

Contents

1 Immunology

Historical Milestones	1
The Immune System	1
Systems of Immunity	2
Organs and Cells of the Immune System	4
Cells of the Immune System	9
Two Families of Lymphocytes	9
Structure and Molecular Framework	25
T and B Cell Receptors	56
T-Cell Antigen Receptors	57
B-Cell Antigen Receptors	59
Immunogens, Antigens and Allergens	60
Epitopes and Paratopes	61
Antibodies	64
Idiotypes and Anti-idiotypes	67
The HLA System	74
Initial Phase of the Immune Response	79
Functions of HLA Molecules and Antigen Processing	79
Cells of the Immune System Participating in Immune Responses	82
Additional Cells	97
Afferent Phase of Immune Response	99
Antigen Processing and Presentation	99
Lymphocyte Activation	103
Role of T Lymphocytes	104
Role of B Lymphocytes	106
Expression of Genes and Transcriptional Activity	107
Signal Transduction	109
Mean Values of Lymphocyte Populations and Subpopulations	111
Central Phase of the Immune Response: Synthesis of IgE Antibodies	116
A Two-Signal Model for Induction of IgE Synthesis	116
Immune Responses	123
Immediate and Delayed Reactions	123
Hypersensitivity Reactions	124
Mediators	129
Primary Mediators	130
Secondary Mediators	133

Mechanisms of Cell Adhesion:

Interleukins and Adhesion Molecules	133
Mechanisms of Cellular Adhesion	135
Integrins	136
Selectins	138
Relationships Between ILs and Adhesion Molecules	140
Chemokines	140
Leukocyte Trafficking and Migration	148
Interrelations with Other Organs	151
Innate Immunity	152
Therapeutic Perspectives	171
Allergens	174
Allergen Standardization	175
Standardization Techniques	175
Transgenic Foods	182
Allergen Characteristics	183
References	202

2 Fetal and Neonatal Immunology and the Mucosal Immune System

Immunodeficiency and Immaturity	221
Fetal–Neonatal Immune System: Immunocompetence or Immune Depression?	222
Ontogeny of the Immune System	225
T Cells	229
B Cells	231
Phagocyte Cells	233
Complement Factors	233
Neonatal Immunodeficiency	234
Cellular Immunity	234
Humoral Immunity	236
Innate Immunity	237
Mucosal Immune System	238
Immune Components of the Intestinal Mucosa	239
Nutrition and Absorption of Antigenic Macromolecules	247
Immunology of Breast Milk	248
Immunology of Colostrum	254
Experimental Studies on Neonatal Tolerance and/or Immunocompetence	258
Local Immunity in the Respiratory Mucosa	259
Local Immunity in the Skin	261
Pediatricians and Neonates	262
References	262

3 Neonatal Immunology:

The Neonate at Risk of Atopy

The Neonate at Risk: Predisposing Factors	269
Supplementary Feeding in Maternity Wards . .	270
Prenatal Sensitization	270
Methods of Predicting the Development of Allergic Disease	272
Alternative Tests to CBIgE Determination . . .	272
Pediatricians and Neonates at Risk	280
References	281

4 Genetic and Environmental Predisposing Factors

Genes and Atopy	285
Genetics of Atopy	285
Genome-Wide Screens	288
Candidate Genes for Asthma and Atopy	288
Other Regions of Interest	294
Genetics of Pediatric Atopic Disease	297
Prenatal Genetic Factors and the Fetal Immune System	306
Postnatal Genetic Factors and Related Influence .	307
Environmental Factors	309
Residential Influences	311
Aeroallergens	313
Environmental Pollutants	321
Immunotoxicology	327
Environmental Tobacco Smoke	335
Hygiene Hypothesis	346
Interactions Between Genetic and Environmental Factors	347
Pediatricians, Genotype, Phenotype and Early Predisposing Factors	347
References	349

5 Epidemiology and Natural History of Atopic Disease

Epidemiology	363
Lack of Uniformity of Diagnostic Parameters . .	363
Age at Onset	365
Atopic March	366
Atopic Dermatitis	373
Oral Allergic Syndrome	380
Urticaria and Angioedema	380
Allergic Contact Dermatitis	380
Food Allergy	381
Asthma	384
Allergy to Inhalants	399
Allergic Rhinitis	402
Allergic Conjunctivitis	408
Insect Allergy	408

