

Content

Introduction	1
1 Fundamentals of acoustics	7
1.1 Sound field equations and the wave equation	8
1.1.1 Sound field quantities	9
1.1.2 Derivation of the wave equation	10
1.2 Plane waves in fluid media	13
1.3 Plane harmonic waves	15
1.4 Wideband waves and signals	15
1.5 Energy and level	16
1.6 Sound intensity	19
1.7 Level arithmetic	20
1.8 Frequency bands	21
2 Sound sources	23
2.1 Spherical waves	23
2.2 Harmonic monopole source and sound power	24
2.3 Pulsating sphere and radiation impedance	26
2.4 Multipoles and extended sources	28
2.5 Spherical harmonics	31
3 Sound propagation	35
3.1 Reflection of plane waves at an impedance plane	35
3.1.1 Examples of wall impedances	37
3.2 Spherical wave above impedance plane	41
3.3 Scattering	42
3.3.1 Object scattering	42
3.3.2 Surface scattering	43
3.4 Diffraction	47
3.5 Refraction	48
3.6 Attenuation	49
3.7 Doppler effect	51

4	Sound fields in cavities and in rooms.....	53
4.1	Cavities	53
4.2	Modes.....	54
4.2.1	Boundary conditions	56
4.3	Geometrical acoustics	58
4.4	Statistical reverberation theory	59
4.4.1	Reverberation.....	61
4.4.2	Steady-state energy density and level.....	63
5	Structure-borne sound.....	69
5.1	Waves in solid media	69
5.2	Waves on plates and their radiation	72
5.2.1	Finite-size plates	75
5.2.2	Internal losses and structural reverberation time ...	75
5.3	Vibrational transmission over junctions	76
6	Psychoacoustics	79
6.1	Anatomy of the peripheral hearing system	79
6.2	Psychoacoustic characterization	81
6.2.1	Loudness.....	82
6.2.2	Temporal masking	84
6.2.3	Time-varying loudness	84
6.2.4	Sharpness	84
6.2.5	Fluctuation strength	85
6.2.6	Roughness.....	85
6.2.7	Tonality, pitch, pitch strength.....	85
6.3	Binaural hearing.....	86
6.3.1	Head-related transfer functions.....	87
6.3.2	Artificial heads	90
6.4	Hearing in rooms.....	92
6.4.1	Reverberance	94
6.4.2	Strength.....	96
6.4.3	Speech intelligibility and transparency	96
6.4.4	Spatial impression.....	98
6.4.5	Spatial variations in a room	100
6.4.6	Estimation of the monaural subjective parameters.....	101
7	Signal processing for auralization	103
7.1	The concept of auralization.....	103
7.2	Fundamentals of signal processing	106
7.2.1	Signals and systems	106
7.2.2	Impulse response and transfer function	107

7.3	Fourier transformation	110
7.4	Analogue-to-digital conversion.....	112
7.5	Discrete Fourier transformation	115
7.6	Fast Fourier transformation.....	116
7.6.1	Sources of errors, leakage and time windows.....	117
7.7	Digital filters	119
8	Characterization of sources.....	123
8.1	Airborne sound sources.....	123
8.1.1	Multipole synthesis.....	124
8.1.2	Musical instruments.....	126
8.1.3	Singing voice	128
8.1.4	Speaking voice.....	129
8.1.5	Anechoic recordings	129
8.2	Structure-borne sound sources	133
8.2.1	General approach.....	133
8.2.2	3-D force sources.....	135
9	Convolution and sound synthesis.....	137
9.1	Discrete convolution	137
9.2	FFT convolution.....	139
9.2.1	Segmented convolution	139
9.3	Binaural synthesis	141
9.4	Binaural mixing console	143
9.5	Spatial resolution of HRTF	145
10	Simulation models	147
10.1	Simulation methods for sound and vibrational fields	147
10.1.1	Reciprocity.....	150
10.1.2	Frequency domain models.....	153
10.1.3	Time domain models	162
10.2	Two-port models.....	166
10.2.1	Transfer path models	170
10.3	Other models.....	173
11	Simulation of sound in rooms.....	175
11.1	General.....	175
11.1.1	CAD room model	176
11.1.2	Absorption coefficients.....	180
11.1.3	Scattering coefficients	181
11.2	Stochastic ray tracing.....	181
11.2.1	Point-in-polygon test	184
11.2.2	Detectors.....	185

11.2.3	Presentation of results	186
11.2.4	Curved surfaces	188
11.2.5	Reproducibility in stochastic ray tracing	190
11.2.6	Computation times versus uncertainties – case studies	197
11.3	Image source model	199
11.3.1	Classical model	199
11.3.2	Audibility test	202
11.3.3	Limitations	204
11.3.4	Diffraction	206
11.3.5	Reduction of computational load by preprocessing	207
11.4	Hybrid image source models (deterministic ray tracing)...	210
11.5	Systematic uncertainties of geometrical acoustics	213
11.6	Hybrid models in room acoustics	216
11.6.1	Hybrid deterministic-stochastic models	217
11.7	Construction of binaural room impulse responses	222
12	Simulation and auralization of airborne sound insulation	227
12.1	Definitions of airborne sound transmission	228
12.2	Sound insulation of building elements	229
12.3	Sound insulation of buildings	233
12.3.1	Flanking transmission	235
12.4	Sound transmission prediction models	235
12.5	Auralization of airborne sound insulation	238
13	Simulation and auralization of structure-borne sound	245
13.1	Definitions of impact sound transmission	245
13.2	Impact sound model	246
13.3	Impact sound auralization	249
13.4	Structure-borne interaction model	251
14	Binaural transfer path synthesis	255
14.1	Source identification and characterization	257
14.1.1	Airborne sound sources	258
14.1.2	Structure-borne sound sources	261
14.2	Transfer path characterization	262
14.3	Auralization in BTPS	264
15	Aspects of real-time processing	267
15.1	Real-time binaural synthesis	268
15.1.1	HRTF in multiple degrees of freedom	269

15.2	Room acoustical real-time auralization.....	270
15.2.1	Source and receiver.....	271
15.2.2	Real-time processing of image sources	272
15.2.3	Real-time modelling of reverberation.....	275
15.3	Hybrid real-time room auralization.....	277
16	3-D sound reproduction and virtual reality systems	279
16.1	Headphone systems.....	280
16.1.1	Headphone equalization for binaural signals.....	283
16.1.2	Individual filters.....	284
16.2	Loudspeaker systems	287
16.2.1	VBAP surround sound.....	288
16.2.2	Ambisonics	288
16.2.3	Wave field synthesis	289
16.2.4	Binaural loudspeaker technology.....	293
16.3	VR technology and integrated VR systems	298
Annex	303
	Material data.....	303
	Tables of random-incidence absorption coefficients, α	304
	Tables of random-incidence scattering coefficients, s	311
	Tables of sound reduction indices, R	316
References	319
Index	331

Auralization

Fundamentals of Acoustics, Modelling, Simulation,
Algorithms and Acoustic Virtual Reality

Vorländer, M.

2008, XV, 335 p., Hardcover

ISBN: 978-3-540-48829-3
