
Contents

Advanced Technologies for Studies on Protein Interactomes H. Guan · E. Kiss-Toth	1
Cardiac Systems Biology and Parameter Sensitivity Analysis: Intracellular Ca²⁺ Regulatory Mechanisms in Mouse Ventricular Myocytes S.-Y. Shin · S.-M. Choo · S.-H. Woo · K.-H. Cho	25
Protein Interactions: Analysis Using Allele Libraries T. G. Chappell · P. N. Gray	47
Identification of Protein–Protein Interactions by Mass Spectrometry Coupled Techniques M. Abu-Farha · F. Elisma · D. Figeys	67
Lab-on-a-chip in Vitro Compartmentalization Technologies for Protein Studies Y. Zhu · B. E. Power	81
Large-Scale Analysis of Protein–Protein Interactions Using Cellulose-Bound Peptide Arrays U. Beutling · K. Ståding · T. Stradal · R. Frank	115
Antibody Microarrays as an Experimental Platform for the Analysis of Signal Transduction Networks U. Korf · F. Henjes · C. Schmidt · A. Tresch · H. Mannsperger C. Löbke · T. Beissbarth · A. Poustka	153
Using Aptamers to Study Protein–Protein Interactions P. Parekh · J. Martin · Y. Chen · D. Colon · H. Wang · W. Tan	177
Investigating Protein–Protein Interactions by Far-Westerns C. S. Chan · T. M. L. Winstone · R. J. Turner	195

Using Product Kernels to Predict Protein Interactions

S. Martin · W. M. Brown · J.-L. Faulon 215

Computational Methods For Predicting Protein–Protein Interactions

S. Pitre · M. Alamgir · J. R. Green · M. Dumontier

F. Dehne · A. Golshani 247

Subject Index 269

Protein - Protein Interaction

Werther, M.; Seitz, H. (Eds.)

2008, XIV, 272 p. 97 illus., 6 illus. in color., Hardcover

ISBN: 978-3-540-68817-4
