1	Introduction and Overview	1
	<i>Glenn Parry and Andrew Graves</i>	
1.1	Drivers and Followers	2
1.2	Defining Build-to-Order	3
1.3	Advantage of Build-to-Order.....	3
1.4	The Road to Build-to-Order	4
1.5	The ILIPT Project.....	6
1.6	Book Structure.....	8
	References.....	10

Part I Industry Dynamics

2	The Evolution of Competition in the Automotive Industry	13
	<i>Matthias Holweg</i>	
2.1	All Competitive Advantage is Temporary	14
2.2	The Past: The Evolution of Production Systems	16
2.3	The Present: Shifts in the Competitive Landscape	20
	2.3.1 Regionalisation	22
	2.3.2 Fragmentation of Markets	24
	2.3.3 Saturation and Overcapacity	25
	2.3.4 Structural Changes in the Supply Chain	26
2.4	The Future: Competing in the Second Automotive Century	28
2.5	What Next?	30
2.6	Conclusion.....	32
	References.....	33

3	Build-to-Order: Impacts, Trends and Open Issues	35
	<i>Andreas Reichhart and Matthias Holweg</i>	
3.1	Introduction	35
3.2	BTO: Where Is the Industry?.....	36
3.3	The Obstacles on the Way to Build-to-Order	38
3.3.1	Organisational Obstacles.....	39
3.3.2	Market-Related Obstacles	42
3.3.3	Supply-Related Obstacles	43
3.4	The Impact of Build-to-Order on the Bottom Line.....	44
3.4.1	The Impact of Build-to-Order on Inventory Levels	45
3.4.2	Product Phase-outs.....	47
3.4.3	The Impact of Build-to-Order on Order Lead Times	48
3.5	Coping Mechanisms	49
3.6	The Way Forward.....	52
	References.....	53
4	Current Issues at OEMs and Suppliers	55
	<i>Alexandra Güttner and Thomas Sommer-Dittrich</i>	
4.1	New Challenges in Product Policy	55
4.2	Increased Pressure from Competitors	58
4.3	Reactions from the European Automotive Industry	61
4.3.1	Product Strategy	61
4.3.2	Modularisation	64
4.3.3	Construction of a Flexible Production Network.....	67
4.4	Conclusion.....	72
	References.....	72
5	Outsourcing: Management and Practice Within the Automotive Industry	75
	<i>Jens K. Roehrich</i>	
5.1	Introduction	75
5.2	Defining the Concept of Outsourcing.....	77
5.3	Approaches to Outsourcing	77
5.3.1	The Resource-Based View – How Can a Company Sustain Its Competitive Advantage in a Dynamic Market Environment?	77
5.3.2	Resource-Dependency Theory – Why Is a Company Dependent on Its External Environment?	79
5.3.3	Transaction Cost Theory – Which Costs to Consider When Making Outsourcing Decisions?.....	79
5.3.4	Industrial Network Approach – Why Should a Company Consider Its Wider Network?	81
5.3.5	Summary of Outsourcing Approaches	81

5.4	The Quest for Competitiveness – Identifying Core and Supporting Activities	83
5.4.1	Outsourcing Supporting Activities in the Automotive Sector	84
5.4.2	The Core Competence Concept in the Automotive Sector	85
5.4.3	Outsourcing Core Activities.....	86
5.5	A Snapshot of Outsourcing Benefits and Risks.....	88
5.5.1	Outsourcing Benefits.....	88
5.5.2	Outsourcing Risks	90
5.6	Managerial Implications for (Beneficial) Outsourcing Decisions.....	93
5.6.1	More Attention Should Be Drawn to the Selection of Outsourced Activities	93
5.6.2	Assessing Future Core Activities Properly	93
5.6.3	Be Careful with Customer-Centric Areas	94
5.6.4	Setting out Clear (Contractual) Guidelines	94
5.6.5	Outsourcing Providers Should Be Selected Carefully	94
5.6.6	Outsourcing Relationships Have to Be Managed.....	94
5.7	Conclusion.....	95
	References.....	96

Part II Modularity

6	An Overview of Modular Car Architecture: the OEMs Perspective on Why and How	101
	<i>Philipp Gneiting and Thomas Sommer-Dittrich</i>	
6.1	Introduction	101
6.2	Internal and External Reasons for Modular Car Architecture	102
6.3	Requirements for the Production and Supply Chain.....	104
6.4	A Possible Approach to the Design of Modular Automobiles.....	106
6.5	Conclusion.....	107
	References.....	107
7	The Modular Body.....	109
	<i>Andreas Untiedt</i>	
7.1	The Idea of Modularity.....	109
7.2	Modularity Concepts	111
7.2.1	DaimlerChrysler Vario Research Car	111
7.2.2	DaimlerChrysler MoCar	112
7.2.3	Fiat Ecobasic.....	113
7.2.4	General Motors Autonomy	115

