1	RFID in Manufacturing: From Shop Floor to Top Floor	1
	<i>Coauthored by Lenka Ivantysynova and Holger Ziekow</i>	
1.1	Architectural Perspectives	1
1.2	RFID Basics and Standards	6
1.2.1	Technical Foundations	7
1.2.2	EPCglobal™	10
1.2.3	OPC and OPC-UA	13
1.2.4	ISA-95	14
1.3	RFID Potentials	16
1.3.1	Scanning	16
1.3.2	Tracking	17
1.3.3	Tracing	18
1.3.4	Metadata Management	18
1.3.5	Back-End Communication	19
1.3.6	Label Management	20
1.3.7	Inter-Enterprise Collaboration	20
1.4	Cost–Benefit Considerations and Adoption Decision	21
1.5	Summary	23
2	The Role of Enterprise Software	25
	<i>Coauthored by Christof Bornhövd, Gregor Hackenbroich, Stephan Haller, Tao Lin, Jochen Rode, and Joachim Schaper</i>	
2.1	Trends in Manufacturing and ERP	25
2.2	Enterprise Service-Oriented Architectures	26
2.3	SAP Software for Real-World Awareness	27
2.4	SAP Auto-ID Infrastructure	29
2.4.1	System Requirements	29
2.4.2	System Overview	30
2.5	Summary	34
3	The Role of Manufacturing Execution Systems	35
3.1	Why an MES?	35

3.2	Integrating MES into the Enterprise	37
	Information Infrastructure	37
3.3	Processes Relevant to MES in the Company	39
3.3.1	Time Scheduling and Sequencing, Shop Floor Control (also refer to Sect. 3.7.6)	41
3.3.2	Intralogistics (see also Sect. 3.7.3)	41
3.3.3	Quality Management (see also Sect. 3.7.4)	42
3.3.4	Time and Attendance and Time Management Within Production (see also Sect. 3.7.5)	42
3.4	Tasks and Functions of an MES	43
3.5	Data Collection During Manufacturing	47
3.6	Flow of Information	51
3.7	RFID and MES	52
3.7.1	Identifying Objects in Production	52
3.7.2	Realization of Online Interfaces	54
3.7.3	Intra-Enterprise Logistics	55
3.7.4	Quality Management	56
3.7.5	Access and Attendance Control	57
3.7.6	Shop Floor Control	58
3.8	Summary	59
4	Six Case Studies	61
	<i>Coauthored by Lenka Ivantysynova and Holger Ziekow</i>	
4.1	AIR: Airbag Manufacturing	61
4.1.1	Current Situation	62
4.1.2	RFID Perspectives	66
4.1.3	Costs and Benefits	71
4.1.4	Summary	72
4.2	CLU: Sliding Clutches	72
4.2.1	Current Situation	73
4.2.2	RFID Perspectives	76
4.2.3	Costs and Benefits	80
4.2.4	Summary	81
4.3	COO: Engine-Cooling Modules	81
4.3.1	Current Situation	82
4.3.2	RFID Perspectives	84
4.3.3	Costs and Benefits	85
4.3.4	Summary	85
4.4	CAS: Production of Cast Parts	85
4.4.1	Current Situation	86
4.4.2	RFID Perspectives	88
4.4.3	Costs and Benefits	90
4.4.4	Summary	91

4.5	CON: Production of Electronic Connectors	91
4.5.1	Current Situation	92
4.5.2	RFID Perspectives	96
4.5.3	Costs and Benefits	100
4.5.4	Summary	101
4.6	PAC: Aluminum Foils for Packaging	101
4.6.1	Current Situation	102
4.6.2	RFID Perspectives	108
4.6.3	Costs and Benefits	111
4.6.4	Summary	111
4.7	Summary	111
5	Lessons Learned	113
	<i>Coauthored by Lenka Ivantysynova and Holger Ziekow</i>	
5.1	Terminology	113
5.2	A Reference Model for Production	115
5.3	Motives for Using RFID	117
5.3.1	Accelerating Scan Processes	117
5.3.2	Extending Scan Processes for Quality and Efficiency ..	118
5.3.3	Extending Scan Processes for Narrowing Recalls	119
5.3.4	Reducing Paper-Based Data Management	119
5.3.5	Automating Asset Tracking	120
5.3.6	Reducing Back-End Interactions	121
5.3.7	Unifying Labels	122
5.4	RFID Versus Barcode	123
5.4.1	Monitoring Processes	124
5.4.2	Management of Process Data	124
5.4.3	Container Management	125
5.4.4	Uniform Labeling	125
5.4.5	Process Safety	125
5.5	A Guide to Assess Costs and Benefits	126
5.5.1	Costs	127
5.5.2	Benefits	131
5.6	Basic RFID Functionalities	138
5.6.1	Filtering and Enriching RFID Data	138
5.6.2	Storing RFID Data	139
5.6.3	Sharing Information Along the Supply Chain	139
5.6.4	Event Detection	140
5.7	Requirements for the IT Infrastructure	141
5.7.1	Providing RFID Data to Components of ISA-95 Level 3	142
5.7.2	Distributing Business Logic and Data	143
5.7.3	Supporting Heterogeneous Data Sources	145

5.7.4	Dealing with Noise and Uncertainty	146
5.7.5	Supporting Process Analysis	146
5.7.6	Supporting Asset Tracking	146
5.8	Hardware Issues on the Plant Floor	147
5.8.1	Hostile Physical Conditions	147
5.8.2	Presence of Metal	148
5.8.3	Demand for Wireless Communication	148
5.8.4	Processes in Close Spatial Proximity	149
5.9	Current Motives and Open Potential for Using RFID	149
5.10	Summary	151
6	Conclusions and Outlook	153
	References	157
	Subject Index	161
