
Contents

1 Natural Computing in Computational Finance: An Introduction <i>Anthony Brabazon and Michael O'Neill</i>	1
<hr/>	
Part I Optimisation	
<hr/>	
2 Constrained Index Tracking under Loss Aversion Using Differential Evolution <i>Dietmar Maringer</i>	7
3 An Evolutionary Approach to Asset Allocation in Defined Contribution Pension Schemes <i>Kerem Senel, A. Bulent Pamukcu, Serhat Yanik</i>	25
4 Evolutionary Strategies for Building Risk-Optimal Portfolios <i>Piotr Lipinski</i>	53
5 Evolutionary Stochastic Portfolio Optimization <i>Ronald Hochreiter</i>	67
6 Non-linear Principal Component Analysis of the Implied Volatility Smile using a Quantum-inspired Evolutionary Algorithm <i>Kai Fan, Conall O'Sullivan, Anthony Brabazon, Michael O'Neill</i>	89
7 Estimation of an EGARCH Volatility Option Pricing Model using a Bacteria Foraging Optimisation Algorithm <i>Jing Dang, Anthony Brabazon, Michael O'Neill, David Edelman</i>	109
<hr/>	
Part II Model Induction	
<hr/>	
8 Fuzzy-Evolutionary Modeling for Single-Position Day Trading <i>Célia da Costa Pereira, Andrea G. B. Tettamanzi</i>	131

9 Strong Typing, Variable Reduction and Bloat Control for Solving the Bankruptcy Prediction Problem Using Genetic Programming <i>Eva Alfaro-Cid, Alberto Cuesta-Cañada, Ken Sharman, Anna I. Esparcia-Alcázar</i>	161
10 Using Kalman-filtered Radial Basis Function Networks for Index Arbitrage in the Financial Markets <i>David Edelman</i>	187
11 On Predictability and Profitability: Would GP Induced Trading Rules be Sensitive to the Observed Entropy of Time Series? <i>Nicolas Navet, Shu-Heng Chen</i>	197
12 Hybrid Neural Systems in Exchange Rate Prediction <i>Andrzej Bielecki, Pawel Hajto, Robert Schaefer</i>	211
<hr/>	
Part III Agent-based Modelling	
<hr/>	
13 Evolutionary Learning of the Optimal Pricing Strategy in an Artificial Payment Card Market <i>Biliana Alexandrova-Kabadjova, Edward Tsang, Andreas Krause</i>	233
14 Can Trend Followers Survive in the Long-Run? Insights from Agent-Based Modeling <i>Xue-Zhong He, Philip Hamill, Youwei Li</i>	253
15 Co-Evolutionary Multi-Agent System for Portfolio Optimization <i>Rafał Dreżewski, Leszek Siwik</i>	271
Index	301
