Dynamic Linking of Web Resources: Customisation and Personalisation

<i>Yeliz Yesilada, Sean Bechhofer, and Bernard Horan</i>	1
1 Introduction	1
2 COHSE	5
2.1 Deploying COHSE	6
3 Portals	8
3.1 Architecture	9
3.2 COHSE Portlet	12
4 Personalisation	14
4.1 User Tasks on the Web	17
5 Related Work	20
6 Summary and Discussion	21
References	22

A Multi-Purpose Ontology-Based Approach for Personalised Content Filtering and Retrieval

<i>Iván Cantador, Miriam Fernández, David Vallet, Pablo Castells, Jérôme Picault, and Myriam Ribière</i>	25
1 Introduction	25
2 Ontology-Based Personalisation for Content Retrieval	27
3 Adaptation of Semantic User Preferences	30
3.1 Automatic Creation and Update of Semantic Preferences	31
3.2 Exploitation of Semantic Links Between Concepts for Preferences Learning	33
4 Contextual Personalisation	36
4.1 Context Representation	36
4.2 Evaluation of Personalisation in Context	37
5 Augmented Social Networking and Collaborative Filtering	40
5.1 Semantic Group Profiling	40
5.2 Semantic Social Networking	43

VI Contents

5.3	Semantic Profile Expansion for Collaborative Group Profiling	46
6	Conclusions	48
	References	49
 Analysing the Behaviour of Students in Learning Management Systems with Respect to Learning Styles		
	<i>Sabine Graf and Kinshuk</i>	53
1	Introduction	53
2	Felder–Silverman Learning Style Model	55
3	Investigated Patterns of Behaviour	56
4	Design of the Study	57
	4.1 Description of the Course	57
	4.2 Instrument for Identifying Learning Styles	58
	4.3 Extensions in Moodle for Tracking Students’ Behaviour	58
5	Results	59
	5.1 Behaviour Vs. Learning Style Preferences	60
	5.2 Correlations Between Behaviour and Learning Style Preferences	65
6	Benefits	68
7	Related Work	70
8	Conclusion and Future Work	71
	References	72
 Improving Image Retrieval Using Semantic Resources		
	<i>Adrian Popescu, Gregory Grefenstette, and Pierre-Alain Moellic</i>	75
1	Introduction	75
2	Related Work	77
3	Ontological Issues	79
	3.1 Hierarchies	79
	3.2 Picturable Objects	80
	3.3 Automatic Ontology Building	81
4	Visual Ontology Construction	82
	4.1 The WordNet Nouns Hierarchy	82
	4.2 Image Database Constitution	83
	4.3 Image Retrieval Phase	84
	4.4 Image Clustering	88
5	Limits	90
	5.1 Image Processing Limitations	90
	5.2 WordNet Coverage	90
	5.3 Complex Queries	91
	5.4 Quality of the Semantic Structure	91
6	Evaluation	92
	6.1 Experimental Settings	92
	6.2 Results	92

7	Perspectives	93
8	Conclusions	94
	References	95

Implementing an Internet Image Search Service Based on the AJAX Web Programming Techniques

	<i>I. Anagnostopoulos, C. Anagnostopoulos, I. Psoroulas, and I. Maglogiannis</i>	97
1	Introduction	97
	1.1 Internet Programming with Asynchronous Javascript and XML	98
2	System Architecture	98
	2.1 The User-Interface (UI)	99
	2.2 The Query-Transmitter	101
	2.3 The Results-Collector	102
	2.4 The Local Repository and XML Handler	103
	2.5 The Meta-Results Handler	103
3	Retrieving Images with Human Appearance on the Web	105
	3.1 A Case Study	105
	3.2 The Meta-Search Engine Performance	109
	3.3 Asynchronous-Synchronous Analysis Performance	111
4	Conclusions: Future Considerations	112
	References	115

