Preface .....	VII
---------------	-----

<b>1 Introduction</b> .....	1
1.1 Exponential contractions .....	2
1.2 Exponential dichotomies and stable manifolds .....	4
1.3 Topological conjugacies .....	7
1.4 Center manifolds, symmetry and reversibility .....	10
1.5 Lyapunov regularity and stability theory .....	13

---

### Part I Exponential dichotomies

---

<b>2 Exponential dichotomies and basic properties</b> .....	19
2.1 Nonuniform exponential dichotomies .....	19
2.2 Stable and unstable subspaces.....	22
2.3 Existence of dichotomies and ergodic theory .....	24
<b>3 Robustness of nonuniform exponential dichotomies</b> .....	27
3.1 Robustness in semi-infinite intervals .....	27
3.1.1 Formulation of the results .....	27
3.1.2 Proofs .....	29
3.2 Stable and unstable subspaces.....	40
3.3 Robustness in the line.....	42
3.4 The case of strong dichotomies .....	49

---

### Part II Stable manifolds and topological conjugacies

---

<b>4 Lipschitz stable manifolds</b> .....	55
4.1 Setup and standing assumptions.....	55
4.2 Existence of Lipschitz stable manifolds .....	56

XII      Contents

4.3	Nonuniformly hyperbolic trajectories . . . . .	59
4.4	Proof of the existence of stable manifolds . . . . .	61
4.4.1	Preliminaries . . . . .	61
4.4.2	Solution on the stable direction . . . . .	62
4.4.3	Behavior under perturbations of the data . . . . .	64
4.4.4	Reduction to an equivalent problem . . . . .	67
4.4.5	Construction of the stable manifolds . . . . .	69
4.5	Existence of Lipschitz unstable manifolds . . . . .	71
<b>5</b>	<b>Smooth stable manifolds in <math>\mathbb{R}^n</math></b> . . . . .	75
5.1	$C^1$ stable manifolds . . . . .	75
5.2	Nonuniformly hyperbolic trajectories . . . . .	77
5.3	Example of a $C^1$ flow with stable manifolds . . . . .	78
5.4	Proof of the $C^1$ regularity . . . . .	79
5.4.1	A priori control of derivatives and auxiliary estimates . . . . .	79
5.4.2	Lyapunov norms . . . . .	83
5.4.3	Existence of an invariant family of cones . . . . .	86
5.4.4	Construction and continuity of the stable spaces . . . . .	92
5.4.5	Behavior of the tangent sets . . . . .	95
5.4.6	$C^1$ regularity of the stable manifolds . . . . .	100
5.5	$C^k$ stable manifolds . . . . .	102
5.6	Proof of the $C^k$ regularity . . . . .	106
5.6.1	Method of proof . . . . .	106
5.6.2	Linear extension of the vector field . . . . .	107
5.6.3	Characterization of the stable spaces . . . . .	110
5.6.4	Tangential component of the extension . . . . .	111
5.6.5	$C^k$ regularity of the stable manifolds . . . . .	116
<b>6</b>	<b>Smooth stable manifolds in Banach spaces</b> . . . . .	119
6.1	Existence of smooth stable manifolds . . . . .	120
6.2	Nonuniformly hyperbolic trajectories . . . . .	121
6.3	Proof of the existence of smooth stable manifolds . . . . .	123
6.3.1	Functional spaces . . . . .	123
6.3.2	Derivatives of compositions . . . . .	125
6.3.3	A priori control of the derivatives . . . . .	127
6.3.4	Hölder regularity of the top derivatives . . . . .	129
6.3.5	Solution on the stable direction . . . . .	133
6.3.6	Behavior under perturbations of the data . . . . .	136
6.3.7	Construction of the stable manifolds . . . . .	138
<b>7</b>	<b>A nonautonomous Grobman–Hartman theorem</b> . . . . .	145
7.1	Conjugacies for flows . . . . .	145
7.2	Conjugacies for maps . . . . .	146
7.2.1	Setup . . . . .	147
7.2.2	Existence of topological conjugacies . . . . .	149

7.3	Hölder regularity of the conjugacies . . . . .	155
7.3.1	Main statement . . . . .	155
7.3.2	Lyapunov norms . . . . .	156
7.3.3	Proof of the Hölder regularity . . . . .	157
7.4	Proofs of the results for flows . . . . .	162
7.4.1	Reduction to discrete time . . . . .	162
7.4.2	Proofs . . . . .	164

**Part III Center manifolds, symmetry and reversibility**

<b>8</b>	<b>Center manifolds in Banach spaces . . . . .</b>	<b>171</b>
8.1	Standing assumptions . . . . .	171
8.2	Existence of center manifolds . . . . .	173
8.3	Proof of the existence of center manifolds . . . . .	176
8.3.1	Functional spaces . . . . .	176
8.3.2	Lipschitz property of the derivatives . . . . .	179
8.3.3	Solution on the central direction . . . . .	184
8.3.4	Reduction to an equivalent problem . . . . .	187
8.3.5	Construction of the center manifolds . . . . .	191
<b>9</b>	<b>Reversibility and equivariance in center manifolds . . . . .</b>	<b>197</b>
9.1	Reversibility for nonautonomous equations . . . . .	197
9.1.1	The notion of reversibility . . . . .	197
9.1.2	Relation with the autonomous case . . . . .	199
9.1.3	Nonautonomous reversible equations . . . . .	201
9.2	Reversibility in center manifolds . . . . .	202
9.2.1	Formulation of the main result . . . . .	202
9.2.2	Auxiliary results . . . . .	206
9.2.3	Proof of the reversibility . . . . .	212
9.3	Equivariance for nonautonomous equations . . . . .	213
9.4	Equivariance in center manifolds . . . . .	214

**Part IV Lyapunov regularity and stability theory**

<b>10</b>	<b>Lyapunov regularity and exponential dichotomies . . . . .</b>	<b>219</b>
10.1	Lyapunov exponents and regularity . . . . .	219
10.2	Existence of nonuniform exponential dichotomies . . . . .	222
10.3	Bounds for the regularity coefficient . . . . .	226
10.3.1	Lower bound . . . . .	226
10.3.2	Upper bound in the triangular case . . . . .	227
10.3.3	Reduction to the triangular case . . . . .	232
10.4	Characterizations of regularity . . . . .	235
10.5	Equations with negative Lyapunov exponents . . . . .	241

XIV    Contents

10.5.1 Lipschitz stable manifolds . . . . .	242
10.5.2 Smooth stable manifolds . . . . .	243
10.6 Measure-preserving flows . . . . .	244
<b>11 Lyapunov regularity in Hilbert spaces . . . . .</b>	<b>249</b>
11.1 The notion of regularity . . . . .	249
11.2 Upper triangular reduction . . . . .	252
11.3 Regularity coefficient and Perron coefficient . . . . .	254
11.4 Characterizations of regularity . . . . .	256
11.5 Lower and upper bounds for the coefficients . . . . .	259
<b>12 Stability of nonautonomous equations in Hilbert spaces . . . . .</b>	<b>265</b>
12.1 Setup . . . . .	265
12.2 Stability results . . . . .	267
12.3 Smallness of the perturbation . . . . .	268
12.4 Norm estimates for the evolution operators . . . . .	270
12.5 Proofs of the stability results . . . . .	273
<b>References . . . . .</b>	<b>277</b>
<b>Index . . . . .</b>	<b>283</b>
