

Table of Contents

1 Introduction	1
1.1 Engine Systems in General	1
1.1.1 Grouping of Engine Systems	2
1.1.2 Demands on Engine Systems	5
1.2 Digital Aircraft Systems	8
1.2.1 General	8
1.2.2 Federated Avionics Architecture	11
1.2.3 Integrated Modular Avionics	11
1.3 Aircraft-Engine Interface	13
1.3.1 Structural Interface	13
1.3.2 System Interfaces	14
1.4 Thermal Management	14
1.4.1 Thermal Management for Engine Parts	14
1.4.2 Thermal Management for Fuel and Oil	15
1.5 Sample Engines	15
1.6 Definitions and Terms	17
1.6.1 Gas Path Stations	17
1.6.2 Pressure Ratios	18
1.6.3 Shaft Speed Designations	19
1.6.4 Corrected Parameters	19
1.6.5 Location Designations on Cases	20
2 Engine Air Systems	23
2.1 Internal Air Systems	23
2.1.1 Component Cooling and Sealing	23
2.1.2 Pressure Balancing	27
2.1.3 Bearing Compartment Pressurization	28
2.2 External Air Systems	29
2.2.1 Cooling and Ventilation Systems	29
2.2.2 Active Clearance Control Systems	31
2.2.3 Compressor Control Systems	38
3 Engine Lubrication System	49
3.1 General	49

3.1.1 Properties of Engine Oil	49
3.1.2 System Design and Components	51
3.2 Lubricated Areas	53
3.3 System Components	55
3.3.1 Oil Tanks	55
3.3.2 Pumps and Filters	56
3.3.3 Oil Cooling	58
3.3.4 Vent System Components	59
3.4 System Indications and Monitoring	60
3.4.1 Indication of Operating Data	60
3.4.2 Indication System Sensors	61
3.4.3 Data Processing, System Monitoring	62
3.4.4 Debris Monitoring	62
4 Engine Fuel Distribution System	67
4.1 General	67
4.1.1 Properties of Fuel	67
4.1.2 Fuel Supply of the Engine	69
4.2 Engine-Mounted Fuel Distribution System	70
4.2.1 System Design and Components	70
4.2.2 Operation	72
4.3 Thermal Management for Fuel and Oil	77
4.3.1 Oil Coolers and Fuel Temperature	77
4.3.2 The Oil Cooling System of the CFM56-7B	78
4.3.3 The Oil Cooling System of the CFM56-5A, -5B and -5C	78
4.3.4 The Oil Cooling System of the PW4000	80
4.3.5 The Oil Cooling System of the V2500-A5	81
5 Engine and Fuel Control System	85
5.1 Main Tasks of the System	85
5.2 Speed and Thrust Control	85
5.2.1 Shaft Speed Control	86
5.2.2 Thrust Control	87
5.2.3 Engine Thrust Ratings	90
5.3 Hydromechanical Control Systems	93
5.3.1 Engine Control System of the CFM56-3	93
5.3.2 Control System of the CF6-80C2 (PMC Version)	96
5.4 FADEC System	98
5.4.1 System Design	98
5.4.2 The EEC	100
5.4.3 The Sensors	108
5.4.4 Aircraft / Engine Interface	109

5.4.5 FADEC Systems of Selected Engines	111
5.4.6 Future Trends in FADEC System Designs.....	119
6 The Aircrew/Engine Interface.....	121
6.1 Engine Indications	121
6.1.1 Indicated Engine Parameters	121
6.1.2 Engine Indications on an Electronic Instrument System	125
6.1.3 Engine Indications on a Classical Instrument System	132
6.2 Engine Controls	135
6.2.1 HP Fuel Shut-Off Control System	136
6.2.2 Mechanical Thrust Lever Systems	139
6.2.3 Electrical Thrust Lever Systems.....	141
6.2.4 Control Switches	144
6.2.5 Thrust Control during Automatic Flight	145
7 Starting and Ignition.....	151
7.1 The Starting System.....	151
7.1.1 General	151
7.1.2 Starting System Components.....	152
7.2 The Ignition System.....	156
7.2.1 General	156
7.2.2 Ignition System Components.....	156
7.3 Cockpit Controls and Indications	160
7.3.1 Starting System and Ignition System of the CFM56-3	160
7.3.2 Start System and Ignition System of the CFM56-7B.....	162
7.3.3 Start System and Ignition System of the V2500-A5	164
8 Thrust Reverser Systems	167
8.1 Operation of Thrust Reversers	167
8.1.1 Basic Principle.....	167
8.1.2 Reverser Operation.....	168
8.2 Types of Thrust Reversers	168
8.2.1 Airflow Deflection Systems	169
8.2.2 Actuation Systems.....	171
8.2.3 Reverser Control Systems.....	172
8.3 Reverser Structure	173
8.3.1 Fixed Structure	173
8.3.2 Movable Structure and Actuation System Components	174
8.4 Reverser Control System.....	175
8.4.1 Control System of the B737-600.....	175
8.4.2 Control System of the A320	177

9 Engine Anti-Ice System	179
9.1 Ice Build-Up on Engine Parts	179
9.2 Air Inlet Anti-Ice System	179
9.2.1 General	179
9.2.2 System Components of a Pneumatic Anti-Ice System	180
9.3 Spinner Anti-Ice	181
10 Power Plant	185
10.1 Nacelle	185
10.2 Bare Engine	186
10.3 Power Plant Build-Up	186
10.3.1 Engine Mounts	188
10.3.2 Inlet Anti Ice System	190
10.3.3 Electrical Power Generation	190
10.3.4 Pneumatic System	191
10.3.5 Hydraulic System	193
10.3.6 Fuel Supply System	194
10.3.7 Fire Detection and Extinguishing System	194
10.3.8 Mechanical Engine Controls	197
10.3.9 Sensors and Harnesses	197
10.3.10 Engine Fluid Drains	197
Appendix A Data Transfer in Digital Aircraft Systems.....	199
A.1 Serial Interfaces	199
A.2 Data Buses	201
A.2.1 ARINC 429	201
A.2.2 ARINC 629	202
A.2.3 AFDX	204
Appendix B Servo Valve Control for Actuator Positioning	207
B.1 General	207
B.2 Servo Valves with Spill Valves	207
B.3 Servo Valves with Fuel Jet Nozzle	209
B.4 Servo Valves with Pilot Valves	210
B.5 Fail-Safe Actuator Positioning	211
Appendix C Unsuccessful Engine Starts.....	213
C.1 Types of unsuccessful Engine Starts	213
C.1.2 The Hot Start	213
C.1.3 The Wet Start	215
C.1.4 The Hung Start	216
C.1.5 The Start Stall	217

C.2 Further Abnormal Start Conditions detectable by FADEC Systems	218
Glossary	219
Bibliography	227
Index	229

Systems of Commercial Turbofan Engines

An Introduction to Systems Functions

Linke-Diesinger, A.

2008, XV, 234 p., Hardcover

ISBN: 978-3-540-73618-9
