# Contents

<b>Preface</b>	v
<b>1 Introduction and Outline of Contents</b>	1
References and Further Reading	15
<b>2 Some One-Dimensional Examples</b>	17
2.1 Introduction	17
2.2 Free Problems	17
2.3 Solutions of the Wave Equation	19
2.4 Solutions of Initial Value Problems	22
2.5 Integral Transform Methods	27
2.6 On the Reduction to a First Order System	31
2.7 Waves on Sectionally Homogeneous Strings	33
2.7.1 A Two-Part String	33
2.7.2 A Three-Part String	37
2.8 Duhamel's Principle	39
2.9 On the Far Field Behaviour of Solutions	41
2.9.1 Jost Solutions	43
2.9.2 Some Scattering Aspects	46
2.10 Concluding Remarks	48
References and Further Reading	50
<b>3 Preliminary Mathematical Material</b>	51
3.1 Introduction	51
3.2 Notations	51
3.3 Vector Spaces	52
3.4 Distributions	58
3.5 Fourier Transforms and Distributions	69
References and Further Reading	76

<b>4</b>	<b>Hilbert Spaces</b>	77
4.1	Introduction	77
4.2	Orthogonality, Bases and Expansions	83
4.3	Linear Functionals and Operators on Hilbert Spaces	91
4.4	Some Frequently Occurring Operators	97
4.5	Unbounded Linear Operators on Hilbert Spaces	105
	References and Further Reading	114
<b>5</b>	<b>Two Important Techniques</b>	115
5.1	Introduction	115
5.2	Spectral Decomposition Methods	115
5.2.1	Basic Concepts	115
5.2.2	Spectral Decompositions	121
5.2.3	Spectral Decompositions on Finite Dimensional Spaces	122
5.2.4	Reducing Subspaces	127
5.2.5	Spectral Decompositions on Infinite Dimensional Spaces	132
5.2.6	Functions of an Operator	138
5.2.7	Spectral Decompositions of Hilbert Spaces	140
5.3	Semigroup Methods	145
5.3.1	Well-posedness of Problems	150
5.3.2	Generators of Semigroups	151
	References and Further Reading	155
<b>6</b>	<b>A Scattering Theory Strategy</b>	157
6.1	Introduction	157
6.2	Propagation Aspects	158
6.3	Solutions with Finite Energy and Scattering States	163
6.4	Construction of Solutions	166
6.4.1	Wave Operators and Their Construction	169
6.5	Asymptotic Conditions	175
6.6	A Remark about Spectral Families	181
6.7	Some Comparisons of the Two Approaches	182
6.8	Summary	184
	References and Further Reading	185
<b>7</b>	<b>An Approach to Echo Analysis</b>	187
7.1	Introduction	187
7.2	A Typical Mathematical Model	187
7.3	Scattering Aspects and Echo Analysis	191
7.4	Construction of the Echo Field	193
	References and Further Reading	199

<b>8</b>	<b>Scattering Processes in Stratified Media</b>	201
8.1	Introduction	201
8.2	Hilbert Space Formulation	203
8.3	Scattering in Plane Stratified Media	209
8.3.1	The Eigenfunctions of $A$	213
8.3.2	The Wave Eigenfunctions of $A$	216
8.3.3	Generalised Eigenfunction Expansions	219
8.3.4	Some Remarks about Asymptotic Wave Functions	222
	References and Further Reading	224
<b>9</b>	<b>Scattering in Spatially Periodic Media</b>	225
9.1	Introduction	225
9.2	The Mathematical Model	225
9.3	Elements of Floquet Theory	229
9.3.1	Hill's Equation	232
9.4	Solutions of the Mathematical Model	236
	References and Further Reading	242
<b>10</b>	<b>Inverse Scattering Problems</b>	245
10.1	Introduction	245
10.2	Some Asymptotic Formulae for the Plasma Wave Equation	247
10.3	The Scattering Matrix	249
10.3.1	Decomposable Operators	250
10.3.2	Some Algebraic Properties of $W_{\pm}$ and $S$	252
10.4	The Inverse Scattering Problem	254
10.5	A High Energy Limit Method	255
10.5.1	The solution of an Integral Equation	256
	Appendix A10.1 Proof of Theorem 10.2	259
	References and Further Reading	261
<b>11</b>	<b>Scattering in Other Wave Systems</b>	263
11.1	Introduction	263
11.2	Scattering of Electromagnetic Waves	263
11.3	Overview of Acoustic Wave Scattering Analysis	271
11.4	More about Electromagnetic Wave Scattering	274
11.5	Potential Scattering in Chiral Media	277
11.5.1	Formulation of the Problem	277
11.6	Scattering of Elastic Waves	279
11.6.1	An Approach to Elastic Wave Scattering	280
	References and Further Reading	283

<b>12</b>	<b>Commentary</b> .....	285
12.1	Introduction .....	285
12.2	Remarks on Previous Chapters .....	285
12.3	Appendices .....	289
A12.1	Limits and Continuity .....	289
A12.2	Differentiability .....	291
A12.3	The Function Classes $C^m(B)$ and $C^m(\bar{B})$ .....	291
A12.4	Sobolev Spaces .....	292
A12.5	Retarded Potentials .....	293
A12.6	An Illustration of the Use of Stone's Formula .....	296
	References and Further Reading .....	300
<b>Index</b>	.....	307

An Introduction to Echo Analysis  
Scattering Theory and Wave Propagation

Roach, G.

2008, X, 320 p., Hardcover

ISBN: 978-1-84628-851-7
