

Contents

1	Summary of Courses on Finite Elements	1
1.1	Some Essential Mathematical Tools	1
1.1.1	Adapted Functional Spaces and Their Properties	1
1.1.2	The Essential Initial Results Never to be Ever Forgotten!	3
1.1.3	A Set of Fundamental Inequalities	4
1.1.4	Elementary Concepts on Distributions	6
1.2	Nature of the Finite Elements Method	18
1.2.1	For Mathematical Modelling	18
1.2.2	Structure and Functional Framework of Equations Having Partial Derivatives	20
1.2.3	Construction of a Variational Formulation	21
1.2.4	Existence, Uniqueness and Regularity of a Weak Solution	24
1.2.5	Equivalence Between Strong and Weak Formulations	31
1.2.6	Methodology and Approximation Cascades	35
2	Some Fundamental Classes of Finite Elements	39
2.1	Variational Formulation and Approximations	39
2.2	Convergence of the Finite Elements Method	43
2.3	Description of Ordinary Finite Elements	47
2.3.1	Finite Elements with a Space Variable	48
2.3.2	Finite Elements with Two Space Variables	51
2.3.3	Finite Elements with Three Space Variables	60
3	Variational Formulations	63
3.1	Dirichlet's Problem	64
3.1.1	Statement	64
3.1.2	Solution	67
3.2	The Neumann Problem	76
3.2.1	Statement	76
3.2.2	Solution	79

3.3	The Fourier-Dirichlet Problem	89
3.3.1	Statement	89
3.3.2	Solution	92
3.4	Periodic Problem	102
3.4.1	Statement	102
3.4.2	Solution	105
4	Finite Elements in Deformable Solid Body Mechanics	113
4.1	Mixed Stress-Displacement Problems	113
4.1.1	Statement	113
4.1.2	Solution	120
4.2	Clamped Plate	134
4.2.1	Statement	134
4.2.2	Solution	139
5	Finite Elements Applied to Strength of Materials	147
5.1	Beam Subjected to Simple Traction	148
5.1.1	Case of a Restraint	148
5.1.2	Case of an Elastic Support	151
5.2	Beam Subject to Simple Bending	168
5.2.1	Beam Fitted With a Restraint and Having a Freely Movable Bearing	168
5.2.2	Clamped-clamped beam – Euler-Bernoulli theory	190
5.2.3	Solution	196
6	Finite Elements Applied to Non Linear Problems	211
6.1	Viscous Burgers Equation	211
6.2	Solution	215
6.3	Non-Linear Integro-Differential Equation	228
6.3.1	Statement	228
6.3.2	Solution	231
6.4	Riccati Differential Equation	240
6.4.1	Statement	240
6.4.2	Solution	243
