
Contents

1	Characterisations of Human Hands	1
1.1	What Has Evolved the Human Hand?	1
1.2	Dexterity in Redundancy of Finger Joints	5
1.3	Bernstein's DOF Problems	8
1.4	Physical Principles Underlying Functionality of the Human Arm and Hand	14
1.5	Difficulty in the Development of Everyday Physics	17
1.6	Newton's Laws of Motion	20
1.7	Kinetic Energy of a System of Particles	25
1.8	Kinematics and Dynamics of a Rigid Body	30
1.9	Variational Principle and Lagrange's Equation	32
2	Stability of Grasping in a Static or Dynamic Sense	41
2.1	Immobilisation of 2-D Objects	42
2.2	Force/Torque Closure	44
2.3	Frictional Grasp of 2-D Objects	48
2.4	Rolling Contact Constraint	50
2.5	Testbed Problems for Dynamically Stable Grasp	54
2.6	Blind Grasping and Robustness Problems	65
2.7	Exponential Convergence to Force/Torque Balance	74
3	Testbed Problems to Control a 2-D Object Through Rolling Contact	81
3.1	Stabilisation of Motion of a 2-D Object Through Rolling Contact	82
3.2	Stability Problems under Redundancy of DOFs	89
3.3	Riemannian Distance and Stability on a Manifold	93
3.4	Exponential Convergence for Stabilisation of Rotational Moments	97
3.5	Dynamic Force/Torque Balance Based upon Morse Theory	102

3.6	Minimum DOF for Dynamic Immobilisation of a 2-D Pivoted Object	107
4	Two-dimensional Grasping by a Pair of Rigid Fingers	115
4.1	Dynamics of the Physical Interaction Between Fingers and an Object	115
4.2	Force/Torque Balance	120
4.3	Control Signals for Grasping in a Blind Manner	126
4.4	Construction of Simulators for Object Grasping and Manipulation	133
4.5	Stability of Blind Grasping	135
4.6	Stability on a Manifold and Transferability to the EP Manifold	145
4.7	Experiments of Blind Grasping	151
5	Three-dimensional Grasping by a Pair of Rigid Fingers	155
5.1	Introduction	156
5.2	Non-holonomic Constraints	157
5.3	Three-dimensional Rolling Contact Constraints	160
5.4	Lagrange's Equation for the Overall Fingers-Object System ..	165
5.5	Physical Meaning of Opposition-based Control Under Rollings	167
5.6	Stability of Blind Grasping under the Circumstances of Weightlessness	171
5.7	Control for Stable Blind Grasping	176
5.8	Numerical Simulation Results	179
5.9	A Mathematical Proof of the Stability of Blind Grasping	184
5.10	Stable Manipulation of a 3-D Rigid Object	189
5.11	Full-DOF Model of 3-D Grasping	191
5.12	Supplementary Results	203
6	Dexterity and Control for Stable Grasping by Soft Fingers	207
6.1	Lumped-Parameterisation of the Behaviours of Soft and Visco-elastic Fingertips	207
6.2	Stabilisation of a 2-D Object by a Single DOF Soft Finger	209
6.3	Stable Grasping of a 2-D Object by Dual Single-DOF Soft Fingers	216
6.4	Convergence to Force/Torque Balance by a Pair of Soft Fingers	227
6.5	Precision Prehension of a 2-D Object under Gravity	237
6.6	Prehension of a 3-D Object by a Pair of Soft Fingers	243
6.7	Dynamics of a Full-Variables Model for 3-D Grasping by Soft Fingers	248

A	Mathematical Supplements	257
B	A Bibliographic Note on the References	259
	References	263
	Index	269

Control Theory of Multi-fingered Hands
A Modelling and Analytical-Mechanics Approach for
Dexterity and Intelligence

Arimoto, S.

2008, IX, 271 p., Hardcover

ISBN: 978-1-84800-062-9
