External Reviewers	XV
Section 1: Why object-based image analysis	1
1.1 Object-based image analysis for remote sensing applications: modeling reality – dealing with complexity <i>S. Lang</i>	3
1.2 Progressing from object-based to object-oriented image analysis <i>M. Baatz, C. Hoffmann, G. Willhauck</i>	29
1.3 An object-based cellular automata model to mitigate scale dependency <i>D. J. Marceau, N. Moreno</i>	43
1.4 Geographic Object-Based Image Analysis (GEOBIA): A new name for a new discipline <i>G. J. Hay, G. Castilla</i>	75
1.5 Image objects and geographic objects <i>G. Castilla, G. J. Hay</i>	91
Section 2: Multiscale representation and object-based classification	111
2.1 Using texture to tackle the problem of scale in land-cover classification <i>P. Corcoran, A. Winstanley</i>	113

2.2 Domain-specific class modelling for one-level representation of single trees <i>D. Tiede, S. Lang, C. Hoffmann</i>	133
2.3 Object recognition and image segmentation: the Feature Analyst® approach <i>D. Opitz, S. Blundell</i>	153
2.4 A procedure for automatic object-based classification <i>P.R. Marpu, I. Niemeyer, S. Nussbaum, R. Gloaguen</i>	169
2.5 Change detection using object features <i>I. Niemeyer, P.R. Marpu, S. Nussbaum</i>	185
2.6 Identifying benefits of pre-processing large area QuickBird imagery for object-based image analysis <i>T. Lübker, G. Schaab</i>	203
2.7 A hybrid texture-based and region-based multi-scale image segmentation algorithm <i>A. Tzotsos, C. Iosifidis, D. Argialas</i>	221
2.8 Semi-automated forest stand delineation using wavelet based segmentation of very high resolution optical imagery <i>F.M.B. Van Coillie, L.P.C. Verbeke, R.R. De Wulf</i>	237
2.9 Quality assessment of segmentation results devoted to object-based classification <i>J. Radoux, P. Defourny</i>	257
Section 3: Automated classification, mapping and updating: forest	273
3.1 Object-based classification of QuickBird data using ancillary information for the detection of forest types and NATURA 2000 habitats <i>M. Förster, B. Kleinschmit</i>	275

3.2 Estimation of optimal image object size for the segmentation of forest stands with multispectral IKONOS imagery <i>M. Kim, M. Madden, T. Warner</i>	291
3.3 An object-based approach for the implementation of forest legislation in Greece using very high resolution satellite data <i>G. Mallinis, D. Karamanolis, M. Karteris, I. Gitas</i>	309
3.4 Object-based classification of SAR data for the delineation of forest cover maps and the detection of deforestation – A viable procedure and its application in GSE Forest Monitoring <i>Ch. Thiel, Ca. Thiel, T. Riedel, C. Schmullius</i>	327
3.5 Pixels to objects to information: Spatial context to aid in forest characterization with remote sensing <i>M.A. Wulder, J.C. White, G.J. Hay, G. Castilla</i>	345
Section 4: Automated classification, mapping and updating: environmental resource management and agriculture	365
4.1 Object-oriented oil spill contamination mapping in West Siberia with Quickbird data <i>S. Hese, C. Schmullius</i>	367
4.2 An object-oriented image analysis approach for the identification of geologic lineaments in a sedimentary geotectonic environment <i>O. Mavrantza, D. Argialas</i>	383
4.3 Classification of linear environmental impacts and habitat fragmentation by object-oriented analysis of aerial photographs in Corrubedo National Park (NW Iberian Peninsula) <i>R.A.D. Varela, P.R. Rego, M.S.C. Iglesias</i>	399

4.4 Multi-scale functional mapping of tidal marsh vegetation using object-based image analysis <i>K. Tuxen, M. Kelly</i>	415
4.5 A Local Fourier Transform approach for vine plot extraction from aerial images <i>C. Delenne, S. Durrieu, G. Rabatel, M. Deshayes</i>	443
Section 5: Automated classification, mapping and updating: land use / land cover	457
5.1 Object-based classification of IKONOS data for vegetation mapping in Central Japan <i>N. Kamagata, K. Hara, M. Mori, Y. Akamatsu, Y. Li and Y. Hoshino</i>	459
5.2 Structural biodiversity monitoring in savanna ecosystems: Integrating LiDAR and high resolution imagery through object-based image analysis <i>S.R. Levick, K.H. Rogers</i>	477
5.3 Fusion of multispectral optical and SAR images towards operational land cover mapping in Central Europe <i>T. Riedel, C. Thiel, C. Schmullius</i>	493
5.4 The development of integrated object-based analysis of EO data within UK national land cover products <i>G.M. Smith</i>	513
Section 6: Automated classification, mapping and updating: urban applications	529
6.1 Detecting informal settlements from QuickBird data in Rio de Janeiro using an object-based approach <i>P. Hofmann, J. Strobl, T. Blaschke, H. Kux</i>	531

6.2 Opportunities and limitations of object-based image analysis for detecting urban impervious and vegetated surfaces using true-colour aerial photography <i>M. Kampouraki, G. A. Wood, T. R. Brewer</i>	555
6.3 Object-based Image Analysis using QuickBird satellite images and GIS data, case study Belo Horizonte (Brazil) <i>H. J. H. Kux, E. H. G. Araújo</i>	571
6.4 An object-based approach to detect road features for informal settlements near Sao Paulo, Brazil <i>R. A. A. Nobrega, C. G. O'Hara, J. A. Quintanilha</i>	589
Section 7: Development of new methodologies	609
7.1 Object-oriented analysis of image and LiDAR data and its potential for a dasymetric mapping application <i>F. Kressler, K. Steinnocher</i>	611
7.2 Characterising mountain forest structure using landscape metrics on LiDAR-based canopy surface models <i>B. Maier, D. Tiede, L. Dorren</i>	625
7.3 Object detection in airborne laser scanning data - an integrative approach on object-based image and point cloud analysis <i>M. Rutzinger, B. Höfle, N. Pfeifer</i>	645
7.4 Support Vector Machine classification for Object-Based Image Analysis <i>A. Tzotsos, D. Argialas</i>	663
7.5 Genetic adaptation of segmentation parameters <i>G. A. O. P. Costa, R. Q. Feitosa, T. B. Cazes, B. Feijó</i>	679

7.6 Principles of full autonomy in image interpretation. The basic architectural design for a sequential process with image objects <i>R. de Kok, P. Wezyk</i>	697
7.7 Strategies for semi-automated habitat delineation and spatial change assessment in an Alpine environment <i>E. Weinke, S. Lang, M. Preiner</i>	711
Section 8: Burning research questions, research needs and outlook	733
8.1 On segment based image fusion <i>M. Ehlers, D. Tomowski</i>	735
8.2 Modelling uncertainty in high resolution remotely sensed scenes using a fuzzy logic approach <i>J. Schiewe, M. Gähler</i>	755
8.3 Assessing image segmentation quality – concepts, methods and application <i>M. Neubert, H. Herold, G. Meinel</i>	769
8.4 Object-fate analysis: Spatial relationships for the assessment of object transition and correspondence <i>E. Schöpfer, S. Lang, F. Albrecht</i>	785
Index	803

Object-Based Image Analysis

Spatial Concepts for Knowledge-Driven Remote Sensing
Applications

Blaschke, Th.; Lang, S.; Hay, G. (Eds.)

2008, XVII, 817 p. With online files/update., Hardcover

ISBN: 978-3-540-77057-2
