

Contents

Prologue	vii
1 Introduction, Background and Aim	1
2 Basic Information on the Baltic Sea	23
2.1 Introduction and Aim	23
2.2 Previous System-Wide Studies in the Baltic Sea	25
2.3 Databases and Methods	27
2.3.1 Data Variability/Uncertainty and the Sampling Formula	35
2.4 Size and Form Characteristics of the Sub-basins	40
2.5 Sediments and Bottom Dynamic Conditions	47
2.6 The Role of Land Uplift	52
2.7 Nutrient Concentrations, Temperatures and Salinities – Data, Trends and Co-variations	54
2.8 Putting the Data from the Baltic Sea into a Wider Context.....	62
2.9 Conclusions	65
3 Water Exchange and Water Transport in the Baltic Sea	69
3.1 Introduction and Aim	69
3.2 Modeling of Water Fluxes Using the CoatMab-Model	72
3.2.1 Mixing	73
3.2.2 Diffusion	75
3.3 Model Tests – Empirical Data Versus Model Values	76
3.4 Fluxes of Water and Salt	80
3.5 Water Retention Rates	84
3.6 Water Velocities in the Limiting Section Areas	85
3.7 Conclusions and Comments	88
4 Empirical Data and Models on Nutrients and Bioindicators in the Baltic Sea	91
4.1 The Nitrogen/Phosphorus Dilemma	91

4.2	Simple Overall Nutrient Budgets	97
4.3	Empirically Based Models for Operational Bioindicators	102
4.3.1	Predicting Secchi Depths	102
4.3.2	Predicting Chlorophyll-a Concentrations	106
4.3.3	Predicting Concentrations of Cyanobacteria	111
4.4	Conclusions	125
5	Nutrient Dynamics in the Baltic Sea	127
5.1	Introduction and Aim	127
5.2	Basic Model Structure and Data Needed to Run the Model	128
5.3	The CoastMab-Model for Phosphorus in the Baltic Sea	131
5.3.1	Inflows	131
5.3.2	Internal Processes	134
5.4	Outflow	150
5.5	Model Tests	151
5.6	Empirical Data Versus Modeled Data	153
5.7	Tests to Falsify the Model Structure	158
5.8	Retention Times, Fluxes and Amounts	163
5.9	Predicting Chlorophyll-a Concentrations	170
5.10	Predicting Water Clarity and Secchi Depth	172
5.11	Predicting Nitrogen Concentrations	178
5.12	Predicting Cyanobacteria	179
5.13	Predicting Sedimentation and Settling Velocities	179
5.14	The Vicious Circle Theory and the Actual Circle	183
5.15	Conclusions and Comments	186
6	Strategies for Remediation	189
6.1	Introduction and Aim	189
6.2	Remedial Scenarios and Suggested Remedial Strategy for Eutrophication in the Baltic Sea	190
6.3	Comments	201
	Epilogue	203
	References	209
	Appendix	219
A.1	A Compilation of All Equations and Model Variables in the Mass- Balance Model for Salt (CoastMab) for the Sub-basins of the Baltic Sea	219
A.2	Compilation of All Equations and Model Variables in the Mass- Balance Model for Phosphorus (CoastMab) for the Baltic Proper (BP)	230
A.3	Water Discharge Predicted from Map Parameters	241

Eutrophication in the Baltic Sea
Present Situation, Nutrient Transport Processes,
Remedial Strategies
Håkanson, L.; Bryhn, A.C.
2008, VIII, 261 p., Hardcover
