<b>1</b>	<b>Monitoring of Intracranial Pressure (ICP): A Review .....</b>	<b>1</b>
1.1	Normal Intracranial Pressure Values .....	2
1.2	Regional Differences in Intracranial Pressure.....	2
1.2.1	Animal Studies .....	2
1.2.2	Human Studies .....	3
1.3	Pressure/Volume Relationship .....	3
1.4	Pressure Waves .....	4
1.5	Critical Levels of Intracranial Pressure .....	5
1.5.1	Experimental Studies .....	6
1.5.2	Human Studies .....	6
1.6	Intracranial Pressure: Impact on Mortality .....	7
1.7	Intracranial Pressure After Intracranial Surgery .....	7
1.8	Approaches to Control of Intracranial Hypertension.....	7
1.9	Control of Cerebral Blood Volume and Intracranial Pressure.....	8
1.9.1	Head Elevation.....	8
1.9.2	Reverse Trendelenburg Position .....	9
1.9.3	Head Flexion, Rotation and Tilting .....	9
1.9.4	Central Venous Pressure, Intraabdominal Pressure and Body Position .....	10
1.9.5	Endotracheal Suction and Tracheotomy .....	10
1.10	Positive End-Expiratory Pressure and Continuous Positive Airway Pressure .....	11
1.11	Dihydroergotamine (DHE).....	12
1.12	The Lund Model .....	13
1.13	Hyperventilation (HV) .....	13
1.13.1	Cerebral Blood Flow, Cerebral Blood Volume and Intracranial Pressure .....	14
1.13.2	Steal and Inverse Steal Phenomenon.....	14
1.13.3	Bohr Effect.....	15
1.13.4	Risk of Ischaemia.....	16
1.13.5	Adaptation to Prolonged Hyperventilation.....	17
1.13.6	Hyperventilation in Premature, Neonates and Paediatric Patients .....	18
1.13.7	Hyperventilation as a Lifesaving Procedure .....	19

1.13.8	Guidelines .....	19
1.14	Indomethacin .....	19
1.14.1	Experimental Studies .....	19
1.14.2	Human Studies .....	20
1.15	Metabolic Control of Cerebral Blood Flow .....	21
1.15.1	Hypothermia .....	22
1.15.1.1	Experimental Studies .....	22
1.15.1.2	Clinical Studies .....	22
1.15.1.3	Guidelines .....	23
1.15.2	Hypnotic Agents .....	23
1.15.3	Vasodilatation .....	24
1.15.4	Cerebral Metabolic Rate of Oxygen .....	24
1.15.5	Sedation .....	24
1.15.6	Intracranial Hypertension .....	25
1.15.7	Guidelines .....	25
1.16	Analgesics .....	26
1.16.1	Spontaneous Ventilation .....	26
1.16.2	Controlled Ventilation .....	26
1.16.3	Sufentanil, Alfentanil .....	26
1.17	Muscular Relaxation .....	26
1.18	Osmotic-Acting Drugs, Plasma Expanders and Diuretics .....	27
1.18.1	Electrolytes and Proteins and the Blood-Brain Barrier (BBB) .....	27
1.18.2	Hydroxyethyl Starch and Hyperosmolar/ Hyperoncotic Solutions .....	27
1.19	Mannitol .....	28
1.19.1	Osmotic Gradient .....	28
1.19.2	Experimental Studies .....	28
1.19.3	Human Studies .....	30
1.19.4	Mannitol in Acute Head Injury .....	30
1.19.5	Mannitol in Cerebral Infarct .....	31
1.19.6	Mannitol and the Blood-Brain Barrier .....	31
1.19.7	Rebound Phenomenon .....	32
1.19.8	Guidelines .....	32
1.20	Glycerol .....	33
1.21	Hypertonic Saline .....	33
1.21.1	Experimental Studies; Central Haemodynamics .....	33
1.21.2	Intracranial Pressure, Cerebral Blood Flow and Blood-Brain Barrier .....	34
1.21.3	Comparative Studies Between Hypertonic Saline and Mannitol .....	34
1.21.4	Human Studies .....	35
1.22	Furosemide .....	35
1.23	Corticosteroids .....	36
	References .....	37
<b>2</b>	<b>Material Included in the Database .....</b>	<b>59</b>
2.1	Diagnosis of Tumour, Localization of Cerebral Aneurysm and Hunt and Hess Gradation .....	60
2.2	Anaesthesia .....	61

2.3	Intracranial Pressure-Reducing Procedures.....	64
2.4	Discussion.....	64
	References.....	66
<b>3</b>	<b>Method</b> .....	67
3.1	Neuroradiological Examination in Patients with Cerebral Tumours .....	68
3.2	Localization of Aneurysm and Hunt and Hess Gradation.....	68
3.3	Anaesthesia and Monitoring .....	68
	Group 1: Propofol-Fentanyl .....	69
	Group 2: Isoflurane-Fentanyl.....	69
	Group 3: Sevoflurane-Fentanyl.....	69
	Group 4: Propofol-Remifentanyl.....	69
3.4	Fluid Administration and Regulation of Blood Pressure .....	70
3.5	Subdural Intracranial Pressure and Cerebral Perfusion Pressure ....	70
3.6	Catheterization of the Internal Jugular Vein and Blood Gas Analyses .....	71
3.7	Measurement of Cerebral Blood Flow and Cerebral Metabolic Rate of Oxygen .....	71
3.8	Measurement of Flow Velocity.....	72
3.9	Effect of Hyperventilation and Indomethacin .....	72
3.10	Estimation of Dural Tension and Cerebral Swelling.....	72
3.11	Measurement of Intracranial Pressure During Tilting of the Operating Table.....	72
3.12	Comparative Studies of Intracranial Pressure-Reducing Methods.....	73
3.12.1	Hyperventilation.....	73
3.12.2	Ten Degrees Reverse Trendelenburg Position .....	73
3.12.3	Mannitol Treatment.....	74
3.12.4	Indomethacin .....	74
3.12.5	Surgical Decompression .....	74
3.13	Studies of the Effect of Central Analgetics in Patients with Cerebral Tumours .....	74
3.14	Studies of Propofol Bolus Dose .....	74
3.15	Patients Subjected to Controlled Studies .....	75
3.16	Statistical Analysis .....	75
	References.....	75
<b>4</b>	<b>Comparative Studies of Intracranial Pressure in Patients With and Without Space-Occupying Lesions</b> .....	77
	Study Outline .....	78
	Discussion.....	83
	References.....	86
<b>5</b>	<b>Studies of Regional Subdural Pressure Gradients During Craniotomy</b> .....	89
	Study 1: Studies of Pressure Gradients Between Subdural Intracranial Pressure and Pressures Within the Neuroaxis, Including Intraventricular Pressure and Lumbar Spinal Pressure...	91

	<i>Study 2: Subdural Intracranial Pressure Gradients Within the Supratentorial Surgical Field.....</i>	93
	<i>Study 3: Subdural Intracranial Pressure Gradients Within the Surgical Field in Infratentorial Surgery .....</i>	95
	<i>Study 4: Changes in Subdural Intracranial Pressure During Opening of Dura .....</i>	97
	<i>Discussion .....</i>	97
	<i>References .....</i>	101

Monitoring of Cerebral and Spinal Haemodynamics  
during Neurosurgery

Cold, G.E.; Juul, N. (Eds.)

2008, XX, 332 p. 17 illus., Hardcover

ISBN: 978-3-540-77872-1
