## Contents

<b>A Proton-Conducting Polymer Membrane as Solid Electrolyte – Function and Required Properties</b>	
L. Gubler · G. G. Scherer . . . . .	1
<b>Proton-Conducting Polymer Electrolyte Membranes: Water and Structure in Charge</b>	
M. Eikerling · A. A. Kornyshev · E. Spohr . . . . .	15
<b>Structural and Morphological Features of Acid-Bearing Polymers for PEM Fuel Cells</b>	
Y. Yang · A. Siu · T. J. Peckham · S. Holdcroft . . . . .	55
<b>Perfluorinated Ionic Polymers for PEFCs (Including Supported PFSA)</b>	
M. Yoshitake · A. Watakabe . . . . .	127
<b>Radiation Grafted Membranes</b>	
S. Alkan Gürsel · L. Gubler · B. Gupta · G. G. Scherer . . . . .	157
<b>Advances in the Development of Inorganic–Organic Membranes for Fuel Cell Applications</b>	
D. J. Jones · J. Rozière . . . . .	219
<b>Subject Index</b> . . . . .	265

Fuel Cells I

Scherer, G.G. (Ed.)

2008, XIV, 270 p., Hardcover

ISBN: 978-3-540-69755-8
