
Contents

1	Introduction	1
1.1	Fields Requiring Precision Control	1
1.1.1	Precision Engineering	1
1.1.2	Micromanufacturing	3
1.1.3	Biotechnology	6
1.1.4	Nanotechnology	7
1.2	Precision Machines and Tools	8
1.3	Applications of Precision Motion Control Systems	9
1.3.1	Semiconductor	9
1.3.2	Magnetic and Optical Memory Manufacturing	9
1.3.3	Optical Manufacturing	9
1.3.4	High-resolution Imaging	9
1.3.5	Precision Metrology	10
1.4	Scope of the Book	10
2	Precision Tracking Motion Control	11
2.1	Piezoelectric Actuators	11
2.1.1	Types of Piezoelectric Actuator Configuration	11
2.1.2	Mathematical Model	14
2.1.3	Adaptive Control	20
2.2	Permanent Magnet Linear Motors (PMLM)	24
2.2.1	Types of PMLM	27
2.2.2	Mathematical Model	30
2.2.3	Force Ripples	31
2.2.4	Friction	33
2.2.5	Composite Control	34
2.2.6	Control Enhancement with Accelerometers	44
2.2.7	Ripple Compensation	51
2.2.8	Disturbance Observation and Cancellation	54
2.2.9	Robust Adaptive Control	65
2.2.10	Iterative Learning Control	72

3	Automatic Tuning of Control Parameters	83
3.1	Relay Auto-tuning	84
3.1.1	Relay with Delay	85
3.1.2	Two-channel Relay Tuning	87
3.2	Friction Modelling Using Relay Feedback	87
3.2.1	Friction Identification Method	88
3.2.2	Simulation	91
3.2.3	Initialisation of Adaptive Control	92
3.3	Optimal Features Extraction from Relay Oscillations	92
3.4	Experiments	96
4	Co-ordinated Motion Control of Gantry Systems	101
4.1	Co-ordinated Control Schemes	103
4.1.1	Classical Master/Slave Approach	103
4.1.2	Set-point Co-ordinated Control	104
4.1.3	Fully Co-ordinated Control	105
4.2	Simulation Study	107
4.2.1	Control Task	107
4.2.2	Results	107
4.3	Experiments	108
4.3.1	XY Table-Configuration I	110
4.3.2	XY Table-Configuration II	112
4.4	Adaptive Co-ordinated Control Scheme	114
4.4.1	Dynamic Modelling of Gantry Stage	116
4.4.2	Model-based Adaptive Control Design	121
4.4.3	Stability Analysis	123
4.4.4	Software Simulation	123
4.4.5	Implementation Results	125
5	Geometrical Error Compensation	129
5.1	Overview of the Laser Measurement System	130
5.2	Components of the Laser Measurement System	131
5.2.1	Laser Head	131
5.2.2	Interferometer and Reflector	133
5.2.3	Measurement Receiver	133
5.2.4	Measurement and Control Electronics	134
5.3	Overview of Laser Calibration	134
5.3.1	Linear Measurement	135
5.3.2	Angular Measurement	136
5.3.3	Straightness Measurement	136
5.3.4	Squareness Measurement	138
5.4	Roll Measurement Using a Level-sensitive Device	139
5.5	Accuracy Assessment	139
5.6	Factors Affecting Measurement Accuracy	140
5.6.1	Linear Measurement Errors	140

5.6.2	Angular Measurement Errors	143
5.6.3	Straightness Measurement Errors	143
5.6.4	Environmental Conditions	143
5.7	Overall Error Model	144
5.8	Look-up Table for Geometrical Errors	146
5.9	Parametric Model for Geometrical Errors	148
5.9.1	Error Modelling with Radial Basis Functions	148
5.9.2	Parameter Error Approximations	149
5.9.3	Experiments	155
5.9.4	Error Modelling with Multi-layer Neural Networks	156
5.10	Compensation of Machines with Random Errors	161
5.10.1	Probabilistic Methodology	162
5.10.2	Experiments	163
6	Electronic Interpolation Errors	171
6.1	Heydemann Interpolation Method	172
6.1.1	Interpolation Bounds	174
6.1.2	Calibration and Compensation	175
6.2	Enhanced Interpolation Method	175
6.2.1	Principle of Enhanced Interpolation Method	176
6.2.2	Construction of a Look-up Table	177
6.2.3	Experiments	182
6.3	Parametric Model for Interpolation	184
6.3.1	Principles of Interpolation Approach	185
6.3.2	Precompensation Stage	186
6.3.3	Interpolation Stage	189
6.3.4	Experimental Study	190
7	Vibration Monitoring and Control	195
7.1	Mechanical Design to Minimise Vibration	196
7.1.1	Stability and Static Determinacy of Machine Structures	196
7.1.2	Two-dimensional Structures	197
7.1.3	Three-dimensional Structures	201
7.2	Adaptive Notch Filter	207
7.2.1	Fast Fourier Transform	209
7.2.2	Simulation	209
7.2.3	Experiments	209
7.3	Real-time Vibration Analyser	210
7.3.1	Learning Mode	212
7.3.2	Monitoring Mode	214
7.3.3	Diagnostic Mode	217
7.3.4	Experiments	218
7.3.5	Remote Monitoring	222
7.3.6	Implementation	225

- 8 Other Engineering Aspects** 231
 - 8.1 Specifications 232
 - 8.2 Selection of Motors and Drives 232
 - 8.3 Selection of Encoders 232
 - 8.4 Control Platform 233
 - 8.4.1 Hardware Architecture 233
 - 8.4.2 Software Development Platform 236
 - 8.4.3 User Interface 236
 - 8.5 Accuracy Assessment 239
 - 8.6 Digital Communication Protocols 241
 - 8.6.1 Fieldbus Protocol Stack 242
 - 8.6.2 Common Fieldbuses 245

- A Laser Calibration Optics, Accessories and Set-up** 253

- References** 261

- Index** 271