A Rule-Based Adaption Model for Ontology-Based Personalization

	<i>Thanh Tran, Philipp Cimiano, and Anupriya Ankolekar</i>	117
1	Introduction	117
2	Overview of Adaptation Approaches	118
	2.1 State-of-the-Art	119
	2.2 On the Use of Ontologies and Rules for Adaptation	119
	2.3 ODAS - A Domain Ontology for Adaptive Hypermedia Systems	121
3	A Rule-Based Adaptation Model	122
	3.1 Applying Rules-Based Adaptation to a Portal	122
	3.2 A Formal Definition of the Adaptation Model	125
	3.3 ODAS-Based Instantiations of the Adaptation Model	126
4	Implementation and Discussion	131
5	Related Work	132
6	Conclusion	133
	References	134

Management and Processing of Personalized Annotations in Image Retrieval Systems

	<i>Johanna Vompas and Stefan Conrad</i>	137
1	Motivation	137
2	Image Annotation Process	139

VIII Contents

3	Multi-level Annotation Model	140
3.1	Subjectivity in Image Annotations	142
3.2	Components of the Annotation Analysis Framework	143
3.3	Graph Representation for Multi-level Annotations	144
3.4	Relations Between Terms of Annotation	148
3.5	Extending the Probabilistic Annotation by Multi-level Annotations	149
3.6	Example of Context-Based Similarity	151
4	Related Work	152
5	Summary and Future Work	153
	References	153

An Incremental Framework for Adapting the Hypermedia Structure of Multimedia Documents

	<i>Sébastien Laborie and Jérôme Euzenat</i>	157
1	Introduction	157
2	Multimedia Document Specification	158
3	Semantic Adaptation of Multimedia Documents	159
4	Adaptation of the Hypermedia Dimension	162
5	Adaptation Based on the Hypermedia Structure	165
5.1	Generating the Multimedia Document Sub-Specifications According to the Hypermedia Structure	166
5.2	Adapting All Sub-Specifications at Once	166
5.3	Adapting Sub-Specifications Step by Step	168
6	Implementation	169
7	Application to Concrete Multimedia Documents	170
7.1	Concrete Multimedia Documents Adaptation	171
7.2	Prototype	172
8	Related Work	173
9	Conclusion	174
	References	175

Improving the Adaptiveness of an e-Learning System

	<i>Ioannis Hatzilygeroudis, Constantinos Koutsojannis, and Nikolaos Papachristou</i>	177
1	Introduction	177
1.1	Web-Based Intelligent Education Systems	178
1.2	Medical Education	178
1.3	Cognitive Flexibility Theory	179
1.4	The Motivation	180
2	The COFALE Environment	181
3	Extending COFALE	182
3.1	Domain Knowledge	182
3.2	Test Creation	182
3.3	Student Assessment	185
4	Architecture and Implementation Aspects	188

5	System Evaluation	190
6	Related Work	192
7	Conclusions	194
	References	195

The Context Oriented Architecture: An Augmentation of Context Awareness and Reactivity into Web Services

*Aisha Mohamed-Salama Elsafty, Sherif Gamal Aly,
and Ahmed Sameh*

		199
1	Introduction	199
2	Related Work	201
	2.1 Context Defined	201
	2.2 OWL-S: The Semantic Web Service Ontology Language	203
	2.3 Context Awareness Infrastructures	204
	2.4 Context Aware Web Services	204
3	The Context Oriented Architecture	206
	3.1 The Negotiator	208
	3.2 The Context Sensors	208
	3.3 The Monitor	208
	3.4 The Context Response	208
	3.5 The Response Manager	209
	3.6 The Component Registry	209
	3.7 The Context Repository	209
	3.8 Usage Scenario	210
4	OWL-S Extension	211
	4.1 Profile Ontology Extension	212
	4.2 Monitors Attribute	212
	4.3 Uses Attribute	212
	4.4 Responds Attribute	213
	4.5 Process Model Extension	213
	4.6 Exposes Attribute in the Process Model	214
5	Results and Analysis: The File Storage Scenario	215
	5.1 Scenario Context	215
	5.2 Scenario Formalization in the Framework	216
	5.3 Semantic Model	216
	5.4 Interaction Model	216
6	Conclusion	218
	References	219

Knowledge-Assisted Analysis of Video for Content-Adaptive Coding and Transmission

*Vasileios Mezaris, Nikolaos Thomos, Nikolaos V. Boulgouris,
and Ioannis Kompatsiaris*

