

# Contents

<b>1</b>	<b>Short Review of NMR Theory</b>	<b>1</b>
1.1	Origin of the Spectrum	1
1.2	Coupling to other Nuclei	5
	Bibliography	6
<b>2</b>	<b>The Range of Chemical Shifts, Coupling Constants, and What Influences Each</b>	<b>7</b>
2.1	Chemical Shift Values	9
2.2	Coupling Constants	15
2.2.1	Coupling to Hydrogen	16
2.2.2	Coupling to Carbon	18
2.2.3	Coupling to Phosphorus	21
2.2.4	Coupling to Metals	22
	Bibliography	23
<b>3</b>	<b>Oxidation State from P(–III) over P(0) to P(+V)</b>	<b>25</b>
	Bibliography	29
<b>4</b>	<b><math>\lambda^5</math>-Phosphanes</b>	<b>31</b>
	Bibliography	35
<b>5</b>	<b><math>\lambda^3</math>-Phosphanes</b>	<b>37</b>
5.1	Phosphorus Element Single Bonds	37
	Box Story: Electronic and Steric Properties of Phosphanes and Phosphites	44
5.2	Phosphorus Carbon Multiple Bonds	47
5.3	Phosphorus Phosphorus Bonds	59
5.3.1	Diphosphanes	60
5.3.2	Diphosphenes	65
	Bibliography	68

<b>6 Main Group Compounds</b> .....	71
6.1 As Lewis Base.....	71
6.2 As Lewis Acid P(I), P(III), and P(V).....	75
Bibliography .....	81
<b>7 Transition Metal Complexes</b> .....	83
7.1 Phosphanes.....	83
7.2 Chelate Phosphanes (Influence of Ring Size).....	87
7.3 Phosphides (Terminal and Bridging).....	89
7.4 Phosphinidines (Terminal and Bridging) .....	101
7.5 Phosphaacetylene Complexes .....	112
7.6 Agostic M—P—H Interactions .....	115
7.7 Naked Phosphorus .....	117
Box Story: Isolobal Theory .....	125
Bibliography .....	126
<b>Index</b> .....	129

Phosphorus-31 NMR Spectroscopy

A Concise Introduction for the Synthetic Organic and  
Organometallic Chemist

Kühl, O.

2008, XIV, 132 p. 145 illus., Softcover

ISBN: 978-3-540-79117-1
