1.1	Known to the Ancients.....	5
1.2	Galileo Galilei and Discovery of the Galilean Moons.....	5
1.3	Cassini and the Great Red Spot	6
1.4	In Good Company	6
Chapter 2	Jupiter's Place in the Solar System	7
2.1	Physical Characteristics.....	7
2.2	A System of Basic Terminology and Nomenclature	9
Chapter 3	The Physical Appearance of the Planet	12
3.1	Common Visual Markings.....	12
3.2	Winds and Jet Streams in the Atmosphere.....	45
3.3	Color in Jupiter's Belts and Zones	47
3.4	Summary	48
Chapter 4	Color, Chemical Composition of the Planet, and Vertical Structure of the Atmosphere	50
4.1	Color	50
4.2	The Chemical Composition.....	64
4.3	The Vertical Structure of Jupiter's Atmosphere	66
Chapter 5	The Electromagnetic Environment Surrounding Jupiter	69
5.1	The Magnetosphere and Magnetic Field.....	69
5.2	The Io Cloud and Torus.....	76
5.3	Radiation Belts	78
5.4	Aurora.....	78
5.5	Radio Emission	82
5.6	Lightning	83
5.7	The Io Flux Tube and Magnetic Footprints on Jupiter.....	86

5.8	X-Ray Emission from Jupiter and Its Environ	88
5.9	Summary	89
Chapter 6	The Jovian Satellite System	91
6.1	The Galilean Moons of Jupiter	91
6.2	The Lesser Moons	130
6.3	The Rings of Jupiter	138
6.4	Trojans and Comets	142
 Section II How to Observe the Planet Jupiter		
	Introduction	147
Chapter 7	Equipment	149
7.1	Telescopes	149
7.2	Eyepieces	155
7.3	Filters	156
7.4	Mountings	158
Chapter 8	Sky Conditions	161
8.1	Seeing	161
8.2	Transparency	162
8.3	Learning about Weather	163
Chapter 9	Making a Record	165
9.1	Making a Drawing of Jupiter	165
9.2	The Full Disk Drawing	166
9.3	The Strip Sketch	170
9.4	Intensity Estimates	172
9.5	Central Meridian Transit Timings	175
9.6	Drift Charts	176
9.7	Observation and Estimates of Color	178
9.8	The Use of Photography to Study Jupiter	179
9.9	CCD Imaging	180
9.10	Imaging with Webcams	182
9.11	Making use of CCD and Webcam Images	188
9.12	Measurement of Latitude	190
9.13	Keeping a Record: The Logbook	192
9.14	Reporting	194
9.15	Amateur Organizations	195
	Conclusion	197
