Preface	xxv
Acknowledgements	xxvii
1 Introduction	1
1.1 Introduction	1
1.2 Background	2
1.3 Motivation: CASCOT in Emergency Assistance	3
1.4 Overview of the Approach	5
1.5 Overall View of the Book	6
I State of the Art	9
2 Intelligent Agent-based Peer-to-Peer Systems (IP2P)	11
2.1 Introduction	11
2.2 IP2P Enabling Technologies	11
2.2.1 Wireless Networks	11
2.2.2 End-user Devices	13
2.2.3 Seamless Mobility	15
2.2.4 Ontologies in the Wireless World	16
2.3 Overlay Networks	22
2.3.1 Centralized P2P Architecture	23
2.3.2 Pure P2P Architecture	24
2.3.3 Hybrid P2P Architecture	25
2.4 Summary	25
3 Semantic Web Service Description	31
3.1 Introduction	31
3.2 Issues of Semantic Service Description	31
3.2.1 Functional and Non-Functional Service Semantics	32
3.2.2 Structured Representation of Service Semantics	32

3.2.3	Monolithic Representation of Service Semantics	32
3.2.4	Data Semantics	33
3.2.5	Reasoning about Semantic Service Descriptions	33
3.3	SAWSDL	33
3.3.1	Annotating WSDL Components	34
3.3.2	Limitations	34
3.4	OWL-S	36
3.4.1	Background: OWL	36
3.4.2	Service Profile	39
3.4.3	Service Process Model	40
3.4.4	Service Grounding	42
3.4.5	Software Support	42
3.4.6	Limitations	44
3.5	WSML	44
3.5.1	WSMO Framework	44
3.5.2	WSML Variants	45
3.5.3	Services in WSML	47
3.5.4	Software Support	50
3.5.5	Limitations	50
3.6	Monolithic DL-Based Service Descriptions	51
3.7	Critique	52
3.8	Summary	54
4	Semantic Web Service Coordination	59
4.1	Introduction	59
4.2	Semantic Service Discovery	59
4.2.1	Classification of Semantic Web Service Matchmakers	61
4.2.2	Logic-Based Semantic Service Profile Matching	64
4.2.3	Non-logic-based Semantic Profile Matching	69
4.2.4	Hybrid Semantic Profile Matching	69
4.2.5	Logic-based Semantic Process Matching	71
4.2.6	Non-logic-based and Hybrid Semantic Process Model Matching	72
4.2.7	Semantic Service Discovery Architectures	72
4.3	Semantic Service Composition Planning	79
4.3.1	Web Service Composition	79
4.3.2	AI-Planning-Based Web Service Composition	80
4.3.3	Classification of Semantic Service Composition Planners	80
4.3.4	Functional-Level Composition Planners	83
4.3.5	Process-Level Semantic Service Composition Planners	83
4.3.6	Static Semantic Service Composition Planners	84
4.3.7	Dynamic Composition Planners	87
4.3.8	FLC Planning of Monolithic DL-Based Services	89
4.4	Interrelations	90

4.4.1	Composition Planning and Execution	92
4.4.2	Negotiation	92
4.5	Open Problems	93
4.6	Summary	95
5	Context-Awareness	105
5.1	Introduction	105
5.2	Context Definitions	107
5.3	General Design Principles and Context Modeling Approaches . . .	109
5.4	Context Dependency Architectures	112
5.4.1	Smart-Its Architecture	114
5.4.2	Merino Architecture	114
5.4.3	Architecture proposed by Cortese et al.	115
5.4.4	WASP Architecture	115
5.4.5	CoBrA Architecture	116
5.4.6	Context Taylor	116
5.5	Summary	118
6	Technology in Healthcare	125
6.1	Introduction	125
6.2	Objectives	126
6.3	Benefits of e-Health	127
6.3.1	Improving the Quality of Healthcare	128
6.3.2	Improving the Access of Healthcare	128
6.3.3	Reducing Costs	128
6.4	Barriers and Challenges of e-Health	129
6.5	Mobility (m-Health)	129
6.5.1	m-Health Applications	130
6.5.2	Technology Issues in m-Health	131
6.5.3	Overview of m-Health Projects	132
6.6	CASCOM in the Healthcare Domain	135
6.6.1	Concepts	135
6.7	Summary	136
II	The CASCOM Solution	141
7	General Architecture	143
7.1	Introduction	143
7.2	Technical Approach	144
7.3	Conceptual Architecture	145
7.3.1	IP2P Network Infrastructure	146
7.3.2	Agent Architecture	147
7.4	The CASCOM Architecture in Detail	148

7.4.1	Networking Layer	149
7.4.2	Service Coordination Layer	150
7.4.3	Context Subsystem	152
7.4.4	Security & Privacy Subsystem	152
7.5	Instantiations of the CASCOT Architecture	153
7.5.1	Centralized P2P	153
7.5.2	Super-Peer P2P	153
7.5.3	Structured Pure P2P	154
7.5.4	Unstructured Pure P2P	155
7.5.5	Discussion	156
7.6	Summary	158
8	Agent Platform and Communication Architecture	161
8.1	Introduction	161
8.2	Background	162
8.2.1	FIPA Agent Platform	162
8.2.2	Agent Platforms for Mobile Devices	163
8.2.3	CASCOT Agent Platform	165
8.2.4	CASCOT Agent Communication	167
8.2.5	Messaging Gateway	174
8.3	Summary	176
9	Distributed Directories of Web Services	181
9.1	Introduction	181
9.2	Service Entries	182
9.3	Directories	183
9.4	Directory Services	183
9.5	Directory Operations	184
9.6	Policies	186
9.7	CASCOT Service Directory Architecture	187
9.7.1	Network Topology	188
9.7.2	Network Construction	191
9.7.3	Used Directory Policies	191
9.7.4	Examples of Network Interactions	192
9.8	Usability	194
9.9	Vulnerability	196
9.9.1	Breakdowns	196
9.9.2	Recovery	198
9.9.3	Security	199
9.10	Related Work	200
9.11	Summary	202