Prevalence of Atopic Disease at Various Ages . . .	408
Prevalence of Immunodeficiencies	409
Pediatricians and Epidemiology	409
References	410

6 Diagnosis of Pediatric Allergy

From History to Clinical-Functional Examination	421
Allergy History	422
Family Allergy History	422
Personal Allergy History	422
Past and Present Allergy History	423
Present Allergy History for Atopic Dermatitis and Food Allergy	423
Present Allergy History for Urticaria and Angioedema and Additional Skin Allergies	424
Present Allergy History for Asthma Rhinoconjunctivitis	424
Environmental History	424
Medical Examination	425
Diagnosis Type	430
Immunoallergic Diagnosis	431
In vivo Immunoallergic Tests	431
Skin Prick Tests	431
Prick + Prick Testing	436
Patch Test or Epicutaneous Test	438
Photopatch Testing	439
In vitro Immunoallergic Tests	439
Total Serum IgE	439
Specific IgE Antibody Determination	441
Prerequisites, Advantages and Disadvantages of Diagnostic Tests	445
Advantages and Disadvantages of In vivo Tests	446
Advantages and Disadvantages of In vitro Tests	447
Future Diagnostic Avenues	451
Recombinant Allergens	451
CD203c	451
Provocation Tests	452
Conjunctival Testing	452
Nasal Testing	452
Bronchial Provocation Testing	453
Overall Evaluation of Provocation Tests	455
Conjunctival Provocation Test	455
Nasal Provocation Test	455
Bronchial Provocation Test	456
Additional Tests	456
Pulmonary Function Testing	457
Peak Expiratory Flow Rate	457
Spirometry	462
Pulmonary Function Tests in Children Under 12 Months to 6-7 Years . . .	464
Medicolegal Aspects of Immunoallergic Testing .	466
Pediatricians and Diagnostic Whereabouts . .	467
References	467

7 Atopic Dermatitis

The First Clinical Manifestation of Atopy	473
Skin Immunopathophysiology	474
The Role of Skin Surface Barrier	474
Skin Immune System	475
Relationships Between Skin and Immune System	475
Pathogenesis	479
Genetics	479
Immune Dysfunctions	481
Cell-Mediated Immunity	481
Humoral Immunity: Role of IgE Antibodies	483
Role of T Lymphocytes	487
Langerhans Cells	490
Interleukins and AD	491
IgE and Histamine-Releasing Factors	492
A Concluding Pathogenic Hypothesis	493
Biochemical Dysfunctions	493
Additional Biochemical or Pharmacophysiological Anomalies	495
Additional Pathogenic Factors	495
Role of Infections	495
Role of Food Factors	497
Role of Food Additives	497
Role of Aeroallergens	497
Pathophysiology of Itching	499
Irritant Effects	500
Clinical Presentation	500
Additional Clinical Features	502
Complications	506
Additional Complications	507
Association with Other Atopic Diseases	507
Association with Nonatopic Diseases	508
Diagnosis	508
Differential Diagnosis	509
Management	512
General and Local Hygienic and Preventive Measures: Acute Phase	512
Local Aspecific Cutaneous Treatment	515
Medical Treatment	516
Specific Antiallergic Measures	521
Additional Measures to Be Suggested to Parents	521
Antiasthmatic Measures	522
Relationships Between AD and FA	522
Epidemiology	523
Pathophysiology	523
Pathogenesis	523
Experimental Studies	523
Clinical Studies	524
Clinical Presentation	525
Diagnosis	526
Treatment	527
Course and Prognosis	527
Pediatricians and AD	529
References	529

8 Other Allergic Skin Disorders

A Skin Panorama	539
Urticaria-Angioedema Syndrome	539
Etiopathogenesis	540
Pathogenesis of Hereditary Angioedema	544
Pathogenesis of Urticaria	545
Clinical Presentation	547
Physical Urticaria	548
Diagnosis	553
Treatment	557
Prevention	558
Allergic Contact Dermatitis	558
Etiopathogenesis	559
Etiological Agents	561
Clinical Presentation	567
Types of ACD	567
Diagnosis	571
Treatment	574
Protein Contact Dermatitis	576
Phyto dermatitis	577
Allergic Photodermatitis	577
Contact Dermatitis by Seawater Organisms	579
Allergic Vasculitis	580
Immunopathogenesis	581
Clinical Presentation	582
Prominent Vasculitis Syndromes in Children	583
Diagnosis	587
Treatment	588
Pediatricians and Other Cutaneous Allergies	588
References	589

