

# Contents

<b>1</b>	<b>Introduction.....</b>	<b>1</b>
1.1	Introduction to Energy Sources.....	1
1.2	Global Energy Sources and the Present Energy Situation .....	3
1.3	Renewable Energy Sources.....	6
1.3.1	Biomass Energy and Biomass Conversion Technologies.....	8
1.3.2	Hydropower .....	23
1.3.3	Geothermal Energy .....	24
1.3.4	Wind Energy .....	25
1.3.5	Solar Energy .....	27
1.3.6	Biohydrogen .....	28
1.3.7	Other Renewable Energy Sources .....	30
	References.....	33
<b>2</b>	<b>Biofuels.....</b>	<b>39</b>
2.1	Introduction to Biofuels .....	39
2.2	Bioethanol.....	42
2.3	Biomethanol.....	45
2.4	Biohydrogen from Biomass by Steam Reforming .....	49
2.4.1	Steam-reforming Process.....	50
2.4.2	Fuels from Bio-syngas via Fischer–Tropsch Synthesis .....	51
2.5	Biodiesel .....	56
2.6	Bio-oil .....	57
2.7	Global Biofuel Scenarios .....	59
	References.....	60
<b>3</b>	<b>Vegetable Oils and Animal Fats.....</b>	<b>65</b>
3.1	Use of Vegetable Oils and Animal Fats in Fuel Engines .....	65
3.2	Vegetable Oil Resources.....	67
3.2.1	Inedible Oil Resources.....	69

3.3	Vegetable Oil Processing.....	72
3.3.1	Recovery of Vegetable Oils from Plants .....	72
3.3.2	Vegetable Oil Refining .....	73
3.4	The Use of Vegetable Oils as Diesel Fuel .....	74
3.4.1	Physical and Chemical Properties of Vegetable Oils .....	75
3.4.2	Direct Use of Vegetable Oils in Diesel Engines.....	79
3.5	New Engine Fuels from Vegetable Oils .....	83
3.5.1	Pyrolysis of Vegetable Oils and Fats.....	83
3.5.2	Cracking of Vegetable Oils .....	85
3.5.3	Pyrolysis Mechanisms of Vegetable Oils.....	86
3.6	Gasoline-rich Liquid from Sunflower Oil by Alumina Catalytic Pyrolysis .....	88
3.7	Diesel-like Fuel from Tallow (Beef) by Pyrolysis and Steam Reforming .....	91
3.8	Converting Triglyceride-derived Synthetic Gas to Fuels via Fischer–Tropsch Synthesis .....	95
3.9	Triglyceride Analyses.....	99
3.9.1	Viscosity.....	99
3.9.2	Density .....	100
3.9.3	Cetane Number.....	100
3.9.4	Cloud and Pour Points .....	101
3.9.5	Distillation Range.....	101
3.9.6	Heat of Combustion.....	101
3.9.7	Water Content.....	102
3.9.8	Discussion of Fuel Properties of Triglycerides .....	102
3.10	Triglyceride Economy .....	105
	References .....	105
<b>4</b>	<b>Biodiesel.....</b>	<b>111</b>
4.1	Introduction to Biodiesel Concept .....	111
4.2	History .....	112
4.3	Definitions .....	114
4.4	Biodiesel as an Alternative to Diesel Engine Fuel.....	115
4.5	Sources of Biodiesel .....	117
	References .....	118
<b>5</b>	<b>Biodiesel from Triglycerides via Transesterification.....</b>	<b>121</b>
5.1	Biodiesel from Triglycerides via Transesterification.....	121
5.1.1	Catalytic Transesterification Methods.....	123
5.1.2	Supercritical Alcohol Transesterification.....	125
5.1.3	Biocatalytic Transesterification Methods.....	132
5.1.4	Recovery of Glycerine.....	133

5.1.5	General Reaction Mechanism of Transesterification.....	133
5.1.6	Esterification of Fatty Acids with Diazomethane .....	137
5.1.7	Non-catalytic Supercritical Alcohol Transesterification.....	137
5.1.8	Enzyme-catalyzed Processes .....	138
	References.....	139
<b>6</b>	<b>Fuel Properties of Biodiesels .....</b>	<b>141</b>
6.1	Viscosity, Density, and Flash Point .....	141
6.2	Cetane Number, Cloud Point, and Pour Point.....	144
6.3	Characteristics of Distillation Curves .....	145
6.4	Higher Combustion Efficiency of Biodiesel .....	145
6.5	Water Content .....	146
6.6	Comparison of Fuel Properties and Combustion Characteristics of Methyl and Ethyl Alcohols and Their Esters .....	146
6.7	Advantages and Disadvantages of Biodiesels.....	151
6.7.1	Advantages of Biodiesel as Diesel Fuel.....	151
6.7.2	Availability and Renewability of Biodiesel .....	151
6.7.3	Lower Emissions from Biodiesel.....	152
6.7.4	Biodegradability of Biodiesel .....	155
6.7.5	Thermal Degradation of Fatty Acids During Biodiesel Production.....	156
6.7.6	Disadvantages of Biodiesel as Diesel Fuel .....	157
	References.....	158
<b>7</b>	<b>Current Technologies in Biodiesel Production.....</b>	<b>161</b>
7.1	Biodiesel Production Processes .....	166
7.1.1	Primary Raw Materials Used in Biodiesel Production .....	166
7.1.2	Biodiesel Production with Batch Processing .....	167
7.1.3	Biodiesel Production with Continuous Process .....	168
7.1.4	Biodiesel Production with Non-catalyzed Transesterification .....	169
7.1.5	Basic Plant Equipment Used in Biodiesel Production .....	171
	References.....	172
<b>8</b>	<b>Engine Performance Tests.....</b>	<b>175</b>
8.1	Engine Combustion Process and Combustion-related Concepts.....	177
8.2	Engine Performance Tests .....	179
8.2.1	Alcohol-diesel Emulsions.....	179
8.2.2	Using Microemulsions for Vegetable Oil .....	180
8.2.3	Diesel Engine Fumigation .....	180
8.2.4	Dual Injection .....	180
8.2.5	Injector Coking .....	181

8.2.6	Heated Surfaces .....	181
8.2.7	Torque Tests .....	181
8.2.8	Spark Ignition .....	181
8.2.9	Oxidation .....	182
	References .....	182
<b>9</b>	<b>Global Renewable Energy and Biofuel Scenarios .....</b>	<b>185</b>
9.1	Global Renewable Energy Sources.....	187
9.2	Renewable Energy Scenarios .....	189
	References .....	193
<b>10</b>	<b>The Biodiesel Economy and Biodiesel Policy .....</b>	<b>195</b>
10.1	Introduction to the Biodiesel Economy .....	195
10.2	Economic Benefits of Biodiesel .....	197
10.3	Biodiesel Costs .....	199
10.4	General Biodiesel Policy .....	201
10.5	European Biofuel Policy .....	202
	References .....	203
	<b>Index .....</b>	<b>205</b>

Biodiesel

A Realistic Fuel Alternative for Diesel Engines

Demirbas, A.

2008, X, 208 p., Hardcover

ISBN: 978-1-84628-994-1
