Acknowledgements	V
Preface	VII
Introduction	1
1 Re-coding as the First Pattern of Change in Mathematics	11
1.1 Historical Description of Re-codings	14
1.1.1 Elementary Arithmetic	17
1.1.2 Synthetic Geometry	23
1.1.3 Algebra	29
1.1.4 Analytic Geometry	37
1.1.5 The Differential and Integral Calculus	47
1.1.6 Iterative Geometry	56
1.1.7 Predicate Calculus	67
1.1.8 Set Theory	76

1.2	Philosophical Reflections on Re-Codings	85
1.2.1	Relation between Logical and Historical Reconstructions of Mathematical Theories . .	89
1.2.2	Perception of Shape and Motion	94
1.2.3	Epistemic Tension and the Dynamics of the Development of Mathematics	98
1.2.4	Technology and the Coordination of Activities	99
1.2.5	The Pre-History of Mathematical Theories . .	102
2	Relativizations as the Second Pattern of Change in Mathematics	107
2.1	Historical Description of Relativizations in Synthetic Geometry	111
2.1.1	The Perspectivist Form of Language of Synthetic Geometry	114
2.1.2	The Projective Form of Language of Synthetic Geometry	118
2.1.3	The Interpretative Form of Language of Synthetic Geometry	124
2.1.4	The Integrative Form of Language of Synthetic Geometry	133
2.1.5	The Constitutive Form of Language of Synthetic Geometry	143
2.1.6	The Conceptual Form of Language of Synthetic Geometry	154
2.1.7	An Overview of Relativizations in the Development of Synthetic Geometry	159
2.2	Historical Description of Relativizations in Algebra .	160
2.2.1	The Perspectivist Form of the Language of Algebra	165
2.2.2	The Projective Form of the Language of Algebra	167
2.2.3	The Coordinative Form of the Language of Algebra	173
2.2.4	The Compositive Form of the Language of Algebra	177
2.2.5	The Interpretative Form of the Language of Algebra	180

2.2.6	The Integrative Form of the Language of Algebra	184
2.2.7	The Constitutive Form of the Language of Algebra	192
2.2.8	The Conceptual Form of the Language of Algebra	197
2.2.9	An Overview of Relativizations in the Development of Algebra	198
2.3	Philosophical Reflections on Relativizations	201
2.3.1	Comparison of the Development of Algebra with the Development of Geometry	202
2.3.2	Form of Language and the Development of Mathematical Theories	205
2.3.3	The Notion of the Form of Language and Philosophy of Mathematics	210
2.3.4	The Changes of the Form of Language and the Development of Subjectivity	215
2.3.5	The Problem of Understanding Mathematical Concepts	220
2.3.6	A Gap of Two Centuries in the Curricula	222
3	Re-Formulations as a Third Pattern of Change in Mathematics	225
3.1	Re-Formulations and Concept-Formation	228
3.2	Re-Formulations and Problem-Solving	232
3.3	Re-Formulations and Theory-Building	235
4	Mathematics and Change	239
4.1	Revolutions in Mathematics (Kuhn)	240
4.1.1	What Kind of Changes Should we Consider Revolutionary?	240
4.1.2	The Distinction between Revolutions and Epistemological Ruptures	241
4.1.3	Possible Refinements of the Kuhnian Picture	243
4.2	Mathematical Research Programmes (Lakatos)	245
4.2.1	The Lack of Connection between the Two Major Parts of Proofs and Refutations	246

XVIII *Contents*

4.2.2	Reduction of the Development of Mathematics to Re-Formulations	247
4.3	Stages of Cognitive Development (Piaget)	249
4.3.1	The Problem of the Omitted Stages	249
4.3.2	The Relation of Ontogenesis and Phylogenesis	250

Bibliography	253
---------------------	------------

Patterns of Change

Linguistic Innovations in the Development of Classical
Mathematics

Kvasz, L.

2008, XVIII, 262 p., Hardcover

ISBN: 978-3-7643-8839-3