9 Food Allergy

One Allergy, Several Allergies	595
Pathogenesis	596
Immune Mechanisms	596
In Utero Sensitization	600
Postnatal Sensitization	601
Immunology of the Gastrointestinal Tract	602
GALT Regulation of Effector Functions	609
Oral Tolerance: Experimental Data	611
Oral Tolerance: Factors that Condition Its Induction and Maintenance	613
Cow's Milk Allergy	616
Clinical Manifestations	616
Systemic Manifestations	618
Gastrointestinal Manifestations	619
Respiratory Manifestations	622
Other Food-Induced Manifestations	622
Allergy to Other Foods	625
Allergy to Single Foods	625
Diagnosis	636
Diagnostic Elimination Diets	637
Food Challenge Test	640
Challenge Procedure	640

Evaluation of Food Challenge Testing	644	Treatment	812
Dietary Treatment	647	Treatment of Acute Asthma Attack	812
Allergy to Single Foods	663	Treatment of Status Asthmaticus	814
Diet Duration	669	Treatment of Episodic, Frequent, Chronic and Other Forms of Asthma	822
Prevention of FA	670	Death by Asthma	838
Medical Treatment	671	Prevention	842
Acquisition of Oral Tolerance	671	Preventive Therapy	842
FA-Caused Death	678	Outcome	847
Oral Allergy Syndrome	679	Present and Future Prospects	848
Bird-Egg Syndrome	682	Anti-IgE	848
Pediatricians and FA	682	Leukotriene Modifiers	848
References	682	Other Pediatric Allergic Lung Disease	850
10 Pseudoallergy and Food Immunotoxicology		Extrinsic Allergic Alveolitis	850
Allergy and Pseudoallergy	697	Allergic Bronchopulmonary Aspergillosis	851
Pseudoallergy to Food Additives	699	Pediatricians and Pediatric Asthma	853
Pharmacological Reactions	710	References	853
Enzymatic Reactions	714	12 Allergic Rhinitis	
Metabolic Reactions	715	The Airway Entrance	875
Toxic Reactions	715	Nasal Immunology	878
Anaphylactoid Reactions	718	Immunopathology	879
Immunotoxicology	718	Etiological Factors	886
Food Immunotoxicology	720	Anatomical–Physiological Factors	
Pediatricians, Pseudoallergy, and Immunotoxicology	721	Differentiating Children from Adults	889
References	721	Classification	889
11 Asthma		Seasonal Allergic Rhinitis	889
Pediatric Asthma	725	Perennial Allergic Rhinitis	894
Defense Mechanisms in the Airways	727	Treatment	897
Genetic Factors	729	Identification and Elimination of Principal Allergens	897
Pathogenesis	732	Antihistamines	897
Role of Immune Inflammation	732	Anticholinergics	901
Role of the Inflammatory Cells	737	Cromones	901
The Role of IgE	749	Corticosteroids	901
Role of the Mediators	750	Anti-LT	903
Role of Cytokines	751	Specific Immunotherapy	903
Airway Remodeling	752	Prevention	903
Role of Bronchial Hyperreactivity	756	Quality of Life	903
Endogenous Factors	757	Pediatricians and Allergic Rhinitis	905
Main Exogenous Factors	765	References	905
Predisposing Factors	765	13 Specific Immunotherapy	
Anatomical and Physiological Predisposing Factors	765	Specific Therapy for Pediatric Asthma and Rhinitis	911
Predisposing or Etiological Factors	767	SIT Efficacy: Clinical Effects	916
Drugs to Be Used and Routes of Administration	772	SIT Efficacy: Immunological Effects	920
Routes of Administration	772	Considerations Before Initiating SIT	927
Age Ranges for Inhalant Therapy	777	General Criteria of SIT Execution	927
Dosages for the Very Young	778	Treatment Chronology	929
Drugs to Be Used	778	Adverse Reactions	932
Bronchiolitis	793	Treatment of Local and Systemic Reactions	935
Asthma	802	Comparison Between SIT and Pharmacotherapy	937
Clinical Presentation	805		
Diagnosis	805		
Severe Asthmatic Attack – Status Asthmaticus	808		

