Preface	vii
List of Figures	xiii
List of Tables	xvii
List of Acronyms	xix
1 Introduction	1
1.1 Motivation	1
1.2 Surgical Education	3
1.2.1 Overview	3
1.2.2 VR-Based Training	4
1.2.3 Surgical Simulation	5
1.3 Training Scene Generation	8
1.4 Outline	10
2 Geometry	13
2.1 Introduction	13
2.1.1 Definitions	13
2.1.2 Relevance to Surgical Education	18
2.1.3 Process Elements	19
2.2 Previous Work Related to Surgical Simulation	20
2.3 Data Acquisition	26
2.3.1 Overview	26
2.3.2 Uterine Image Acquisition	29
2.4 Healthy Anatomy Generation	30
2.4.1 Outline	30
2.4.2 Segmentation	31
2.4.3 Statistical Model	33
2.4.4 Shape Prediction	37

2.5	Pathology Integration	39
2.5.1	Outline	39
2.5.2	Skeleton-Based Design	40
2.5.3	Cellular Automata Growth Model	42
2.5.4	Particle System Growth Model	45
2.6	Volumetric Representation	50
2.7	Modeling Examples	53
3	Appearance	55
3.1	Introduction	55
3.1.1	Definitions	55
3.1.2	Texturing in Computer Graphics	57
3.1.3	Relevance to Surgical Education	58
3.1.4	Process Elements	60
3.2	Previous Approaches in Surgery Simulation	61
3.3	Data Acquisition and Enhancement	64
3.3.1	In Vivo Image Acquisition	64
3.3.2	Image Enhancement	66
3.4	Base Texture Generation	69
3.5	Procedural Textures	70
3.5.1	Review	70
3.5.2	Generation of Simple Textures	72
3.6	Texture Synthesis	73
3.6.1	Human Texture Perception	74
3.6.2	Review	74
3.6.3	Texture Generation for Laparoscopic Simulation	80
3.6.4	Texture Generation for Hysteroscopic Simulation	92
3.7	Additional Texture Detail	97
3.7.1	Embedding of Specks into Liver Textures	98
3.7.2	Overlay of Real Follicle Textures	99
3.8	Texture Mapping	99
3.8.1	Mesh Cutting	101
3.8.2	Mesh Parameterization	105
3.9	Modelling Examples	109
4	Biomechanics	113
4.1	Introduction	113
4.1.1	Deformation Models	113
4.1.2	Tissue Parameter Acquisition	118
4.1.3	Relevance to Surgical Education	120
4.2	Previous Work	121
4.3	Genetic Optimization Approach	122
4.3.1	Outline	122
4.3.2	2D Topology Optimization	123
4.3.3	Extension to 3D Topology Identification	126

4.3.4	Simultaneous Topology and Spring Constant Identification	128
4.4	Analytical Derivation	130
4.4.1	Overview	130
4.4.2	Derivation for Constant Strain Triangle	131
4.4.3	Derivation for Tetrahedral Element	134
4.5	Discussion	137
5	Conclusion	139
5.1	Summary	139
5.2	Hysteroscopy Simulation	141
5.3	Extension: Vessel Generation	142
5.4	Outlook	144
	References	147
	Index	165

Surgical Scene Generation for Virtual Reality-Based
Training in Medicine

Harders, M.

2008, XX, 167 p., Hardcover

ISBN: 978-1-84800-106-0
