.6	Uniqueness	175
3.7	Verification Theorems	191
3.8	Finite-Dimensional HJB Equation	192
3.8.1	Special Form of HJB Equation	192
3.8.2	Finite Dimensionality of HJB Equation	195
3.8.3	Examples	199
3.9	Conclusions and Remarks	201
<b>4</b>	<b>Optimal Stopping</b>	203
4.1	The Optimal Stopping Problem	204
4.2	Existence of Optimal Stopping	208

4.2.1	The Infinitesimal Generator .....	208
4.2.2	An Alternate Formulation .....	210
4.2.3	Existence and Uniqueness .....	218
4.3	HJB Variational Inequality .....	224
4.4	Verification Theorem .....	226
4.5	Viscosity Solution .....	228
4.6	A Sketch of a Proof of Theorem 4.5.7 .....	234
4.7	Conclusions and Remarks .....	244
<b>5</b>	<b>Discrete Approximations .....</b>	<b>245</b>
5.1	Preliminaries .....	246
5.1.1	Temporal and Spatial Discretizations .....	247
5.1.2	Some Lemmas .....	248
5.2	Semidiscretization Scheme .....	249
5.2.1	First Approximation Step: Piecewise Constant Segments .....	250
5.2.2	Second Approximation Step: Piecewise Constant Strategies .....	257
5.2.3	Overall Discretization Error .....	264
5.3	Markov Chain Approximation .....	265
5.3.1	Controlled Markov Chains .....	267
5.3.2	Optimal Control of Markov Chains .....	270
5.3.3	Embedding the Controlled Markov Chain .....	272
5.3.4	Convergence of Approximations .....	274
5.4	Finite Difference Approximation .....	278
5.4.1	Finite Difference Scheme .....	280
5.4.2	Discretization of Segment Functions .....	289
5.4.3	A Computational Algorithm .....	291
5.5	Conclusions and Remarks .....	292
<b>6</b>	<b>Option Pricing .....</b>	<b>293</b>
6.1	Pricing with Hereditary Structure .....	297
6.1.1	The Financial Market .....	297
6.1.2	Contingent Claims .....	302
6.2	Admissible Trading Strategies .....	304
6.3	Risk-Neutral Martingale Measures .....	307
6.4	Pricing of Contingent Claims .....	309
6.4.1	The European Contingent Claims .....	311
6.4.2	The American Contingent Claims .....	313
6.5	Infinite-Dimensional Black-Scholes Equation .....	314
6.5.1	Equation Derivation .....	314
6.5.2	Viscosity Solution .....	320
6.6	HJB Variational Inequality .....	323
6.7	Series Solution .....	325
6.7.1	Derivations .....	325

XIV Contents

6.7.2	An Example .....	328
6.7.3	Convergence of the Series .....	329
6.7.4	The Algorithm .....	331
6.8	Conclusions and Remarks .....	331
<b>7</b>	<b>Hereditary Portfolio Optimization .....</b>	<b>333</b>
7.1	The Hereditary Portfolio Optimization Problem .....	336
7.1.1	Hereditary Price Structure with Unbounded Memory .....	337
7.1.2	The Stock Inventory Space .....	340
7.1.3	Consumption-Trading Strategies .....	341
7.1.4	Solvency Region .....	342
7.1.5	Portfolio Dynamics and Admissible Strategies .....	344
7.1.6	The Problem Statement .....	345
7.2	The Controlled State Process .....	346
7.2.1	The Properties of the Stock Prices .....	346
7.2.2	Dynkin's Formula for the Controlled State Process ...	351
7.3	The HJBQVI .....	352
7.3.1	The Dynamic Programming Principle .....	352
7.3.2	Derivation of the HJBQVI .....	353
7.3.3	Boundary Values of the HJBQVI .....	357
7.4	The Verification Theorem .....	366
7.5	Properties of Value Function .....	369
7.5.1	Some Simple Properties .....	369
7.5.2	Upper Bounds of Value Function .....	371
7.6	The Viscosity Solution .....	379
7.7	Uniqueness .....	390
7.8	Conclusions and Remarks .....	391
	<b>References .....</b>	<b>393</b>
	<b>Index .....</b>	<b>401</b>