Present and Future Perspectives	938
Present Perspectives	939
Comparison of Traditional (SC) SIT and Other Routes	943
Future Perspectives	943
Long-Term Perspectives	950
Pediatricians and SIT	951

14 Eye Allergy and Immunology

Eye Disorders	961
Pathophysiology	961
Ocular Immunology	962
Conjunctiva-Associated Lymphoid Tissue	962
Immune Functions	966
Allergic Conjunctivitis	968
Vernal Keratoconjunctivitis	972
Atopic Keratoconjunctivitis	977
Giant Papillary Conjunctivitis	978
Ocular Contact Allergy	980
Acute Edematous Conjunctivitis	981
Blepharitis	981
Keratitis	981
Uveitis	982
New Therapeutic Perspectives	984
Pediatricians and Eye Allergy	985
References	985

15 Other Allergic Otorhinolaryngological Diseases

Von Waldeyer's Ring	991
Nasal-Associated Lymphoid Tissue	991
Tonsil Immunology	993
Otitis Media with Effusion	998
Immunopathology	1000
Pathogenesis	1002
Clinical Presentation	1005
Diagnosis	1006
Treatment	1007
Sinusitis	1009
Pathophysiology	1010
Allergic Sinusitis	1014
Relationship Between Asthma, Allergic Rhinitis, and Sinusitis	1015
Clinical Presentation	1016
Diagnosis	1017
Treatment	1019
Pediatricians and ORL Diseases	1021
References	1021

16 Allergy and Central Nervous System and Other Allergies

Introduction	1029
Migraine and Allergy	1029
Psychological and Neurological Factors and Allergic Disease	1033
Chronic Fatigue Syndrome	1037
Clinical Presentation of Other Systems	1042
Clinical Ecology	1046
Pediatricians, Migraine, and Other Allergies	1048
References	1049

17 Allergy to the Venom of Hymenoptera and Other Insects

Historical Data	1055
Characteristics of Hymenoptera	1056
Genetic and Environmental Factors	1060
Etiopathogenesis	1062
Clinical Presentation	1062
Diagnosis	1064
Treatment	1066
Biting Insect Allergy	1068
Prevention	1070
Pediatricians and Insect Allergy	1070
References	1071

18 Autoimmune Diseases

Dysregulation of the Immune System	1075
Etiopathogenesis	1077
Etiopathogenetic Mechanisms	1079
Juvenile Rheumatoid Arthritis	1085
Etiopathogenesis	1085
Drugs of Tomorrow	1099
Inflammatory Bowel Disease	1100
Etiopathogenesis	1102
Ulcerative Colitis	1105
Crohn's Disease	1105
Autoimmune Hematological Disorders	1110
Autoimmune Lymphoproliferative Syndrome	1110
Autoimmune Neutropenia	1110
Diabetes	1111
Systemic AIDs	1117
Systemic Lupus Erythematosus	1117
Juvenile Dermatomyositis	1124
Juvenile Scleroderma	1127
Pediatricians and Autoimmune Diseases	1131
References	1131

19 Allergic and Pseudoallergic Reactions to Drugs

Pediatric Drug-Induced Disorders	1147
Etiopathogenesis	1148
Predisposing Factors	1155
Clinical Presentation	1158
Clinical Features	1159
Additional Drug-Induced	
Reactive Syndromes	1182
Characterization of Various Drugs	
and Categories of Drugs	1184
Uncommon Reactions to Drugs	1190
Diagnosis	1190
Skin Test Indications and Application	1194
Challenge Testing	1196
Treatment	1196
Drug-Related Deaths	1197
Prevention	1197
Pediatricians and Drug-Induced Allergies	
and Pseudoallergies	1197
References	1198

20 Anaphylaxis

Historical Outline	1205
Physiopathology	1206
Histopathology	1207
Pathogenesis	1207
Risk Factors	1210
Anaphylactoid Reactions	1221
Others	1221
Clinical Presentation	1222
Diagnosis	1225
Immediate Treatment	1228
Pediatricians and Anaphylaxis	1236
References	1236

