List of Figures	XIII
------------------------------	-------------

Part I Introduction.....	1
---------------------------------	----------

1 Capital Budgeting and Investment Decisions	3
1.1 Characteristics and Classification of Investment Projects.....	3
1.2 Investment Planning and Investment Decisions	6
1.2.1 Investment Planning as Part of the Management Process	7
1.2.2 Investment Planning as Part of the Capital Investment Decision-Making Process	8
1.2.3 Strategic Analysis Tools Supporting the Capital Investment Decision-Making Process	20
1.3 Investment Appraisal Methods as Tools for Investment Planning	24
Further Reading	27

Part II Basic methods of investment appraisal.....	29
---	-----------

2 Static Methods	31
2.1 Cost Comparison Method	32
2.2 Profit Comparison Method	39
2.3 Average Rate of Return Method	41
2.4 Static Payback Period Method	44
Assessment Material	47
3 Discounted Cash Flow Methods	51
3.1 Introduction.....	51
3.2 Net Present Value Method.....	54
3.3 Annuity Method.....	65
3.4 Internal Rate of Return Method	67
3.5 Dynamic Payback Period Method	75
3.6 Data Collection	77
Assessment Material	84
Further Reading	87

Part III Advanced Methods and Applications of Investment Appraisal.....91

4 Compounded Cash Flow Methods.....93

 4.1 Compound Value Method.....93

 4.2 Critical Debt Interest Rate Method.....98

 4.3 Visualisation of Financial Implications (VoFI) Method.....100

 Assessment Material109

5 Selected Further Applications of Investment Appraisal Methods111

 5.1 Income Taxes and Investment Decisions.....111

 5.1.1 Taxes and the Net Present Value Method.....111

 5.1.2 Taxes and the Visualisation of Financial
 Implications (VoFI) Method.....116

 5.2 The Assessment of Foreign Direct Investments118

 5.2.1 Special Characteristics of Foreign Direct Investments118

 5.2.2 Net Present Value Model and the Assessment of
 Foreign Direct Investments.....122

 5.2.3 The Visualisation of Financial Implications (VoFI) Method and
 the Assessment of Foreign Investments.....127

 5.3 Models for Economic Life and Replacement Time Decisions131

 5.3.1 Overview131

 5.3.2 Optimum Economic Life without Subsequent Projects.....133

 5.3.3 Optimum Economic Life with a Limited Number of
 Identical Subsequent Projects137

 5.3.4 Optimum Economic Life with an Unlimited Number of
 Identical Subsequent Projects141

 5.3.5 Optimum Replacement Time with an Unlimited Number of
 Identical Subsequent Projects144

 5.3.6 Optimum Replacement Time with a Limited Number of
 Non-Identical Subsequent Projects148

 5.4 Models to Determine Optimum Investment Timing.....151

 Assessment Material161

Further Reading167

Part IV Multi-Criteria Methods and Simultaneous Decision-Making169

6	Multi-Criteria Methods	171
6.1	Introduction.....	171
6.2	Utility Value Analysis.....	175
6.3	Analytic Hierarchy Process.....	179
6.4	Multi-Attribute Utility Theory.....	193
6.5	PROMETHEE.....	203
	Assessment Material	215
7	Simultaneous Decision-Making Models.....	221
7.1	Static Model for Simultaneous Investment and Financing Decisions (DEAN Model).....	221
7.2	Multi-Tier Model of Simultaneous Investment and Financing Decisions (HAX and WEINGARTNER Model)	228
7.3	Multi-Tier model of Simultaneous Investment and Production Decisions (Extended FÖRSTNER and HENN Model).....	238
	Assessment Material	248
	Further Reading	255

Part V Methods and Models that Incorporate Uncertainty259

8	Methods and Models for Appraising Investment Projects under Uncertainty ...	261
8.1	Decision Theory	262
8.2	Risk-Adjusted Analysis	268
8.3	Sensitivity Analysis	274
8.4	Risk Analysis	280
8.5	Decision-Tree Method	286
8.6	Options Pricing Models	296
	Assessment Material	308
9	Analysing Investment Programmes under Uncertainty	317
9.1	Overview	317
9.2	Portfolio Selection	320
9.3	Flexible Planning	329
	Further Reading	337

Solutions.....341
