Preface	vii
1 Introduction	1
1.1 Strategy in the Construction of Theory	1
1.2 Overview	2
1.2.1 Splines	2
1.2.2 Shape-Preserving Interpolation	3
1.2.3 Functional Approximation	3
1.2.4 Spiral Curves	4
1.2.5 Corner Detection and Curve Segmentation	4
1.2.6 Vectorizing Planar Shapes	5
1.2.7 Reverse Engineering	5
1.2.8 Multiresolution Framework	6
1.3 Notation and Conventions	6
1.4 Review of Some Spline Methods	7
1.4.1 Cubic Spline	7
1.4.2 Spline Under Tension	8
1.4.3 Weighted Spline	8
1.4.4 Nu-spline	8
1.4.5 Weighted Nu-spline	9
1.4.6 Beta Splines	9
1.4.7 Sigma (σ) Splines	10
1.4.8 B-Splines	10
1.4.9 Bézier Splines	11
1.4.10 Hermite Splines	11
1.5 Summary	13
1.6 Exercises	13
2 Weighted Nu Splines	21
2.1 Introduction	21
2.2 Some Spline Methods	23
2.2.1 Cubic Splines	24
2.2.2 Weighted Splines	24
2.2.3 Nu Splines	26

2.2.4	Weighted Nu Splines	27
2.2.5	Demonstration	28
2.3	Freeform Weighted Nu Spline	28
2.3.1	Local Support Basis	29
2.3.2	Design Curve	31
2.3.3	Shape Control	32
2.3.4	Demonstration	34
2.3.5	Advantages and Features	37
2.4	Surfaces	37
2.5	Summary	38
2.6	Exercises	38
3	Rational Cubic Spline with Shape Control	41
3.1	Introduction	41
3.2	C^1 Piecewise Rational Cubic Hermite Interpolant	42
3.3	One-Parameter Rational Cubic Spline	44
3.4	Two-Parameter Rational Cubic Spline	49
3.5	Demonstration	51
3.6	Freeform Curves	55
3.7	Local Support Basis	56
3.8	Design Curve	58
3.9	Shape Properties	60
3.10	Demonstration	64
3.11	Nurbs	64
3.12	Surfaces	70
3.13	Summary	71
3.14	Exercises	71
4	Rational Sigma (σ) Splines	75
4.1	Introduction	75
4.2	Generalized Rational Cubic Interpolant	76
4.3	Interpolatory Rational σ -Splines	77
4.3.1	Shape Control	77
4.3.2	Some Special Cases	78
4.3.3	Examples	78
4.4	Freeform Rational σ -Splines	81
4.4.1	Shape Control	84
4.4.2	Some Special Cases	85
4.4.3	Examples	87
4.5	Exercises	91
5	Linear, Conic and Rational Cubic Splines	93
5.1	Introduction	93
5.2	The Rational Cubic Spline	95
5.2.1	Estimation of Tangent Vectors	97

5.3	Design Curve Analysis	99
5.4	Estimation of End Tangent Vectors	101
5.5	Conic Splines and Straight Line	101
5.5.1	Conic Arc in Cubic Spline	103
5.5.2	Circular Spline	103
5.5.3	Circular Arc	105
5.5.3.1	Circular Arc for Given Radius	106
5.5.3.2	Circular Arc for a Given Center	106
5.5.4	Elliptic Arc	107
5.5.5	Intermediate Point Interpolation	109
5.5.6	Straight-Line Segment	110
5.6	Examples	110
5.7	Summary	113
5.8	Exercises	113
6	Shape-Preserving Rational Interpolation for Planar Curves	117
6.1	Introduction	117
6.2	The Rational Cubic Interpolant	118
6.3	Interpolation of Convex Data	119
6.4	Interpolation of Monotonic Data	120
6.5	Interpolation of Convex and Monotonic Data	123
6.6	Choice of Tangent Vectors	123
6.7	Examples	124
6.8	Summary	126
6.9	Exercises	126
7	Visualization of Shaped Data by a Rational Cubic Spline	129
7.1	Introduction	129
7.2	Rational Cubic Spline with Shape Control	133
7.2.1	Shape Control Analysis	134
7.2.2	Determination of Derivatives	135
7.2.2.1	Derivative Method I	135
7.2.2.2	Derivative Method II	135
7.2.2.3	Derivative Method III	136
7.2.3	Examples and Discussion	136
7.3	Positive Spline Interpolation	139
7.3.1	Examples and Discussion	142
7.4	Monotone Spline Interpolation	145
7.4.1	Examples and Discussion	148
7.5	Convex Spline Interpolation	148
7.5.1	Demonstration	153
7.6	Summary	154
7.7	Exercises	154
8	Visualization of Shaped Data by Cubic Spline Interpolation	157
8.1	Introduction	157

8.2	Cubic Interpolant	158
8.2.1	Demonstration	159
8.3	Shape-Preserving Interpolation	160
8.4	Convex Cubic Spline	160
8.4.1	Demonstration	162
8.5	Monotone Cubic Spline	162
8.5.1	Demonstration	164
8.6	Positive Cubic Spline	164
8.6.1	Demonstration	166
8.7	Extension of Positive Cubic Spline	167
8.7.1	Demonstration	170
8.8	Summary	171
8.9	Exercises	171
9	Approximation with B-Splines Curves	173
9.1	Introduction	173
9.2	B-Splines	174
9.3	Deterministic Approach	174
9.3.1	Approximation Technique	175
9.3.1.1	Initial Data Points (Step 1)	175
9.3.1.2	Knot Insertion (Step 2)	177
9.3.1.3	Error Minimization (Step 3)	178
9.3.2	Demonstration	178
9.4	Nondeterministic Approach	180
9.4.1	A Brief Overview of GAs	181
9.4.2	Implementation Summary	181
9.4.3	Demonstration	183
9.5	Summary	193
9.6	Exercises	193
10	Spirals	195
10.1	Introduction	195
10.2	The Rational Quadratic Bézier Curve	196
10.3	The Conic Spiral	197
10.4	Comparison of Conic and T-cubic Spirals	200
10.5	The Arc/Conic Spiral	201
10.6	Examples	205
10.7	Limitations	206
10.8	Summary	206
10.9	Exercises	206
11	Corner Detection for Curve Segmentation	209
11.1	Introduction	209
11.2	Basic Formulation	210
11.3	Summary of Commonly Referred Corner Detectors	212