10 Service Discovery	205
10.1 Introduction	205
10.2 Overview	205
10.3 The CASCOS Service Discovery Agent	207
10.4 The CASCOS Service Matchmaker	208
10.4.1 Configurations	209
10.4.2 SMA Interface	213
10.5 Hybrid Semantic Service Matchmaker OWLS-MX	214
10.5.1 Hybrid Matching Filters	215
10.5.2 OWLS-MX Matching Algorithm	216
10.5.3 OWLS-MX Variants	217
10.5.4 Implementation	217
10.6 Service Precondition and Effect Matchmaker PCEM	218
10.6.1 Motivation	218
10.6.2 PCEM Architecture	219
10.6.3 PCEM Engine Module	220
10.6.4 PCEM Languages Processing Module	221
10.6.5 Preconditions and Effects Matching	223
10.6.6 Implementation	226
10.7 Role-Based Matchmaker ROWLS	226
10.7.1 Motivation	226
10.7.2 Interaction Modelling	227
10.7.3 Role-Based Service Advertisements	228
10.7.4 Role-Based Service Requests	228
10.7.5 Role-based Service Matching Algorithm	229
10.7.6 Implementation	230
10.8 Summary	230
11 Service Composition	235
11.1 Introduction	235
11.2 CASCOS Service Composition Agent SCPA	235
11.3 Pre-Filtering for Service Composition	237
11.3.1 Generic Pre-Filtering Framework	237
11.3.2 Instantiation of Pre-Filters	241
11.4 Service Composition With OWLS-XPlan	243
11.4.1 Architecture	243
11.4.2 Converter OWLS2PDDL	245
11.4.3 Static Composition	252
11.4.4 Dynamic Composition	254
11.5 Service Composition With MetaComp	256
11.5.1 Architecture	256
11.5.2 Service Selection Methods	259
11.5.3 Implementation	260
11.6 Summary	260

12 Semantic Web Service Execution	263
12.1 Introduction	263
12.2 Composite Service Execution	264
12.2.1 General OWL-S Execution Procedure	265
12.3 Centralized Approach for Service Execution	266
12.3.1 Service Execution and Context-Awareness	267
12.3.2 Service Execution Agent	268
12.3.3 Implementation	273
12.4 Distributed Approach for Service Execution	273
12.4.1 General Assumptions	274
12.4.2 Execution Strategy	274
12.4.3 Interaction Model	280
12.4.4 Implementation	281
12.5 Summary	283
12.5.1 Late Binding of Service Provider Instance during Execution	284
12.5.2 Tight Integration of Service Providers and Execution Agents	285
13 Context-Awareness System	289
13.1 Introduction	289
13.2 System Requirements	290
13.3 Context Representation	294
13.3.1 Base Ontology	295
13.3.2 Distribution Ontology	297
13.3.3 Context Data Ontology	297
13.4 Context System Architecture	298
13.4.1 System Overview	298
13.4.2 Detailed Component Description	300
13.4.3 System Deployment	304
13.5 Summary	305
14 Security, Privacy and Trust	309
14.1 Introduction	309
14.2 Two-Party Interactions	310
14.3 A Model of Mediated Interactions	312
14.3.1 Abstractions	313
14.3.2 Expectation of the Utility of Agents	314
14.4 Decision Making Strategy	316
14.4.1 Trust PDF and the Risk Factor	316
14.4.2 The Role of the PDF of Trust	318
14.4.3 Worst-Case Analysis	320
14.5 Integration in the CASCOT Platform	321
14.5.1 IP2P Network Layer	322
14.5.2 Service Coordination Layer	322
14.6 Summary	325

III	Trials and Results	329
15	Qualitative Analysis	331
15.1	Introduction	331
15.2	Usability Trials in Helsinki	333
15.2.1	Test Set-Up	334
15.2.2	Execution	335
15.2.3	Results	336
15.3	Field Trials in Innsbruck and Basel	339
15.3.1	Test Set-Up	340
15.3.2	Execution	341
15.3.3	Results	342
15.4	Summary	346
16	Quantitative Analysis	349
16.1	Introduction	349
16.2	Service Matchmaker Agent	349
16.2.1	Test Environment	349
16.2.2	Test 1	350
16.2.3	Test 2	350
16.2.4	Test 3	350
16.2.5	Test 4	351
16.3	Service Discovery Agent	353
16.3.1	Test Environment	353
16.3.2	Test Results and Discussion	353
16.4	Service Composition Planner Agent	354
16.4.1	OWLS-XPlan	354
16.4.2	MetaComp	355
16.5	Service Execution Agent	357
16.5.1	Test Environment	357
16.5.2	Test Results and Discussion	358
16.6	WSDir	358
16.6.1	Test Environment	358
16.6.2	Topology and Scenario	359
16.6.3	Test Results and Discussion	360
16.7	Summary	360

CASCOM: Intelligent Service Coordination in the
Semantic Web

Schumacher, M.; Helin, H.; Schuldt, H. (Eds.)

2008, XXVI, 362 p., Softcover

ISBN: 978-3-7643-8574-3
