1 Hirschsprung's Disease: A Historical Perspective — 1691–2005	1
<i>J. L. Grosfeld</i>	
2 Development of the Enteric Nervous System	13
<i>P. Puri and U. Rolle</i>	
2.1 Introduction	13
2.2 Embryonic Origin of ENS	13
2.3 Origin and Development of Neural Crest-Derived Cells	14
2.4 Functional Development of the ENS	15
2.5 Development of Intestinal Motility	15
2.6 Genes Involved in ENS Development	15
2.7 Other Factors Implicated in the Control of ENS Development	17
2.8 Conclusions	17
3 Functional Anatomy of the Enteric Nervous System	21
<i>M. D. Gershon</i>	
3.1 Introduction	21
3.2 The Normal Enteric Nervous System	22
3.3 Organization of Enteric Neurons	23
3.4 The ENS is Derived from the Neural Crest	23
3.5 The Crest-Derived Cells that Colonize the Gut are Originally Pluripotent and Migrate to the Bowel Along Defined Pathways in the Embryo	25
3.6 Enteric Neurons are Derived from More Than One Progenitor Lineage	25
3.7 Dependence of Enteric Neuronal Subsets on Different Microenvironmental Signals (Growth/Differentiation Factors) Defines Sublineages of Precursor Cells: RET and Glial Cell Line-Derived Neurotrophic Factor	27
3.8 The Development of the ENS is Probably Influenced by a Neurotrophin	28
3.9 NT-3 Promotes the Development of Enteric Neurons	29
3.10 The Development of the ENS is Probably Influenced by a Cytokine	31
3.11 An Aganglionosis Similar to That in Hirschsprung's Disease Occurs in <i>ls/ls</i> and <i>sl/sl</i> Mice	32
3.12 Genetic Abnormalities in Genes Encoding Endothelin-3 or its Receptor, Endothelin-B, are Associated with Spotted Coats and Aganglionosis	32
3.13 An Action of EDN3 on Crest-Derived Precursors Does Not, by Itself, Account for the Pathogenesis of Aganglionosis	33
3.14 The Pathogenesis of Aganglionosis Is Not Explained by an Abnormality Limited to Crest-Derived Neural Precursors	34
3.15 The Extracellular Matrix is Abnormal in the Presumptive Aganglionic Bowel of <i>ls/ls</i> Mice	35
3.16 Laminin-1 Promotes the Development of Neurons from Enteric Cells of Neural Crest Origin	36
3.17 The Effect of Laminin-1 on Enteric Neuronal Development Depends on the Binding of its $\alpha 1$ Chain to LBP110	36
3.18 The Effects of Laminin-1 on Crest-Derived Cells Immunoselected from the Fetal Bowel Are Different from those of Laminin-1 on Cells Isolated from the Crest Itself	37
3.19 Premature Neuronal Differentiation May Result When Inadequately Resistant Progenitors Encounter an Excessively Permissive Extracellular Matrix	38
3.20 Both Crest-Derived and Non-Neuronal Cells of the Colon Probably Respond to EDN3	38

3.21	Interstitial Cells of Cajal are Present, but Abnormal, in the Aganglionic Bowel of Hirschsprung's Disease	39	7.4	The Gut in Hirschsprung's Disease	100
3.22	Hirschsprung's Disease is Associated with Many Different Genetic Abnormalities: Conclusion From Animal Models	40	7.5	Gut motility in Hirschsprung's Disease	102

14.1	Introduction	199	17.11	Correlation Between Histological Findings and Clinical Symptoms	237
14.2	Nitric Oxide and NADPH-Diaphorase	199	17.12	Maturation and Apoptosis	238
			17.13	Association Between IND and HD	238
			17.14	Management	244
			17.15	Conclusion: Is IND a Real Disease? ...	247