11.3.1	Rosenfeld and Johnston (RJ73) Algorithm	212
11.3.2	Rosenfeld and Weszka (RW75) Algorithm	213
11.3.3	Freeman and Davis (FD77) Algorithm	213
11.3.4	Beus and Tiu (BT87) Algorithm	214
11.4	Chetverikov and Szabo (CS99) Algorithm	215
11.4.1	First Pass	215
11.4.2	Second Pass	216
11.4.3	Demonstration	216
11.4.4	Performance Evaluation	218
11.5	Sarfraz, Asim and Masood (SAM06) Algorithm	219
11.5.1	First Pass	219
11.5.2	Second Pass	220
11.5.3	Parameters	221
11.5.4	Demonstration	221
11.6	Masood and Sarfraz (MS06) Algorithm	226
11.6.1	Performance Criteria	230
11.6.2	Demonstration	231
11.7	Overall Analysis	235
11.8	Piecing Boundaries	236
11.9	Summary	237
11.10	Exercises	238
12	Linear Capture of Digital Curves	241
12.1	Introduction	241
12.2	Some Important Issues	243
12.2.1	Input Parameters	243
12.2.2	Region of Support	244
12.2.3	Error Measurement	244
12.2.4	Min-# and Min- ϵ Problems	245
12.2.5	Test Shapes	245
12.3	Approximation Techniques	246
12.3.1	Teh and Chin Algorithm	247
12.3.2	Marji and Siy Algorithm	248
12.3.3	Wu Algorithm	249
12.3.4	Some Other Algorithms	250
12.4	Piecewise Polygonal Approximation	251
12.4.1	Preprocessing Stage	251
12.4.2	SAMAPA Algorithm	252
12.5	Experimental Results	256
12.6	Optimal Algorithms	259
12.6.1	Dynamic Programming	259
12.6.2	Perez and Vidal Algorithm	260
12.6.3	Some Remarks on Optimal Algorithms	261
12.7	Summary	262
12.8	Exercises	262

13	Digital Outline Capture with Cubic Curves	267
13.1	Introduction	267
13.2	Finding the Boundary of a Bitmap Image	268
13.3	Detecting Corner Points	270
13.4	Filtering Noise	271
13.5	Curve Fitting with Cubic Bézier	272
13.5.1	Finding Intermediate Control Points	273
13.5.2	Comparing the Boundary and Parametric Curve	276
13.6	Reparameterization	276
13.7	Breaking Segment	279
13.8	Alternate Method Using Hermite Cubic	281
13.8.1	Estimation of Tangent Vectors	282
13.8.2	Optimal Design Curve	283
13.9	Transformations and Mapping	285
13.9.1	Transformations	287
13.9.2	Mapping Parametric Surfaces	288
13.9.2.1	Two-Dimensional Surface Mapping	290
13.9.2.2	Three-Dimensional Surface Mapping	293
13.10	Summary	293
13.11	Exercises	293
14	Computer-Aided Reverse Engineering Using Evolutionary Heuristics on NURBS	297
14.1	Introduction	297
14.2	Preprocessing	299
14.2.1	Image Contour Extraction	299
14.2.2	Detection of Corner Points	299
14.3	NURBS	301
14.3.1	Data Fitting Using NURBS Curves	302
14.3.2	Generation of Control Points for Curves	303
14.3.3	Generation of Control Points for Surfaces	304
14.4	Approach Using SimE	304
14.4.1	Outline of SimE	304
14.4.2	Problem Mapping SimE	304
14.4.2.1	Initialization	305
14.4.2.2	Evaluation	305
14.4.2.3	Selection	306
14.4.2.4	Allocation and Weight Optimization for Curves	306
14.4.3	Algorithm Outline for Curves	306
14.4.4	Demonstration	309
14.5	Approach Using SimA	312
14.5.1	Outline of SimE	313
14.5.2	Problem Mapping	313
14.5.2.1	Weight Optimization Using SimA	313
14.5.2.2	Initial Temperature T_0	315

14.5.2.3	Decrement of T	315
14.5.2.4	Length of Markov Chain M	315
14.5.2.5	Weight Seclction	316
14.5.3	Demonstration	316
14.6	Surfaces	322
14.7	Summary	328
14.8	Exercises	329
15	Multiresolution Framework for B-Splines	331
15.1	Introduction	331
15.2	Theory of NUBS	332
15.3	Multiresolution Representation of B-Splines	333
15.3.1	Multiresolution Representation of B-Splines Using Wavelets	334
15.3.2	Multiresolution of NUBS Using Knot Decimation	335
15.4	Multiresolution of NUBS Using Control Point Decimation . . .	336
15.5	Demonstration	339
15.6	Summary	341
15.7	Exercises	343
	Index	345

Interactive Curve Modeling

With Applications to Computer Graphics, Vision and
Image Processing

Sarfraz, M.

2008, XVII, 350 p., Hardcover

ISBN: 978-1-84628-870-8
