

Contents

- Chapter 1 Information Retrieval and Visualization..... 1**
 - 1.1 Visualization..... 3
 - 1.1.1 Definition..... 3
 - 1.1.2 Scientific visualization and information visualization..... 3
 - 1.2 Information retrieval..... 4
 - 1.2.1 Browsing vs. query searching..... 5
 - 1.2.2 Information at micro-level and macro-level 7
 - 1.2.3 Spatial characteristics of information space 8
 - 1.2.4 Spatial characteristics of browsing 10
 - 1.3 Perceptual and cognitive perspectives of visualization..... 11
 - 1.3.1 Perceptual perspective 11
 - 1.3.2 Cognitive perspective 12
 - 1.4 Visualization for information retrieval 13
 - 1.4.1 Rationale..... 13
 - 1.4.2 Three information retrieval visualization paradigms..... 16
 - 1.4.3 Procedures of establishing an information retrieval visualization model..... 16
 - 1.5 Summary..... 20
- Chapter 2 Information Retrieval Preliminaries 21**
 - 2.1 Vector space model..... 22
 - 2.2 Term weighting methods 24
 - 2.2.1 Stop words..... 25
 - 2.2.2 Inverse document frequency..... 25
 - 2.2.3 The Salton term weighting method..... 26
 - 2.2.4 Another term weighting method..... 26
 - 2.2.5 Probability term weighting method 26

2.3 Similarity measures.....	27
2.3.1 Inner product similarity measure	28
2.3.2 Dice co-efficient similarity measure.....	28
2.3.3 The Jaccard co-efficient similarity measure	28
2.3.4 Overlap co-efficient similarity measure.....	29
2.3.5 Cosine similarity measure.....	29
2.3.6 Distance similarity measure.....	30
2.3.7 Angle-distance integrated similarity measure.....	32
2.3.8 The Pearson r correlation measure.....	33
2.4 Information retrieval (evaluation) models	34
2.4.1 Direction-based retrieval (evaluation) model	34
2.4.2 Distance-based retrieval (evaluation) model	35
2.4.3 Ellipse retrieval (evaluation) model.....	36
2.4.4 Conjunction retrieval (evaluation) model	36
2.4.5 Disjunction evaluation model	38
2.4.6 The Cassini oval retrieval (evaluation) model	39
2.5 Clustering algorithms.....	40
2.5.1 Non- hierarchical clustering algorithm	42
2.5.2 Hierarchical clustering algorithm	43
2.6 Evaluation of retrieval results	45
2.7 Summary.....	46
Chapter 3 Visualization Models for Multiple Reference Points	47
3.1 Multiple reference points	48
3.2 Model for fixed multiple reference points	49
3.3 Models for movable multiple reference points	52
3.3.1 Description of the original VIBE algorithm	52
3.3.2 Discussions about the model.....	59
3.4 Model for automatic reference point rotation	66
3.4.1 Definition of the visual space	67
3.4.2 Rotation of a reference point	69
3.5 Implication of information retrieval.....	70
3.6 Summary.....	72
Chapter 4 Euclidean Spatial Characteristic Based Visualization Models	73
4.1 Euclidean space and its characteristics	73
4.2 Introduction to the information retrieval evaluation models.....	75
4.3 The distance-angle-based visualization model.....	79
4.3.1 The visual space definition	79
4.3.2 Visualization for information retrieval evaluation models	81
4.4 The angle-angle-based visualization model	88
4.4.1 The visual space definition	88
4.4.2 Visualization for information retrieval evaluation models	89
4.5 The distance-distance-based visualization model	97
4.5.1 The visual space definition	97
4.5.2 Visualization for information retrieval evaluation models	99
4.6 Summary.....	104

