Portrait of Günter Lumer .....	viii
Life and Work of Günter Lumer .....	ix
<i>H. König</i>	
In Remembrance of Günter Lumer .....	ixx
<i>F. Ali Mehmeti, R. Haller-Dintelmann and V. Régnier</i>	
Expansions in Generalized Eigenfunctions of the Weighted Laplacian on Star-shaped Networks .....	1
<i>F. Andreu, V. Caselles and J.M. Mazón</i>	
Diffusion Equations with Finite Speed of Propagation .....	17
<i>B. Baeumer, M. Kovács and M.M. Meerschaert</i>	
Subordinated Multiparameter Groups of Linear Operators: Properties via the Transference Principle .....	35
<i>A.V. Balakrishnan</i>	
An Integral Equation in AeroElasticity .....	51
<i>J. von Below and G. François</i>	
Eigenvalue Asymptotics Under a Non-dissipative Eigenvalue Dependent Boundary Condition for Second-order Elliptic Operators .....	67
<i>J.A. Van Casteren</i>	
Feynman-Kac Formulas, Backward Stochastic Differential Equations and Markov Processes .....	83
<i>R. Chill, V. Keyantuo and M. Warma</i>	
Generation of Cosine Families on $L^p(0, 1)$ by Elliptic Operators with Robin Boundary Conditions .....	113
<i>Ph. Clément and R. Zacher</i>	
Global Smooth Solutions to a Fourth-order Quasilinear Fractional Evolution Equation .....	131
<i>L. D'Ambrosio and E. Mitidieri</i>	
Positivity Property of Solutions of Some Quasilinear Elliptic Inequalities .....	147

<i>W. Desch and S.-O. Londen</i>	
On a Stochastic Parabolic Integral Equation .....	157
<i>P. Deuring</i>	
Resolvent Estimates for a Perturbed Oseen Problem .....	171
<i>O. Diekmann and M. Gyllenberg</i>	
Abstract Delay Equations Inspired by Population Dynamics .....	187
<i>T. Eisner and B. Farkas</i>	
Weak Stability for Orbits of $C_0$ -semigroups on Banach Spaces .....	201
<i>A.F.M. ter Elst and D.W. Robinson</i>	
Contraction Semigroups on $L_\infty(\mathbf{R})$ .....	209
<i>J. Escher and Z. Feng</i>	
On the Curve Shortening Flow with Triple Junction .....	223
<i>M. Farhloul, R. Korikache and L. Paquet</i>	
The Dual Mixed Finite Element Method for the Heat Diffusion Equation in a Polygonal Domain, I .....	239
<i>R. Farwig, H. Kozono and H. Sohr</i>	
Maximal Regularity of the Stokes Operator in General Unbounded Domains of $\mathbb{R}^n$ .....	257
<i>H.O. Fattorini</i>	
Linear Control Systems in Sequence Spaces .....	273
<i>E. Feireisl and Š. Nečasová</i>	
On the Motion of Several Rigid Bodies in a Viscous Multipolar Fluid .....	291
<i>M. Geissert and Y. Giga</i>	
On the Stokes Resolvent Equations in Locally Uniform $L^p$ Spaces in Exterior Domains .....	307
<i>M. Giuli, F. Gozzi R. Monte and V. Vespri</i>	
Generation of Analytic Semigroups and Domain Characterization for Degenerate Elliptic Operators with Unbounded Coefficients Arising in Financial Mathematics. Part II .....	315
<i>P. Guidotti</i>	
Numerical Approximation of Generalized Functions: Aliasing, the Gibbs Phenomenon and a Numerical Uncertainty Principle .....	331
<i>K. Gustafson and E. Ash</i>	
No Radial Symmetries in the Arrhenius–Semenov Thermal Explosion Equation .....	357
<i>V. Keyantuo and C. Lizama</i>	
Mild Well-posedness of Abstract Differential Equations .....	371

<i>H. Koch and I. Lasiecka</i>	
Backward Uniqueness in Linear Thermoelasticity with Time and Space Variable Coefficients .....	389
<i>H. König</i>	
Measure and Integral: New Foundations after One Hundred Years ....	405
<i>P.Ch. Kunstmann</i>	
Post-Widder Inversion for Laplace Transforms of Hyperfunctions .....	423
<i>L. Lorenzi</i>	
On a Class of Elliptic Operators with Unbounded Time- and Space-dependent Coefficients in $\mathbb{R}^N$ .....	433
<i>R.H. Martin, Jr., T. Matsumoto, S. Oharu and N. Tanaka</i>	
Time-dependent Nonlinear Perturbations of Analytic Semigroups .....	457
<i>D. Mugnolo</i>	
A Variational Approach to Strongly Damped Wave Equations .....	503
<i>S. Nicaise and C. Pignotti</i>	
Exponential and Polynomial Stability Estimates for the Wave Equation and Maxwell's System with Memory Boundary Conditions .....	515
<i>J. Prüss and G. Simonett</i>	
Maximal Regularity for Degenerate Evolution Equations with an Exponential Weight Function .....	531
<i>J. Prüss, S. Sperlich and M. Wilke</i>	
An Analysis of Asian options .....	547
<i>W.M. Ruess</i>	
Linearized Stability and Regularity for Nonlinear Age-dependent Population Models .....	561
<i>B. Scarpellini</i>	
Space Almost Periodic Solutions of Reaction Diffusion Equations ....	577
<i>Y. Shibata</i>	
On the Oseen Semigroup with Rotating Effect .....	595
<i>R. Triggiani</i>	
Exact Controllability in $L_2(\Omega)$ of the Schrödinger Equation in a Riemannian Manifold with $L_2(\Sigma_1)$ -Neumann Boundary Control .....	613
List of Authors .....	637

Functional Analysis and Evolution Equations

The Günter Lumer Volume

Amann, H.; Arendt, W.; Neubrander, F.; Nicaise, S.; von  
Below, J. (Eds.)

2008, XVII, 637 p., Hardcover

ISBN: 978-3-7643-7793-9

A product of Birkhäuser Basel
