

# Table of Contents

Editor's Preface	ix
Biographical Sketch of L.A. Galin	xi
<b>Chapter 1 A Review of Research before 1953</b>	<b>1</b>
1.1 Introduction	1
1.2 Frictionless Plane Problems	1
1.3 Plane Adhesive Contact Problems	3
1.4 Plane Frictional Contact Problems	4
1.5 Plane Contact between Two Elastic Bodies	5
1.6 Three-Dimensional Contact Problems	7
<b>Chapter 2 Plane Elasticity Theory</b>	<b>11</b>
2.1 The Fundamental Equations	11
2.2 Stresses and Displacements in a Semi-Infinite Elastic Plane	21
<b>Chapter 3 Plane Static Isotropic Contact Problems</b>	<b>33</b>
3.1 Boundary Conditions for Plane Contact Problems	33
3.2 The Riemann–Hilbert Problem for the Half-Plane	35
3.3 Frictionless Punch Problems – Introduction	39
3.4 Frictionless Punch Problems – Theory	41
3.5 Examples of Frictionless Problems	44
3.6 Frictional Punch Problems – Theory	49
3.7 Frictional Punch Problems – Examples	51
3.8 Sliding Contact with Coulomb Friction	55
3.9 A Two-Punch Problem	58
<b>Chapter 4 Moving Punches, and Anisotropic Media</b>	<b>61</b>
4.1 Introduction	61
4.2 Dynamic Plane Isotropic Elasticity Theory	62
4.3 Displacement – Stress Relations	64
4.4 Boundary Value Problems for a Moving Punch	66
4.5 Complex Variable Formulation for a Plane Anisotropic Elastic Body	67
4.6 Contact Problems for an Anisotropic Half-Plane	70

4.7 Stick-Slip Contact	74
4.8 Contact of Two Elastic Bodies	87
<b>Chapter 5 Contact Problems in Three Dimensions</b>	<b>91</b>
5.1 The Papkovitch–Neuber Solution	91
5.2 Solutions of Laplace’s Equation in Certain Curvilinear Coordinates	95
5.3 Circular Punches	98
5.4 The Green’s Function for the Exterior of a Circular Disc	101
5.5 Axisymmetric Frictionless Contact Problems	105
5.6 Axisymmetric Contact with Prescribed Contact Region	112
5.7 Loading Outside a Circular Punch	112
5.8 Axi-Symmetric Contact Problems with Friction	115
5.9 A Punch of Elliptic Cross-Section	120
5.10 Forces and Moments on an Elliptical Punch	131
5.11 A Punch of Arbitrary Cross-Section	133
5.12 The Pressure of a Wedge-Shaped Punch with Plane Base	136
5.13 A Slender Beam on an Elastic Body	136
5.14 Contact of Two Elastic Bodies	144
5.15 Contact between a Rigid Punch and a Clamped Plate	145
<b>Chapter 6 Viscoelasticity, Wear and Roughness</b>	<b>153</b>
6.1 Introduction	153
6.2 The Laplace Transform	153
6.3 2-D Orthotropic Viscoelastic Bodies	155
6.4 Adhesive Contact for a Viscoelastic Half-Plane	157
6.5 Viscoelastic Rolling Contact	165
6.6 The Limiting Case of Rolling of a Cylinder on a Viscoelastic Base	177
6.7 Contact Problems in the Presence of Wear	183
6.8 Axisymmetric Contact Problems in the Presence of Wear	186
6.9 Plane Contact Problems for Rough Elastic Bodies	190
6.10 Contact Problems for Rough Axisymmetric Elastic Bodies	195
References	199
Index	205
<b>Development of Galin’s Research in Contact Mechanics</b>	<b>207</b>
<i>I.G. Goryacheva</i>	
1. Two-Dimensional Sliding Contact of Elastic Bodies	207
1.1 Problem Formulation	207
1.2 Contact Problem for a Cylinder	210
1.3 Contact Problem for a Flat Punch	212
2. Contact Problem with Partial Slip for the Inclined Punch with Rounded Edges	217

2.1 Problem Formulation	218
2.2 Contact Pressure Analysis	220
2.3 Shear Stress Analysis	225
2.4 Tensile Stress Analysis	230
2.5 Results and Discussions	232
2.6 Conclusions	236
2.7 Appendix	237
3. Three-Dimensional Sliding Contact of Elastic Bodies	238
3.1 The Friction Law Has the Form $\sigma_{xz} = \rho p$	239
3.2 The Friction Law Has the Form $\sigma_{xz} = \tau_0 + \rho p$	242
4. Periodic Contact Problem	244
4.1 One-Level Model	245
4.2 Principle of Localization	248
4.3 System of Indenters of Various Heights	250
4.4 Stress Field Analysis	252
<b>Hertz Type Contact Problems for Power-Law Shaped Bodies</b>	261
<i>Feodor M. Borodich</i>	
1. Introduction	261
1.1 Hertz Type Contact Problems for rigid Indenters	261
1.2 Formulation of a Hertz Type Contact Problem	262
2. Frictionless Axisymmetric Contact	264
2.1 The Galin Solution for Frictionless Axisymmetric Contact	264
2.2 The Sneddon Representation of the Galin solution	264
2.3 The Galin Solution for Monomial Punches	266
2.4 A Solution for Polynomial Punches	267
3. Axisymmetric Contact Problems with Molecular Adhesion	267
4. Adhesive (No-Slip) Axisymmetric Contact Problems	270
4.1 Two-Dimensional Problem for a Punch with Horizontal Base	270
4.2 Axisymmetric Adhesive Contact Problems for Curved Punches	271
4.3 The Mossakovskii Solution for Adhesive Contact	271
4.4 Solution to the Problem for Punches of Monomial Shape	273
5. Self-Similar Contact Problems	275
5.1 Similarity Transformations for Hertz Type Contact Problems	277
5.2 Punches Described by Homogeneous Functions	279
5.3 Punches Described by Parametric-Homogeneous Functions	280
6. Hardness Measurements and Depth-Sensing Techniques	283

6.1	Brief History of Hardness Measurements	283
6.2	Depth-Sensing Techniques	285
6.3	Adhesive (No-Slip) Indentation	287
6.4	Similarity Considerations of 3D Indentation	293
	<b>Further Developments of Galin's Stick-Slip Problem</b>	293
	<i>Olesya I. Zhupanska</i>	
1.	Introduction	293
2.	The Stick-Slip Problem in Galin's Formulation	294
2.1	Refinements of Galin's Solution	294
2.2	Solution of the Galin Stick-Slip Problem Due to Antipov and Arutyunyan	298
2.3	Solution to the Galin Stick-Slip Problem Due to Spence	303
3.	Extensions to the Stick-Slip Contact Problem	306
3.1	Arbitrary Load	306
3.2	A Periodic System of Punches	307
3.3	Self-Similarity Approach in Stick-Slip Contact Problems	307

Contact Problems

The legacy of L.A. Galin

Galín, L.A. - Gladwell, G.M.L. (Ed.)

2008, XIV, 318 p., Hardcover
