Preface	vii
Acknowledgments	ix
 Section I Arthropods and Human Health	
1 Arthropods and Health	3
1.1 Classification of Arthropods.....	3
1.1.1 Insects	3
1.1.2 Spiders	5
1.1.3 Mites and Ticks.....	8
1.1.4 Scorpions	8
1.1.5 Centipedes and Millipedes	9
1.2 Medical Importance of Arthropods.....	10
1.2.1 Historical Aspects of Medically Important Arthropods	10
1.2.2 Direct Effects on Health	11
1.2.3 Indirect Effects on Health.....	12
2 Dynamics of Arthropod-Borne Diseases	19
2.1 Mechanical vs Biological Transmission of Pathogens	19
2.1.1 Mechanical Transmission	19
2.1.2 Biological Transmission	20
2.2 Vector Competence	24
2.2.1 Incrimination of Vectors: A Complicated Issue	25
 Section II Major Arthropod-Borne Diseases	
3 Mosquito-Borne Diseases	31
3.1 Basic Mosquito Biology	31
3.2 Malaria	35
3.2.1 Introduction.....	35

3.2.2	The Disease and Its Diagnosis	38
3.2.3	The Causative Agent and Life Cycle	38
3.2.4	Mosquito Vectors and Behavior	40
3.2.5	Malaria Treatment and Control.	44
3.3	Mosquito-Transmitted Encephalitis Viruses.	45
3.3.1	Introduction and General Comments	45
3.3.2	Eastern Equine Encephalitis (EEE)	46
3.3.3	St. Louis Encephalitis (SLE)	49
3.3.4	West Nile Encephalitis (WNV).	53
3.3.5	Other Mosquito-Borne Viruses	54
3.4	Dengue Fever	58
3.4.1	Introduction.	58
3.4.2	Spread of the Virus	58
3.4.3	Clinical and Laboratory Characteristics	61
3.4.4	Treatment, Prevention, and Control	62
3.5	Yellow Fever (YF).	63
3.5.1	Introduction and Medical Significance.	63
3.5.2	Brief History of Yellow Fever.	65
3.5.3	Jungle vs Urban YF Cycles	67
3.5.4	Treatment and Prevention	67
3.6	Lymphatic Filariasis	68
3.6.1	Introduction and Medical Significance.	68
3.6.2	Clinical and Laboratory Findings	68
3.6.3	Ecology of Lymphatic Filariasis	70
3.7	Other Human-Infesting Filarial Worms	74
4	Tick-Borne Diseases	81
4.1	Basic Tick Biology	81
4.2	Rocky Mountain-Spotted Fever (RMSF)	84
4.2.1	Introduction.	84
4.2.2	Clinical and Laboratory Aspects of RMSF.	85
4.2.3	Ecology of RMSF	87
4.2.4	Prevention and Treatment of RMSF	87
4.3	American Boutonneuse Fever (ABF)	90
4.3.1	Introduction and Background	90
4.3.2	Clinical and Laboratory Description of a Case of ABF	92
4.3.3	Ecology of ABF	92
4.3.4	Prevention and Treatment of ABF	94
4.4	Other Spotted Fever Group Rickettsioses	94
4.4.1	Boutonneuse Fever	94
4.4.2	African Tick-Bite Fever	96
4.4.3	Siberian Tick Typhus	96
4.4.4	Queensland Tick Typhus.	96
4.5	Ehrlichiosis	96
4.5.1	Introduction.	96

4.5.2	Clinical and Laboratory Findings	98
4.5.3	Ecology of Ehrlichiosis	99
4.5.4	Treatment and Control of Ehrlichiosis	100
4.6	Lyme Disease	100
4.6.1	Introduction	100
4.6.2	Background and Historical Information	102
4.6.3	Clinical and Laboratory Findings	103
4.6.4	Ecology of LD	104
4.6.5	Treatment	105
4.7	Tularemia	105
4.7.1	Introduction and Medical Significance of Tularemia	105
4.7.2	Clinical and Laboratory Findings	106
4.7.3	Arthropod Transmission of the Tularemia Organism	107
4.7.4	Treatment	108
4.8	Human Babesiosis	109
4.8.1	Introduction and Medical Significance	109
4.8.2	Clinical and Laboratory Findings	109
4.8.3	Species of Babesia and Their Ecology	110
4.8.4	Treatment and Control	111
4.9	Viruses Transmitted by Ticks	111
4.9.1	Introduction	111
4.9.2	Tick-Borne Encephalitis (TBE)	112
4.9.3	Colorado Tick Fever (CTF)	113
4.10	Tick-Borne Relapsing Fever (TBRF)	114
4.10.1	Introduction and Medical Significance	114
4.10.2	Clinical and Laboratory Findings	114
4.10.3	The Etiologic Agent and Its Relationship to Louse-Borne Relapsing Fever	116
4.10.4	Ecology of TBRF	116
4.10.5	Treatment and Control	117
4.11	Tick Paralysis	119
4.11.1	Introduction and Medical Significance	119
4.11.2	Clinical Features	119
4.11.3	Ticks Involved and Mechanism of Paralysis	121
4.11.4	Prevention and Treatment	123
5	Flea-Borne Diseases	131
5.1	Basic Flea Biology	131
5.2	Plague	133
5.2.1	Introduction and Clinical Presentation	133
5.2.2	History	134
5.2.3	Ecology of Plague	135
5.2.4	Diagnosis and Treatment	136
5.3	Murine Typhus	136
5.3.1	Introduction and Medical Significance	136