7.2.5	Ford Skala	116
7.2.6	Fiat Dual Frame	118
7.3	Basic Conditions for Body Design	119
7.3.1	Logistics Requirements	119
7.3.2	Complete Vehicle Structure	119
7.3.3	Assembly Order	120
7.4	ModCar Body Design	120
7.4.1	Scope of Research	120
7.4.2	Combination of Modules	122
7.4.3	Tolerance Compensation	130
7.5	Conclusion	131
	References	131
8	Modular Concepts and the Design of the ModCar Body Shell	133
	<i>Maik Gude and Werner Hufenbach</i>	
8.1	Introduction	133
8.2	Styling Process and Concepts of the ModCar	134
8.3	Technical Engineering of the Outer Panels	138
8.3.1	Choice of Lightweight Materials	138
8.3.2	Partition of the Outer Panels	141
8.3.3	Joining Concepts for Outer Panels	142
8.4	Technical Engineering of the Door Module	144
8.5	Structural Analyses of ModCar Body Shell Components and Structure	146
8.5.1	Deformation Behaviour of the Modular Door	146
8.5.2	Crash Behaviour of the ModCar	147
8.5.3	Stiffness Behaviour of the ModCar	151
8.6	Conclusions	152
	References	153
9	Complexity Cost Management	155
	<i>J. Schaffer and H. Schleich</i>	
9.1	Introduction	155
9.2	Product Variety	157
9.2.1	Product Variety in Lean Manufacturing Environments ...	157
9.2.2	Product Variety in the Automotive Industry	158
9.2.3	Variant-Driven Complexity	158
9.3	The Complexity Cost Model	161
9.3.1	Basic Survey	161
9.3.2	Analysis of the Current State	165
9.4	Conclusion	173
	References	174

Part III Collaboration

10	Key Principles of Flexible Production and Logistics Networks	177
	<i>Bernd Hellingrath</i>	
11	Collaborative Planning Processes.....	181
	<i>Jan-Gregor Fischer and Philipp Gneiting</i>	
11.1	Approaches to Coordinating “Collaborative Planning”	181
11.1.1	Hierarchical Organised Coordination.....	182
11.1.2	Decentralised Coordination.....	183
11.2	Existing Approaches of Collaborative Planning.....	184
11.3	The Architecture of the BTO Production Network.....	185
11.4	The Process of Collaborative Planning.....	188
11.5	The Local Planning Process	191
11.6	Autonomous Behaviour and Collaboration in Supply Networks	192
11.6.1	Agent-Based Collaborative Planning.....	193
11.7	Conclusion.....	206
	References.....	207
12	Collaborative Execution Processes.....	209
	<i>Joerg Mandel</i>	
12.1	The Current Situation in the Automotive Industry	210
12.2	The Role of the BTO/BTS Border in a Pure BTO Manufacturing System.....	210
12.3	Order Management for a Pure BTO Manufacturing Environment.....	211
12.3.1	Order Types	211
12.3.2	Order Management	212
12.3.3	Order Entry	213
12.3.4	Assembly Scheduling.....	215
12.3.5	Call-Off to the BTO Suppliers	216
12.3.6	Replenishment of BTS Parts and Materials	217
12.4	Exception Handling	217
12.5	Execution Prototype	219
12.6	Module Deployment and the Software Required.....	219
12.7	Conclusion.....	220
	References.....	221
13	Functionalities of Supporting IT Systems: Current Situation, Future Requirements and Innovative Approaches	223
	<i>Jan-Gregor Fischer, Markus Witthaut, Michael Berger</i>	
13.1	Process Requirements of Information Technology.....	223
13.2	Capabilities of Current IT Systems.....	225
13.3	Distributed Information Management	226

13.4	Interoperability Framework	227
13.4.1	Application Interoperability	228
13.4.2	Service Interoperability	229
13.4.3	Data Interoperability	230
13.4.4	Infrastructure Interoperability	231
13.5	Modelling Data and Semantics	231
13.5.1	Structure Ontology	232
13.5.2	Planning Ontology	233
13.5.3	Execution Ontology	234
13.6	Systems Architecture	235
13.7	Concluding Remarks on IT Functionality	236
	References	237
14	Modelled Scenario Examples for Planning and Execution	
	Processes	239
	<i>Stefanie Ost and Joerg Mandel</i>	
14.1	Basic Structure for the BTO Demonstrator Model	239
14.2	Scenario Examples for the Collaborative Planning Process	242
14.2.1	Collaborative Planning – Scenario 1	243
14.2.2	Collaborative Planning – Scenario 2	244
14.2.3	Collaborative Planning – Scenario 3	246
14.3	Scenario Examples for the Collaborative Execution Process	247
14.3.1	Execution Planning – Scenario 1	250
14.3.2	Execution Planning – Scenario 2	251
14.3.3	Execution Planning – Scenario 3	252
14.4	Conclusion	254
 Part IV Validation		
15	A BTO Reference Model for High-Level Supply Chain Design	257
	<i>Katja Klingebiel</i>	
15.1	Introduction: Motivation and Objectives for a Build-to-Order Reference Model	257
15.2	The Idea Behind a Build-to-Order Reference Model	259
15.3	A Classification Framework for Automotive Build-to-Order Concepts	261
15.4	A BTO Target System	262
15.5	BTO-Related Problem Areas and Associated Fields of Action	263
15.5.1	Process Flexibility	264
15.5.2	Process Stabilisation	265
15.5.3	Process Standardisation	265
15.5.4	Process Acceleration	265
15.5.5	Process Transparency	266

