## Part I Cooperative Games with Crisp Coalitions

---

<b>1</b>	<b>Preliminaries</b> .....	5
<b>2</b>	<b>Cores and Related Solution Concepts</b> .....	13
2.1	Imputations, Cores and Stable Sets .....	13
2.2	The Core Cover, the Reasonable Set and the Weber Set .	20
<b>3</b>	<b>The Shapley Value, the <math>\tau</math>-value, and the Average Lexicographic Value</b> .....	25
3.1	The Shapley Value .....	25
3.2	The $\tau$ -value .....	31
3.3	The Average Lexicographic Value .....	33
<b>4</b>	<b>Egalitarianism-based Solution Concepts</b> .....	37
4.1	Overview .....	37
4.2	The Equal Split-Off Set .....	38
4.2.1	The Equal Split-Off Set for General Games .....	39
4.2.2	The Equal Split-Off Set for Superadditive Games .	41
<b>5</b>	<b>Classes of Cooperative Crisp Games</b> .....	43
5.1	Totally Balanced Games .....	43
5.1.1	Basic Characterizations and Properties of Solution Concepts .....	43
5.1.2	Totally Balanced Games and Population Monotonic Allocation Schemes .....	45
5.2	Convex Games .....	46
5.2.1	Basic Characterizations .....	46

5.2.2	Convex Games and Population Monotonic Allocation Schemes .....	49
5.2.3	The Constrained Egalitarian Solution for Convex Games .....	50
5.2.4	Properties of Solution Concepts .....	53
5.3	Clan Games .....	59
5.3.1	Basic Characterizations and Properties of Solution Concepts .....	59
5.3.2	Total Clan Games and Monotonic Allocation Schemes .....	62
5.4	Convex Games versus Clan Games .....	65
5.4.1	Characterizations via Marginal Games .....	66
5.4.2	Dual Transformations .....	68
5.4.3	The Core versus the Weber Set .....	70

---

## Part II Cooperative Games with Fuzzy Coalitions

---

6	Preliminaries .....	77
7	Solution Concepts for Fuzzy Games .....	83
7.1	Imputations and the Aubin Core .....	83
7.2	Cores and Stable Sets .....	85
7.3	Generalized Cores and Stable Sets .....	89
7.4	The Shapley Value and the Weber Set .....	94
7.5	Path Solutions and the Path Solution Cover .....	96
7.6	Compromise Values .....	100
8	Convex Fuzzy Games .....	103
8.1	Basic Characterizations .....	103
8.2	Egalitarianism in Convex Fuzzy Games .....	110
8.3	Participation Monotonic Allocation Schemes .....	116
8.4	Properties of Solution Concepts .....	119
9	Fuzzy Clan Games .....	127
9.1	The Cone of Fuzzy Clan Games .....	127
9.2	Cores and Stable Sets for Fuzzy Clan Games .....	131
9.3	Bi-Monotonic Participation Allocation Rules .....	135

---

**Part III Multi-Choice Games**

---

<b>10 Preliminaries</b> .....	145
<b>11 Solution Concepts for Multi-Choice Games</b> .....	149
11.1 Imputations, Cores and Stable Sets .....	149
11.2 Marginal Vectors and the Weber Set .....	155
11.3 Shapley-like Values .....	159
11.4 The Equal Split-Off Set for Multi-Choice Games .....	163
<b>12 Classes of Multi-Choice Games</b> .....	165
12.1 Balanced Multi-Choice Games .....	165
12.1.1 Basic Characterizations .....	165
12.1.2 Totally Balanced Games and Monotonic Allocation Schemes .....	169
12.2 Convex Multi-Choice Games .....	170
12.2.1 Basic Characterizations .....	170
12.2.2 Monotonic Allocation Schemes .....	173
12.2.3 The Constrained Egalitarian Solution .....	174
12.2.4 Properties of Solution Concepts .....	180
12.3 Multi-Choice Clan Games .....	182
12.3.1 Basic Characterizations .....	182
12.3.2 Bi-Monotonic Allocation Schemes .....	186
<b>References</b> .....	193
<b>Index</b> .....	201

Models in Cooperative Game Theory