5.3.2	Clinical and Laboratory Findings	138
5.3.3	Ecology of Murine Typhus	138
5.3.4	Treatment	139
5.4	Cat-Scratch Disease (CSD)	139
5.4.1	Introduction and Clinical Presentation	139
5.4.2	Reservoirs and Mode(s) of Transmission	141
5.4.3	Treatment	141
6	Sand Fly-Transmitted Diseases	143
6.1	Basic Sand Fly Biology	143
6.2	Leishmaniasis	143
6.2.1	Introduction and Medical Significance	143
6.2.2	Clinical Manifestations and Diagnosis	144
6.2.3	Ecology of Leishmaniasis	148
6.2.4	Treatment and Control of Leishmaniasis	149
6.3	Other Sand Fly-Transmitted Diseases	150
6.3.1	Bartonellosis (Carrion's Disease)	150
6.3.2	Sand Fly Fever	150
7	Miscellaneous Vector-Borne Diseases	153
7.1	Chagas' Disease	153
7.1.1	Introduction and Medical Significance	153
7.1.2	Clinical and Laboratory Findings	154
7.1.3	Ecology of Chagas' Disease and Its Vectors	157
7.1.4	Treatment, Prevention, and Control	159
7.2	African Sleeping Sickness	160
7.2.1	Introduction and Medical Significance	160
7.2.2	Clinical and Laboratory Findings	161
7.2.3	Ecology of African Sleeping Sickness and Its Vectors	161
7.2.4	Treatment, Prevention, and Control	163
7.3	Onchocerciasis	164
7.3.1	Introduction and Medical Significance	164
7.3.2	Clinical and Laboratory Findings	165
7.3.3	Ecology of Onchocerciasis and Its Vectors	165
7.3.4	Treatment, Prevention, and Control	166
7.4	Scrub Typhus (ST)	166
7.4.1	Introduction and Medical Significance	166
7.4.2	Clinical and Laboratory Findings	167
7.4.3	Ecology of ST and Its Vectors	168
7.4.4	Treatment, Prevention, and Control	168
7.5	Louse-Borne Infections	170
7.5.1	General and Medical Importance of Body Lice	170
7.5.2	Epidemic Typhus	171
7.5.3	Trench Fever	171

7.5.4	Louse-Borne Relapsing Fever (LBRF)	174
7.5.5	Treatment, Prevention, and Control of Louse-Borne Diseases	174
8	Bed Bugs: Do They Transmit Diseases?	177
8.1	Introduction and Bed Bug Biology	177
8.2	Bed Bugs and Disease Transmission	179
9	Why Mosquitoes and Other Arthropods Cannot Transmit HIV . . .	183
 Section III Other Arthropod-Caused or -Related Problems		
10	Brown Recluse Bites: Facts and Fables	187
10.1	Introduction and Biology	187
10.2	Facts and Fables About Brown Recluse Bites	187
10.3	Differential Diagnosis	189
10.4	Treatment of Bites	191
11	Fire Ant Attacks on Humans	195
11.1	The Problem	195
11.2	Effects of the Venom	196
11.3	Infectious Complications	197
11.4	Protecting Patients in Health Care Facilities from Ant Attacks	198
12	Medical Conditions Caused by Arthropod Stings or Bites	201
12.1	Introduction and Medical Significance	201
12.2	Pathogenesis	201
12.2.1	Mouthpart Types	201
12.2.2	Sting Apparatus	202
12.2.3	Direct Damage to Tissue	205
12.2.4	Infectious Complications	205
12.3	Clues to Recognizing Insect Bites or Stings	206
12.3.1	Diagnosis	206
12.4	Summary and Conclusions	207
13	Myiasis	209
13.1	Introduction and Medical Significance	209
13.1.1	Accidental Myiasis	209
13.1.2	Facultative Myiasis	211
13.1.3	Obligate Myiasis	212
13.2	Contributing Factors	215

13.2.1	Accidental Myiasis	215
13.2.2	Facultative Myiasis	215
13.2.3	Obligate Myiasis	216
13.2.4	Myiasis in Clinical Practice	216
13.2.5	Differential Diagnosis	217
13.3	Prevention, Treatment, and Control	217
14	Imaginary Insect or Mite Infestations	221
14.1	Introduction and Medical Significance	221
14.2	Clinical Aspects and Contributing Factors	222
14.3	Differential Diagnosis	223
14.4	Treatment Strategies	223
Appendix 1	Signs and Symptoms of Arthropod-Borne Diseases	227
Appendix 2	Diagnostic Tests Used in Arthropod-Borne Diseases	233
A.2.1	Agglutination	233
A.2.2	Complement Fixation	233
A.2.3	Direct Fluorescent Antibody	233
A.2.4	Enzyme-Linked Immunosorbent Assay (ELISA)	234
A.2.5	Hemagglutination Inhibition (HI)	234
A.2.6	Immunohistochemistry (IHC)	234
A.2.7	Indirect Fluorescent Antibody (IFA)	234
A.2.8	Leishmanin (Montenegro Test)	235
A.2.9	Mazzotti	235
A.2.10	Neutralization	235
A.2.11	Polymerase Chain Reaction (PCR)	235
Index		237
