
Contents

1	An Overview	1
1.1	Introduction	1
1.2	Product Properties and Perspectives	3
1.2.1	Product Properties: Attributes and Characteristics	4
1.2.2	Consumer Perspective	4
1.2.3	Manufacturer’s Perspective	5
1.3	Product Reliability	5
1.3.1	Definition of Reliability	5
1.3.2	Consequences of Failures	6
1.4	Product Life Cycle	7
1.5	Product Performance and Specification	7
1.5.1	Product Performance	7
1.5.2	Product Specification	8
1.5.3	Performance–Specification Relationships	8
1.6	Reliability Performance and Specification	8
1.6.1	Methodology for Reliability Performance and Specification	9
1.6.2	Systems Approach	9
1.7	Objectives of the Book	10
1.7.1	Case 1 [Cellular Phone]	10
1.7.2	Case 2 [Safety Instrumented System]	11
1.8	Outline of the Book	12
2	New Product Development	15
2.1	Introduction	15
2.2	Products	15
2.2.1	Product Classification	16
2.2.2	“Newness” of a New Product	18
2.2.3	Product Decomposition	19
2.3	Product Life and Product Life Cycles	21
2.3.1	Product Life	21
2.3.2	Product Life Cycle	21

- 2.4 New Product Development 22
 - 2.4.1 New Product Development in the Overall Business Context 22
 - 2.4.2 A Brief Review of New Product Development Models 23
- 2.5 Product Life Cycle Phases: Basic Concepts and Activities 24
 - 2.5.1 Front-end 24
 - 2.5.2 Design 29
 - 2.5.3 Development 31
 - 2.5.4 Production 32
 - 2.5.5 Post-production 33
- 2.6 A New Model for Product Performance and Specification 34
- 3 Product Performance and Specification 37**
 - 3.1 Introduction 37
 - 3.2 Requirements, Preferences and Constraints 37
 - 3.2.1 Requirements 37
 - 3.2.2 Preferences 38
 - 3.2.3 Constraints 39
 - 3.3 Product Performance 39
 - 3.3.1 Concept and Notions 39
 - 3.3.2 Types of Performance 40
 - 3.4 Product Specification 42
 - 3.5 Performance and Specification Relationships 43
 - 3.6 Performance and Specification in Stage I 44
 - 3.6.1 Phase 1 44
 - 3.6.2 Phase 2 46
 - 3.6.3 Phase 3 46
 - 3.6.4 Some Comments 48
 - 3.7 Performance in Stage II 49
 - 3.7.1 Phase 4 49
 - 3.7.2 Phase 5 50
 - 3.8 Performance in Stage III 50
 - 3.8.1 Phase 6 51
 - 3.8.2 Phase 7 51
 - 3.8.3 Phase 8 52
 - 3.9 Overall Process 52
 - 3.10 Reliability Performance and Specification 53
- 4 An Introduction to Reliability Theory 55**
 - 4.1 Introduction 55
 - 4.2 Basic Concepts 56
 - 4.2.1 Product Functions 56
 - 4.2.2 Failure and Related Concepts 56
 - 4.2.3 Different Notions of Product Reliability 60
 - 4.3 Reliability Science 61
 - 4.4 Reliability Modelling – I 61

4.4.1	Reliability Modelling of Single Items	61
4.4.2	Physical Modelling	66
4.4.3	System Modelling	67
4.4.4	Modelling Environmental Effects	70
4.5	Reliability Modelling – II	73
4.5.1	Modelling CM Actions	73
4.5.2	Modelling PM Actions	74
4.5.3	Other Approaches	77
4.6	Reliability Analysis	77
4.6.1	Qualitative Analysis	77
4.6.2	Quantitative Analysis	79
4.6.3	Simulation	82
4.7	Reliability Engineering	82
4.7.1	Reliability Allocation	82
4.7.2	Reliability Improvement	83
4.7.3	Root Cause Analysis	85
4.8	Reliability Prediction and Assessment	85
4.8.1	Reliability Prediction	85
4.8.2	Reliability Assessment	86
4.9	Reliability Management	87
4.9.1	Costs	87
4.9.2	Data for Effective Management	87
4.10	Case Study: Cellular Phone	88
5	Performance and Specification in the Front-end Phase	91
5.1	Introduction	91
5.2	Front-end Process for Standard Products	91
5.3	Data Collection and Analysis [Sub-phase 1]	93
5.3.1	Data Collection	93
5.3.2	Data Analysis	94
5.3.3	Outcome of Sub-phase 1	95
5.4	Idea Generation and Screening [Sub-phase 2]	96
5.4.1	Customer Understanding	96
5.4.2	Idea Generation	97
5.4.3	Screening of Ideas	98
5.4.4	Outcome of Sub-phase 2	99
5.5	Product Concept Formulation and Evaluation [Sub-phase 3]	99
5.5.1	Defining DP-I	99
5.5.2	Deriving SP-I	103
5.5.3	Evaluating PP-I	104
5.5.4	Models	105
5.5.5	Outcome of Sub-phase 3	110
5.6	Specialized (Custom-built) Products	110
5.6.1	Performance Requirement	110
5.6.2	Contract	112