		221
1	Introduction	221
2	Domain Knowledge	224

3	Knowledge-Assisted Video Analysis	226
3.1	Color and Motion Initial Segmentation	226
3.2	Low-level Descriptors Extraction	227
3.3	Genetic Algorithm	228
4	Content-Adaptive Coding and Transmission	230
4.1	Basic Problem Formulation	230
4.2	Channel Rate Optimization for Wireless Transmission Scenarios	232
5	Experimental Results	235
6	Conclusions	238
	References	238

An Adaptive Semantic Framework to Support Multiple User Viewpoints over Multiple Databases

	<i>Stefan Poslad and Landong Zuo</i>	261
1	Introduction	261
1.1	Information Heterogeneity	262
1.2	Outline of the Chapter	263
2	Related Work	263
2.1	Logical Data Views vs. User Views	263
2.2	Integrating Semantics, Rules, Logic and Databases	265
3	A Multiple Viewpoint Semantic Framework	267
3.1	Viewpoint Conceptualisation	269
3.2	Semantic Mapping	270
3.3	The Process to Project a Viewpoint	271
3.4	Modelling Individual Users	273
3.5	View-Based Query Answering and Result Adjustment	274
3.6	Applying Preference and Rules in Query Answering	277
3.7	User-Centre Query Answering	278
4	Implementation and Validation	280
5	Conclusions and Further Work	282
	References	283

User Preferences for Access to Textual Information: Model, Tools and Experiments

	<i>Thibault Roy and Stéphane Ferrari</i>	285
1	Introduction	285
2	Motivations	286
2.1	Textual Information and Users' Point of View	286
2.2	Visual and Interactive Tools for Access to Textual Information	287
2.3	Our Approach	289
3	Models and Tools	289
3.1	LUCIA: A Model for Representing User's Knowledge on Domains	289

3.2	User-Centred Tools	291
4	Experiment 1: Accessing Information	294
4.1	Context and Materials	294
4.2	Results and Discussion	295
5	Experiment 2: Conceptual Metaphors	298
5.1	Constraints on the Model for Metaphor Characterisation	298
5.2	Map and Texts “Metaphoricity”	300
6	Conclusion	302
	References	303

Modeling the Reusable Content of Adaptive Web-Based Applications Using an Ontology

	<i>Mária Bielíková and Michal Moravčík</i>	307
1	Introduction	307
2	Related Work	309
2.1	Content Representation	309
2.2	Content Transformation	310
3	Development of Reusable Content	311
3.1	The Method for Domain Modeling	312
3.2	Importing Existing Domain Model Ontologies	314
3.3	Delivering Ontology Content into Existing Adaptive Application	315
4	Ontology Models of the Content	316
4.1	Core Ontology of Content Model	316
4.2	Domain and User Models Interconnection	321
5	Meta-Model of the Adaptive Application Content	322
6	Evaluation of Proposed Method	322
7	Conclusions	325
	References	325

Indexing and Browsing of Color Images: Design Considerations

	<i>Christos Diou, Nikos Batalas, and Anastasios Delopoulos</i>	329
1	Introduction	329
2	Color Descriptors and Similarity Measures	331
2.1	Histogram and Dominant Color	331
2.2	Distance Metrics	332
3	Indexing and Dimensionality	334
3.1	Limits of <i>kd</i> -Tree Effectiveness	335
4	Point Configurations	335
4.1	MDS and FastMap	337
4.2	Browsing	337
5	Efficiency of FastMap Configurations	338
6	Conclusions	343
	References	345

**Generic Personal Assistance Architecture
for Mobile Environments**

<i>Gerald Bieber</i>	347
1 Introduction	347
2 Related Work	348
2.1 Personal Task Model	350
3 Personal Assistant	352
3.1 Goal Description	353
3.2 Situation Influence by Task Execution	354
3.3 Task Generation	355
3.4 Situation Dependent Task Suggestion	357
3.5 Control Circuit	358
4 Personal Assistance Architecture	358
5 Proof of Concept-Applications	360
5.1 xGuide: Electronic Exhibition Guide	360
5.2 Applied Task Definition	361
5.3 StepMan	361
5.4 Personal Assistant DiaTrace	363
5.5 Mobile Personal Trainer	365
6 Outcome Analysis	366
7 Conclusion and Further Work	367
