

Arnaldo Cantani, University of Rome, Italy

Pediatric Allergy, Asthma and Immunology

- Comprehensive reference book covering all aspects of allergic-immunologic disorders in infants, children, and adolescents
- Practical advice for the daily practice
- Written by a single author
- Only existing reference book on this topic
- Findings from different schools and disciplines are critically evaluated
- Covers the ontogeny of the immune system, mucosal immunology and the typical pathology of infantile immediate hypersensitivity
- Includes description of the mechanisms underlying specific disease states such as neonatal immune response, autoimmune diseases, immune deficiencies, and pediatric AIDS

Publication Date:

January 2007

Fields of Interest:

Allergology

Target Groups:

Libraries; allergologists, immunologists, pediatricians, practitioners in evidence-based medicine

Easy to understand and easy to use, this essential book reflects the rapid progress in one of the most intriguing fields of medicine. It offers state-of-the-art information on basic immunology, fetal-neonatal immunology, and many more fascinating areas.

2007 XX, 1550 p. 758 illus., 379 in color. Hardcover