5.6.3	Reliability Improvement Warranty	113
5.6.4	Idea Generation and Screening	114
5.6.5	DP-I	114
5.6.6	SP-I	115
5.6.7	PP-I	117
5.6.8	Outcome of Phase 1	117
5.7	Implications for Product Reliability	118
5.8	Case Study: Cellular Phone	118
6	Performance and Specification during Design	121
6.1	Introduction	121
6.2	Phase 2 for Standard Products	121
6.2.1	Defining DP-II	122
6.2.2	Deriving SP-II	123
6.2.3	Evaluating PP-II	126
6.3	Phase 2 for Custom-built Products	127
6.4	Models	128
6.5	An Illustrative Case	129
6.5.1	Option 1 [No Product Variety: Single Design]	129
6.5.2	Option 2 [Product Variety: Two Designs]	132
6.6	Phase 3 for Standard and Custom-built Products	133
6.6.1	Sub-phase 1	134
6.6.2	Sub-phase j [$j = 2, 3, \dots, J - 1$]	136
6.7	Achieving the Allocated Reliability at Component Level	137
6.7.1	Redundancy	139
6.7.2	Preventive Maintenance	140
6.7.3	Reliability Growth through Development	140
6.7.4	Modelling for Optimal Decisions	141
6.8	Outcome of Phase 3	143
6.9	Case Study: Cellular Phone	143
7	Performance During Development	147
7.1	Introduction	147
7.2	Phase 4 for Standard Products	148
7.3	Reliability Development Testing	149
7.3.1	Reliability Growth Testing	149
7.3.2	Environmental Stress and Design Limit Testing	150
7.3.3	Accelerated Testing	150
7.4	Design of Experiments for Testing	154
7.4.1	Principles of Test Design	154
7.4.2	Relevant Issues	155
7.4.3	Optimal Design of Experiments for Testing	155
7.5	Analysis of Test Data	156
7.5.1	Test Data	156
7.5.2	Qualitative (Engineering) Analysis	156

7.5.3	Graphical Analysis	157
7.5.4	Statistical Analysis (Single Stress Level)	158
7.5.5	Statistical Analysis (Multiple Stress Levels)	164
7.6	Reliability Growth Models	165
7.6.1	Discrete Reliability Growth Models	166
7.6.2	Continuous Reliability Growth Models	166
7.7	Bayesian Approach	167
7.8	Risks in Reliability Development Programmes	168
7.9	Phase 5 for Standard Products	169
7.10	Phases 4 and 5 for Custom-built Products	169
7.11	Case Study: Cellular Phone	170
8	Product Performance and Production	173
8.1	Introduction	173
8.2	Phase 6 for Standard Products	174
8.3	Production Process and Occurrence of Non-conforming Items	175
8.3.1	Modelling Occurrence of Non-conforming Items	176
8.4	Effect of Quality Variations on Reliability Performance	177
8.4.1	Variation in Component Quality	178
8.4.2	Variations in Assembly Operations	179
8.4.3	Combined Effects of Non-conformance	179
8.5	Testing During Production	179
8.6	Quality Control	180
8.6.1	Off-line Control of Production Process	181
8.6.2	On-line Control of Production Process	181
8.6.3	Weeding Out Non-conforming Components	184
8.6.4	Acceptance Sampling	185
8.6.5	Sub-set Selection	186
8.6.6	Burn-in	186
8.7	Optimal Quality Control Effort	187
8.8	Case Study: Cellular Phone	187
9	Post-sale Performance	191
9.1	Introduction	191
9.2	Phase 7 for Standard Products	191
9.2.1	Field Performance	192
9.2.2	Decision Process in Phase 7	193
9.2.3	Data Collection	193
9.2.4	Analysis of Data and Estimating AP-II	195
9.2.5	Root Cause Analysis	202
9.3	Assessing Inherent and Design Reliability	204
9.4	Phase 8 for Standard Products	204
9.4.1	Decision Process in Phase 8	204
9.4.2	Data Collection	205
9.4.3	Analysis of Data and Estimating AP-I	206

- 9.4.4 Root Cause Analysis 206
 - 9.5 Phases 7 and 8 for Custom-Built Products 209
 - 9.5.1 Phase 7..... 209
 - 9.5.2 Phase 8..... 210
 - 9.6 Case Study: Cellular Phone 210
- 10 Product Safety Requirements 211**
 - 10.1 Introduction 211
 - 10.2 Safety Requirements 212
 - 10.2.1 Examples of Safety Requirements 212
 - 10.2.2 Essential Health and Safety Requirements 216
 - 10.3 EU Directives..... 217
 - 10.3.1 New Approach Directives 217
 - 10.3.2 The Machinery Directive 218
 - 10.3.3 The General Product Safety Directive 218
 - 10.3.4 CE Marking..... 219
 - 10.3.5 Harmonized Standards 220
 - 10.4 Risk Assessment 221
 - 10.5 Technical Construction File 223
 - 10.6 Case Study: Cellular Phone 224
- 11 Reliability Management System 227**
 - 11.1 Introduction 227
 - 11.2 Data, Information, and Knowledge (DIK) 227
 - 11.2.1 Data and Information 227
 - 11.2.2 Knowledge 228
 - 11.2.3 Engineering Knowledge 231
 - 11.2.4 Role and Importance of DIK 231
 - 11.3 DIK in Phase 1..... 232
 - 11.3.1 Data and Information 233
 - 11.3.2 Knowledge 233
 - 11.4 DIK in Phases 2 and 3..... 233
 - 11.4.1 Data and Information 234
 - 11.4.2 Engineering Knowledge 234
 - 11.5 DIK in Phases 4 and 5..... 235
 - 11.5.1 Data and Information 236
 - 11.5.2 Knowledge 236
 - 11.6 DIK in Phases 6–8..... 236
 - 11.6.1 Data and Information 236
 - 11.6.2 Knowledge 237
 - 11.7 Reliability Management System 237
 - 11.7.1 Structure of the Reliability Management System 238
 - 11.7.2 Data and Information Module 238
 - 11.7.3 Reliability Databases 244
 - 11.7.4 Knowledge Module 244

11.7.5 Interface Module	247
11.8 Implementation Aspects	248
11.8.1 Reliability Manager	248
11.8.2 Reliability Management Department	249