15.5.6	Process Synchronisation	267
15.5.7	Failure Prevention and Reaction	267
15.5.8	Summary and Conclusion	267
15.6	An Integration Framework for BTO Concepts	270
15.7	Supply Chain Design Procedure Model	272
15.7.1	Model Design	273
15.7.2	Data Acquisition and Preparation	273
15.7.3	Modelling and Verification	274
15.7.4	Computation and Simulation	274
15.7.5	Analysis	274
15.7.6	Documentation	275
15.8	Summary and Outlook	275
	References	275
16	Rapid Supply Chain Design by Integrating Modelling Methods	277
	<i>Thomas Seidel</i>	
16.1	Introduction	277
16.1.1	The Challenge at Hand	277
16.1.2	Goal	278
16.2	Supply Chain Design	279
16.2.1	Framework Conditions of Supply Chain Design	279
16.2.2	Defining Supply Chain Design	280
16.2.3	Requirements for the Supply Chain Design Process	281
16.3	Modelling and Evaluating Value Creation Networks	283
16.3.1	Modelling	283
16.3.2	Modelling Methods in Supply Chain Design	283
16.3.3	Assessing the Modelling Methods	287
16.4	An Integrated Method for Supply Chain Design	289
16.4.1	Supply Chain Design Process for the Integrated Method	290
16.4.2	Implementing the Integrated Method	291
16.5	Application Cases	292
16.5.1	Global Networks Facing Increased Market Demand	292
16.5.2	Product Design for Logistics	293
16.5.3	Strategic Network Design for Future Automotive Production	293
16.6	Conclusion	294
	References	294
17	Moving Towards BTO – An Engine Case Study	297

Part V Implementation

20	Automotive e-hubs: Exploring Motivations and Barriers to Collaboration and Interaction.....	337
	<i>Mickey Howard, Richard Vidgen and Philip Powell</i>	
20.1	Introduction	337

20.2	Reviewing the e-hub: Theory and Practice.....	338
20.2.1	e-hub Classification.....	338
20.2.2	Current State of the Automotive Market.....	340
20.2.3	Motivations and Barriers.....	342
20.3	Approach to Developing the Framework.....	345
20.4	Automotive Case Analysis	346
20.4.1	Case 1: “Motorco”	346
20.4.2	Case 2: “Carco”	347
20.4.3	Case 3: “Partco”	349
20.4.4	Case 4: “Lampco”	350
20.5	Discussion: Revisiting the Framework.....	353
20.6	Contribution to Theory and Practice.....	356
20.7	Conclusion.....	357
	References.....	358
21	Automotive Supplier Park Strategies Supporting Build-to-Order.....	361
	<i>Joe Miemczyk and Mickey Howard</i>	
21.1	Introduction	361
21.2	Background	362
21.2.1	The Objectives of Build-to-Order	362
21.2.2	What Are Supplier Parks?.....	363
21.2.3	Motivations for Supplier Parks	364
21.2.4	Other Factors That Affect Supplier Parks	365
21.3	Data Collection.....	368
21.4	The Reality of Automotive Supplier Parks.....	369
21.4.1	Supplier Park Descriptions.....	370
21.5	Discussion	373
21.5.1	Supplier Parks That Enable BTO	375
21.5.2	Supplier Parks with the Potential to Enable BTO	375
21.5.3	Supplier Parks That Do Not Enable BTO	376
21.5.4	Supplier Parks: Imperative for Build-to-Order?.....	377
21.6	Conclusions	377
	References.....	379
22	Managing the Transition to the “5-Day Car” in Europe.....	383
	<i>Gareth Stone, Valerie Crute and Andrew Graves</i>	
22.1	Introduction	383
22.2	Why Build-to-Order?.....	384
22.3	The Demand for Build-to-Order.....	387
22.4	Supply Chain Readiness	388
22.5	Resistance to Change.....	388
22.6	Company Ownership and Overcapacity as Potential Barriers.....	389
22.7	The Industry Executives’ Perspective	390
22.8	Consultation Findings.....	390
22.9	Enablers to Effective Transition	392

22.10 Building on Existing Good Practice in BTO	393
22.11 Training and Education	393
22.12 Clear Planning and Objective Setting	394
22.13 Aligning Key Performance Indicators	395
22.14 Enhancing Supply Chain Learning	396
22.15 Communication and Benchmarking Progress	397
22.16 Conclusion	397
