

Contents

Introduction	xi
1 Background	
1.1 Minimal free resolutions, ACM schemes, and AG schemes	1
1.2 Determinantal ideals	13
1.3 CI-liaison and G-liaison	21
2 CI-liaison and G-liaison of Standard Determinantal Ideals	
2.1 CI-liaison class of Cohen–Macaulay codimension 2 ideals	30
2.2 CI-liaison class of standard determinantal ideals	33
2.3 G-liaison class of standard determinantal ideals	41
3 Multiplicity Conjecture for Standard Determinantal Ideals	
3.1 The multiplicity conjecture for Cohen–Macaulay codimension 2 ideals	47
3.2 The multiplicity conjecture for standard determinantal ideals	50
4 Unobstructedness and Dimension of Families of Standard Determinantal Ideals	
4.1 Families of codimension 2 Cohen–Macaulay algebras	65
4.2 Unobstructedness and dimension of families of determinantal schemes	67
5 Determinantal Ideals, Symmetric Determinantal Ideals, and Open Problems	
5.1 Liaison class of determinantal and symmetric determinantal ideals	106
5.2 The multiplicity conjecture for determinantal and symmetric determinantal ideals	111
5.3 Unobstructedness and dimension of families of determinantal and symmetric determinantal ideals	119
Bibliography	129
Index	135

Determinantal Ideals

Miró-Roig, R.M.

2008, XVI, 140 p., Hardcover

ISBN: 978-3-7643-8534-7

A product of Birkhäuser Basel
