

Contents

Foreword	vii
----------------	-----

I. Architectures and Models

<i>Sven van der Meer, Joel Fleck, Martin Huddleston, Dave Raymer, John Strassner and Willie Donnelly</i> Technology Neutral Principles and Concepts for Autonomic Networking ..	1
<i>José A. Lozano López, Juan M. González Muñoz and Julio Morilla Padial</i> A Telco Approach to Autonomic Infrastructure Management	27
<i>C. Fahy, M. Ponce de Leon, S. van der Meer, R. Marin, J. Vivero, J. Serrat, N. Georgalas, P. Leitner, S. Collins and B. Baesjou</i> Modelling Behaviour and Distribution for the Management of Next Generation Networks	43

II. Middleware and Services

<i>Dominic Greenwood and Roberto Ghizzioli</i> Autonomic Communication with RASCAL Hybrid Connectivity Management	63
<i>Gérard Nguengang, Thomas Bullot, Dominique Gaiti, Louis Hugues and Guy Pujolle</i> Autonomic Resource Regulation in IP Military Networks: A Situatedness Based Knowledge Plane	81
<i>Monique Calisti, Roberto Ghizzioli and Dominic Greenwood</i> Autonomic Service Access Management for Next Generation Converged Networks	101

III. Networks

<i>Mohammad Abdur Razzaque, Simon Dobson and Paddy Nixon</i>	
Cross-layer Optimisations for Autonomic Networks	127
<i>Rana Rahim-Amoud, Leila Merghem-Boulahia, Dominique Gaiti</i>	
<i>and Guy Pujolle</i>	
An Autonomic MPLS DiffServ-TE Domain	149
<i>Jie Chen, Miao Pan, Kai Yu, Yang Ji and Ping Zhang</i>	
Game Theoretic Framework for Autonomic Spectrum Management in	
Heterogeneous Wireless Networks	169

Advanced Autonomic Networking and Communication

Calisti, M.; Strassner, J.C. (Eds.)

2008, IX, 190 p., Softcover

ISBN: 978-3-7643-8568-2