Chapter 5 Kohonen Self-Organizing Map--An Artificial Neural Network	107
5.1 Introduction to neural networks	107
5.1.1 Definition of neural network	108
5.1.2 Characteristics and structures of neuron network	109
5.2 Kohonen self-organizing maps	111
5.2.1 Kohonen self-organizing map structures	112
5.2.2 Learning processing of the <i>SOM</i> algorithm	113
5.2.3 Feature map labeling	119
5.2.4 The <i>SOM</i> algorithm description	120
5.3 Implication of the <i>SOM</i> in information retrieval	121
5.4 Summary	124
Chapter 6 Pathfinder Associative Network.....	127
6.1 Pathfinder associative network properties and descriptions	128
6.1.1 Definitions of concepts and explanations	128
6.1.2 The algorithm description	131
6.1.3 Graph layout method	136
6.2 Implications on information retrieval	137
6.2.1 Author co-citation analysis	137
6.2.2 Term associative network	139
6.2.3 Hyperlink	140
6.2.4 Search in Pathfinder associative networks	141
6.3 Summary	142
Chapter 7 Multidimensional Scaling	143
7.1 <i>MDS</i> analysis method descriptions	144
7.1.1 Classical <i>MDS</i>	144
7.1.2 Non-metric <i>MDS</i>	151
7.1.3 Metric <i>MDS</i>	157
7.2 Implications of <i>MDS</i> techniques for information retrieval	158
7.2.1 Definitions of displayed objects and proximity between objects ...	158
7.2.2 Exploration in a <i>MDS</i> display space	160
7.2.3 Discussion	161
7.3 Summary	163
Chapter 8 Internet Information Visualization.....	165
8.1 Introduction	165
8.1.1 Internet characteristics	165
8.1.2 Internet information organization and presentation methods	166
8.1.3 Internet information utilization	168
8.1.4 Challenges of the internet	170
8.2 Internet information visualization	171
8.2.1 Visualization of internet information structure	172
8.2.2 Internet information seeking visualization	180

8.2.3 Visualization of web traffic information.....	183
8.2.4 Discussion history visualization	188
8.3 Summary.....	189
Chapter 9 Ambiguity in Information Visualization	191
9.1 Ambiguity and its implication in information visualization	192
9.1.1 Reason of ambiguity in information visualization	192
9.1.2 Implication of ambiguity for information visualization.....	193
9.2 Ambiguity analysis in information retrieval visualization models	194
9.2.1 Ambiguity in the Euclidean spatial characteristic based information models.....	194
9.2.2 Ambiguity in the multiple reference point based information visualization models	202
9.2.3 Ambiguity in the Pathfinder network	207
9.2.4 Ambiguity in <i>SOM</i>	209
9.2.5 Ambiguity in <i>MDS</i>	210
9.3 Summary.....	211
Chapter 10 The Implication of Metaphors in Information Visualization.....	215
10.1 Definition, basic elements, and characteristics of a metaphor	215
10.2 Cognitive foundation of metaphors.....	218
10.3 Mental models, metaphors, and human computer interaction.....	219
10.3.1 Metaphors in human computer interaction.....	219
10.3.2 Mental models.....	220
10.3.3 Mental models in HCI.....	220
10.4 Metaphors in information visualization retrieval.....	223
10.4.1 Rationales for using metaphors.....	223
10.4.2 Metaphorical information retrieval visualization environments	225
10.5 Procedures and principles for metaphor application.....	231
10.5.1 Procedure for metaphor application.....	231
10.5.2 Guides for designing a good metaphorical visual information retrieval environment.....	232
10.6 Summary.....	236
Chapter 11 Benchmarks and Evaluation Criteria for Information Retrieval Visualization.....	239
11.1 Information retrieval visualization evaluation	239
11.2 Benchmarks and evaluation standards	243
11.2.1 Factors affecting evaluation standards	243
11.2.2 Principles for developing evaluation benchmarks.....	244
11.2.3 Four proposed categories for evaluation criteria.....	244
11.2.4 Descriptions of proposed benchmarks	246
11.3 Summary.....	253

Chapter 12 Afterthoughts.....	255
12.1 Introduction	255
12.2 Comparisons of the introduced visualization models	257
12.3 Issues and challenges	260
12.4 Summary.....	268
 Bibliography	 269
 Index	 287