21 Malnutrition and the Immune System

Immunological Effects of Child Malnutrition	1243
Protein-Energy Malnutrition	1244
Micronutrient Deficiency	1249
Vitamin Deficiency	1249
Trace Element Deficiency	1251
Essential Fatty Acid Deficiency or Excess	1253
Other Causes of Malnutrition	1255
Immunological Effects	
of Neonatal Malnutrition	1257
Clinical Presentation	1259
Diagnosis	1260
Treatment	1260
Pediatricians, Malnutrition, and the Immune	
System	1261
References	1261

22 Primary Immunodeficiencies

A World in Motion	1265
Immunodeficiency and Atopy	1265
Immunodeficiencies Associated with Hyper-IgE	1269
Immunodeficiency with Autoimmunity	1270
Primary Immunodeficiencies	1270
Predominantly B-Cell Immunodeficiency	1276
X-Linked Agammaglobulinemia	
or Bruton Tyrosine Kinase Deficiency	1276
Gene Deletion for H Chains	1277
κ and λ Chain Deficiency	1277
Selective Ig Deficiency	1279
Selective Antibody Deficiency	
with Normal Ig Isotypes	1281
Selective Deficiency of Other Igs	1281
Common Variable ID	1281
Not-X-Linked Hyper-IgM	1282
Transient Hypogammaglobulinemia	
of Infancy	1282
Combined T-Cell and B-Cell Deficiency	1283
T-B ⁺ SCID	1283
IL-7R Deficiency	1286
T-B ⁻ SCID	1286
T ⁺ B ⁻ SCID	1289
IL ₂ Deficiency (IL ₂ Rα-Chain Gene Mutations)	1290
X-Linked Hyper-IgM (or Hyper-IgD)	
or CD154 Deficiency Syndrome (XHlgMS)	1290
Purine-Nucleoside Phosphorylase Deficiency	1293
HLA Deficiency	1294
CD3γ, CD3δ, CD3ε, CD3ζ Deficiency	1295
ZAP-70 Deficiency	
or Selective CD8 Deficiency	1295
TAP-2 Deficiency	1296
NFAT Deficiency	1296
NK-Cell Deficiency	1296
Undifferentiated SCID	1297
Predominantly T-Cell Defects	1297
Primary CD4 T-Cell Deficiency	1297
Primary CD7 Deficiency	1297
Primary CD45 Deficiency	1297
Multiple IL Defects	1298
Nezelof Syndrome	1298
Fas (CD95) Deficiency	1298
Other Well-Defined ID Syndromes	1298
Wiskott-Aldrich Syndrome	1298
Ataxia-Telangiectasia	1301
DiGeorge Syndrome	1303
X-Linked Lymphoproliferative Syndrome	1305
Hyper-IgE Syndrome	1305
Chédiak-Higashi Syndrome	1307
Griscelli Disease	1307
Phagocyte Deficiency	1307
Chronic Granulomatous Disease	1307
Leukocyte Adhesion Deficiency	1312
Deficiency of Multiple Leukocyte Integrins	1314
Glucose-6-Phosphate-Dehydrogenase	
Deficiency	1314

Myeloperoxidase Deficiency	1314
Specific Granule Deficiency	1315
Neutropenia	1315
Shwachman Syndrome	1316
Leukocyte Mycobactericidal Defect	1317
Complement Deficiency	1318
C1 Deficiency	1318
C1q Deficiency	1319
C4 Deficiency	1319
C2 Deficiency	1320
C3 Deficiency	1320
C5 Deficiency	1320
C6 Deficiency	1320
C7 Deficiency	1320
C8 Deficiency	1321
C9 Deficiencies	1321
C1 Inhibitor Deficiency	1321
Factor I Deficiency	1321
Factor H Deficiency	1321
Factor D Deficiency	1321
Properdin Deficiency	1321
Children with RRs	1322
Immunodeficiency	1324
Clinical Presentation	1327
Diagnosis and Differential Diagnosis	1327
Treatment	1333
Antibody Deficiency	1333
T-Cell PID	1333
Bone Marrow Transplantation	1335
Children with RRs	1340
Pediatricians, PID and RRs	1341
