
Contents

Part I General Concepts and Basic Mechanisms

1. Metabolic Concerns in Drug Design..... 3
Jeffrey P. Jones
2. Role of Bioactivation in Idiosyncratic Drug Toxicity:
Structure–Toxicity Relationships 27
Amit S. Kalgutkar
3. Michael Addition–Elimination Reactions: Roles in
Toxicity and Potential New Therapeutic Applications 57
Adnan A. Elfarra and Renee J. Krause
4. Induction of Drug-Metabolizing Enzymes: Contrasting
Roles in Detoxification and Bioactivation of Drugs
and Xenobiotics 69
Sharon L. Ripp
5. Mechanism-Based Inactivation of Cytochrome P450 2A
and 2B Enzymes 103
Sharon E. Murphy and Linda B. von Weymarn
6. CYP2E1 – Biochemical and Toxicological Aspects and Role in
Alcohol-Induced Liver Injury 133
Arthur I. Cederbaum
7. One- and Two-Electron-Mediated Reduction of Quinones:
Enzymology and Toxicological Implications 169
David Siegel, Phillip Reigan and David Ross
8. Lipoxidation-Derived Electrophiles as Biological Reactive
Intermediates 199
De Lin and Lawrence M. Sayre
9. Bioactivation and Protein Modification Reactions of
Unsaturated Aldehydes 233
*J. Cai, B.G. Hill, A. Bhatnagar, W.M. Pierce, Jr. and
R.A. Prough*

Part II Tissue-Specific Features and Risk Assessment Applications

10. Adaptive Responses and Signal Transduction Pathways in Chemically Induced Mitochondrial Dysfunction and Cell Death	257
<i>Lawrence H. Lash</i>	
11. Hepatic Bioactivation and Drug-Induced Liver Injury	291
<i>Raymond A. Kemper and George Lai</i>	
12. Role of Cysteine S-Conjugate β -Lyases in the Bioactivation of Renal Toxicants	325
<i>Arthur J.L. Cooper and John T. Pinto</i>	
13. Bioactivation of Xenobiotics in Lung: Role of CYPs and FMOs	349
<i>David E. Williams</i>	
14. Generation of Reactive Metabolites and Associated DNA Adducts from Benzene, Butadiene, and PAH in Bone Marrow: Their Effects on Hematopoiesis and Impact on Human Health	377
<i>Colin Jefcoate and Michele Larsen</i>	
15. Butadiene-Mediated Mutagenesis and Carcinogenesis	411
<i>Jonathan B. Ward, Jeffrey K. Wickliffe, Michael P. Stone, Thomas M. Harris, Priscilla H. Fernandes, and R. Stephen Lloyd</i>	
16. Pharmacogenetics of Drug Bioactivation Pathways	443
<i>Lauren A. Trepanier</i>	
17. Human Phenanthrene Metabolites as Probes for the Metabolic Activation and Detoxification of Carcinogenic Polycyclic Aromatic Hydrocarbons	463
<i>Stephen S. Hecht</i>	
Index	485