18 Neurocristopathies and Particular Associations with Hirschsprung's Disease ...	253	22 Anal Sphincter Achalasia and Ultrashort Hirschsprung's Disease	297
<i>S. W. Moore</i>		<i>A. M. Holschneider and M. Kunst</i>	
18.1 Introduction	253	22.1 Anal Sphincter Achalasia	297
18.2 Neurocristopathies Associated with HSCR	253	22.2 Ultrashort Hirschsprung's Disease	298
19 Megacystis-Microcolon-Intestinal Hypoperistalsis Syndrome	267	22.3 Classification of Anal Sphincter Achalasia	300
<i>P. Puri</i>		22.4 Symptoms	307
19.1 Introduction	267	22.5 Anal Sphincter Achalasia in Combination with Hirschsprung's Disease	308
19.2 Pathogenesis	267	22.6 Reinnervation of the Internal Anal Sphincter	312
19.3 Prenatal Diagnosis	268	22.7 Diagnosis	312
19.4 Clinical Presentation	268	22.8 Therapy of Anal Sphincter Achalasia ..	314
19.5 Radiological Findings	268	22.9 Results	318
19.6 Surgical or Autopsy Findings	269	23 Laparoscopically Assisted Anorectal Pull-Through	323
19.7 Histological Findings	269	<i>K. E. Georgeson and O. J. Muensterer</i>	
19.8 Outcome	270	23.1 Introduction	323
19.9 Conclusion	270	23.2 Operative Technique	323
20 Degenerative Hollow Visceral Myopathy Mimicking Hirschsprung's Disease	275	23.3 Results	326
<i>H. Rode, R. A. Brown and A. Numanoglu</i>		23.4 Discussion	326
20.1 Introduction	275	24 Swenson's Procedure	329
20.2 Classification	276	<i>P. Puri</i>	
20.3 Etiology	276	24.1 Swenson's Procedure	329
20.4 Diagnosis	277	24.2 Experience with Swenson's Operation	331
20.5 Pathology	280	25 Soave's Extramucosal Endorectal Pull-Through Procedure	337
20.6 Extraintestinal Lesions	281	<i>V. Jasonni, A. Pini Prato and G. Martucciello</i>	
20.7 Specific Disorders of Smooth Muscle ..	281	25.1 History of the Endorectal Pull-Through Procedure	337
20.8 Differential Diagnosis	284	25.3 Operative Technique	338
20.9 Treatment	284	25.4 Anatomic Postoperative Condition	342
20.10 Prognosis	285	25.5 Modifications of Soave's Technique	344
20.11 Conclusion	285	25.6 Treatment of Hirschsprung's Disease ..	344
21 Adynamic Bowel Syndrome	287	26 Rehbein's Procedure (Deep Anterior Resection)	349
<i>P. J. Milla</i>		<i>A. M. Holschneider and R. Rassouli</i>	
21.1 Introduction	287	26.1 Principles	349
21.2 Clinical Presentation	288	26.2 Age at Operation	349
21.3 Disorders Causing Pseudo-Hirschsprung's Disease	288	26.3 Colostomy: Yes or No?	349
21.4 Enteric Nervous System Disease	288		
21.5 Disorders Affecting Intestinal and Urinary Smooth Muscle	291		
21.6 Disorders of the Endocrine Environment	292		
21.7 Diagnostic Techniques	294		
21.8 Conclusions	295		

26.4	Our Modification of Rehbein's Technique	350	28.6	Duhamel's Technique for Re-Do Pull-Through Procedure ...	370
26.5	Mobilization of the Colon and Rectum	350			
26.6	Anastomosis	350	29	Early and Late Complications Following Operative Repair of Hirschsprung's Disease	375
26.7	Differences in Caliber of the Rectum and Colon	351		<i>D. C. Little and C. L. Snyder</i>	
26.8	Procedure for Long Aganglionic Segments	351	29.1	Overview	375
26.9	Own Results with Rehbein's Technique	352	29.2	Early Complications	375
26.10	Final Considerations	355	29.3	Late Complications	377
			29.4	Conclusion	383
27	Transanal Pull-Through for Hirschsprung's Disease	359			
	<i>S. Somme and J. C. Langer</i>		30	Long-Term Results and Quality of Life After Treatment of Hirschsprung's Disease and Allied Disorders	387
27.1	Introduction	359		<i>D. H. Teitelbaum and A. G. Coran</i>	
27.2	Primary Pull-Through	359	30.1	Introduction	387
27.3	Development of the Transanal Pull-Through	360	30.2	Continence	387
27.4	Surgical Technique	360	30.3	Stooling Frequency and Constipation	388
27.5	Results of the Transanal Pull-Through	361	30.4	Enterocolitis	390
27.6	Ongoing Controversies	362	30.5	Total Colonic Aganglionosis	391
27.7	Conclusions	362	30.6	Stricture Formation After Definitive Pull-Through Procedure	392
28	Duhamel's Procedure	365	30.7	Impotence and Urinary Dysfunction ..	392
	<i>B. M. Ure and M. L. Metzelder</i>		30.8	Late Mortality	393
28.1	General Aspects	365	30.9	Long-term Outcome in Patients With Intestinal Neuronal Dysplasia ...	393
28.2	Operative Technique	365	30.10	Overall Quality of Life	393
28.3	Modifications of the Duhamel Procedure	366	30.11	Conclusions	394
28.4	Complications and Results of Duhamel's Procedure	369			
28.5	Laparoscopic Duhamel's Procedure ...	370
