

Contents

Part I

Existence, Uniqueness, Stability and Differentiability Properties of the Flow Associated to Weakly Differentiable Vector Fields	3
Luigi Ambrosio and Gianluca Crippa	
1 Introduction	3
2 The Continuity Equation	5
3 The Continuity Equation Within the Cauchy–Lipschitz Framework	7
4 (ODE) Uniqueness Vs. (PDE) Uniqueness	11
5 The Flow Associated to Sobolev or BV Vector Fields	19
6 Measure-Theoretic Differentials	32
7 Differentiability of the Flow in the $W^{1,1}$ Case	38
8 Differentiability and Compactness of the Flow in the $W^{1,p}$ Case	40
9 Bibliographical Notes and Open Problems	52
References	54

Part II

A Note on Alberti’s Rank-One Theorem	61
Camillo De Lellis	
1 Introduction	61
2 Dimensional Reduction	63
3 A Blow-Up Argument Leading to a Partial Result	65
4 The Fundamental Lemma	66
5 Proof of Theorem 1.1 in the Planar Case	68
References	74

Part III

Regularizing Effect of Nonlinearity in Multidimensional Scalar Conservation Laws	77
Gianluca Crippa, Felix Otto, and Michael Westdickenberg	
1 Introduction	77
2 Background Material	79
3 Entropy Solutions with BV-Regularity	84
4 Structure of Entropy Solutions	87
5 Kinetic Formulation, Blow-Ups and Split States	91
6 Classification of Split States	98
6.1 Special Split States: No Entropy Dissipation	98
6.2 Special Split States: v Supported on a Hyperplane	101
6.3 Special Split States: v Supported on Half a Hyperplane	103
6.4 Classification of General Split States	105
7 Proof of the Main Theorem	106
8 Proofs of the Regularity Theorems	112
References	128

Transport Equations and Multi-D Hyperbolic
Conservation Laws

Ambrosio, L.; Crippa, G.; De Lellis, C.; Otto, F.;
Westdickenberg, M. - Ancona, F.; Bianchini, S.;
Colombo, R.M.; De Lellis, C.; Marson, A.; Montanari, A.
(Eds.)

2008, XIV, 131 p., Softcover
