
Contents

1	Introduction and Literature Overview	1
1.1	Introduction	1
1.2	Production Planning in High-tech, High-volume Industry	2
1.3	Strategic and Tactical Level	2
1.4	Operational Models: Optimization and Decision Support	5
1.4.1	Mathematical Approach	7
1.4.2	Queuing and Stochastic Approaches	8
1.4.3	Heuristics and Simulation-based Approaches	8
1.5	Motivation	9
1.6	Book Outline	10
1.7	References	10
2	Game Theory: an Overview	13
2.1	Introduction	13
2.2	Game Setup	14
2.3	Non-cooperative Static Games	15
2.4	Existence of Equilibrium	16
2.5	Multiple Equilibria	17
2.6	Dynamic Games	17
2.7	Simultaneous Moves: Repeated and Stochastic Games	18
2.8	Cooperative Games	18
2.9	N-Person Cooperative Games	19
2.10	Characteristic Function and Imputation	20
2.11	Shapley Value	21
2.12	The Bargaining Game Model	22
2.13	References	23
3	Negotiation: an Overview	25
3.1	Introduction	25
3.2	Negotiation and Rational Self-interested Agents	28
3.3	Negotiation Models	29

3.4	Underlying Principle for Electronic Negotiation.....	30
3.5	Electronic Negotiation Protocols.....	31
3.6	Characteristics that Differentiate Negotiations Protocols.....	31
3.7	Modelling Approaches and Solution Concepts	32
3.7.1	Decision Theory	33
3.7.2	Game Theory	34
3.7.3	Negotiation Analysis	34
3.8	Strategic Negotiation.....	35
3.9	Negotiation Strategies	35
3.10	References.....	36
4	Multiple-agent Systems: an Overview.....	41
4.1	Introduction	41
4.2	Applications	42
4.3	Challenging Issues.....	43
4.4	Individual Agent Reasoning.....	44
4.5	Observable Worlds	45
4.6	Stochastic Transitions and Utilities	45
4.7	Distributed Decision Making	47
4.8	Recognising and Resolving Conflicts.....	48
4.9	Communicating Agents.....	48
4.10	References	49
5	Distributed Production Planning in Reconfigurable Production Networks	51
5.1	Introduction	51
5.2	Production Planning in DPS.....	52
5.2.1	Context of the Semiconductor Industry.....	52
5.2.2	PP in the Considered Industrial Case	54
5.2.3	IDEF0 Architecture	55
5.2.4	Agent Architecture	55
5.3	Top PP Level.....	57
5.4	High PP Level	57
5.5	Medium PP Level.....	58
5.6	Low PP Level	58
5.7	Shop-floor PP Level	59
5.8	References	60
6	Distributed Models for Planning Capacity of Reconfigurable Production Networks at Medium Term.....	63
6.1	Introduction	63
6.2	Initial State	63
6.3	The Centralised Model	64
6.4	The Negotiation Model	65
6.5	The Game-theoretical Model.....	66
6.5.1	Case 1: Characteristic Function $h_{ij} > 0$	67
6.5.2	Case 2: Characteristic Function $h_{ij} < 0$	67

6.5.3 The Bargaining Solution.....	70
6.6 Simulation Case Study	71
6.6.1 The Simulation Environment.....	71
6.6.2 Simulation Case Study	74
6.7 Results	74
6.7.1 Two-way Analysis of Variance.....	75
6.7.2 Design of Experiment (DoE).....	88
6.8 References.....	95
7 Distributed Models for Plant Capacity Allocation.....	97
7.1 Introduction	97
7.2 Initial State	97
7.3 The Centralised Model	98
7.4 The Negotiation Model	99
7.4.1 Generative Function	99
7.4.2 Reactive Function.....	99
7.5 The Game -theoretical Model.....	100
7.6 The Simulation	101
7.6.1 The Simulation Environment.....	101
7.6.2 The Simulation Case Study	104
7.7 Results.....	105
7.7.1 Efficiency Performance Analysis: Two-way ANOVA	105
7.7.2 Efficiency Performance Analysis: DoE.....	115
7.7.3 Distance Performance Analysis: Two-way ANOVA	121
7.7.4 Distance Performance Analysis: DoE	130
7.7.5 Number of Reconfigurations Performance Analysis: Two-way ANOVA	136
7.7.6 Number of Reconfigurations Performance Analysis: DoE.....	147
7.7.7 Absolute Residual Performance Analysis: Two-way ANOVA.....	153
7.7.8 Absolute Residual Performance Analysis: DoE	164
8 Distributed Production Planning Models: an Integrated Approach.....	171
8.1 Introduction	171
8.2 The Simulation Case Study	172
8.3 Results.....	173
8.3.1 Efficiency Performance Analysis: Two-way ANOVA	173
8.3.2 Efficiency Performance Analysis: DoE.....	182
8.3.3 Distance Performance Analysis: Two-way ANOVA	192
8.3.4 Distance Performance Analysis: DoE	200
8.3.5 Absolute Residual Performance Analysis: Two-ways ANOVA ...	209
8.3.6 Absolute Residual Performance Analysis: DoE	214
8.4 Conclusions	223
9 Conclusions.....	225
9.1 Summary	225
9.2 Major Scientific Contributions of This Book	226
9.3 Directions for Future Work	227

Appendix A: Simulation Results Related to Chapter 6	229
Appendix B: Simulation Input Parameters and Results Related to Chapter 7	233
Appendix C: Simulation Input Parameters and Results Related to Chapter 8	247
Index	255

Production Planning in Production Networks

Models for Medium and Short-term Planning

Argoneto, P.; Perrone, G.; Renna, P.; Lo Nigro, G.;

Bruccoleri, M.; Noto La Diega, S.

2008, X, 256 p., Hardcover

ISBN: 978-1-84800-057-5
