

---

## Contents

<b>On the Identification of Trend and Correlation in Temporal and Spatial Regression</b> <i>Ludwig Fahrmeir, Thomas Kneib</i> .....	1
<b>Estimating the Number of Clusters in Logistic Regression Clustering by an Information Theoretic Criterion</b> <i>Guoqi Qian, C. Radhakrishna Rao, Yuehua Wu, Qing Shao</i> .....	29
<b>Quasi Score and Corrected Score Estimation in the Polynomial Measurement Error Model</b> <i>Hans Schneeweiss</i> .....	45
<b>Estimation and Finite Sample Bias and MSE of FGLS Estimator of Paired Data Model</b> <i>Weiqiang Qian, Aman Ullah</i> .....	59
<b>Prediction of Finite Population Total in Measurement Error Models</b> <i>Hyang Mi Kim, A.K.Md. Ehsanes Saleh</i> .....	79
<b>The Vector Cross Product and <math>4 \times 4</math> Skew-symmetric Matrices</b> <i>Götz Trenkler, Dietrich Trenkler</i> .....	95
<b>Simultaneous Prediction of Actual and Average Values of Response Variable in Replicated Measurement Error Models</b> <i>Shalabh, Chandra Mani Paudel, Narinder Kumar</i> .....	105

VIII Contents

<b>Local Sensitivity in the Inequality Restricted Linear Model</b> <i>Huaizhen Qin, Alan T.K. Wan, Guohua Zou</i> . . . . .	135
<b>Boosting Correlation Based Penalization in Generalized Linear Models</b> <i>Jan Ulbricht, Gerhard Tutz</i> . . . . .	165
<b>Simultaneous Prediction Based on Shrinkage Estimator</b> <i>Anoop Chaturvedi, Suchita Kesarwani, Ram Chandra</i> . . . . .	181
<b>Finite Mixtures of Generalized Linear Regression Models</b> <i>Bettina Grün, Friedrich Leisch</i> . . . . .	205
<b>Higher-order Dependence in the General Power ARCH Process and the Role of Power Parameter</b> <i>Changli He, Hans Malmsten, Timo Teräsvirta</i> . . . . .	231
<b>Regression Calibration for Cox Regression Under Heteroscedastic Measurement Error — Determining Risk Factors of Cardiovascular Diseases from Error-prone Nutritional Replication Data</b> <i>Thomas Augustin, Angela Döring, David Rummel</i> . . . . .	253
<b>Homoscedastic Balanced Two-fold Nested Model when the Number of Sub-classes is Large</b> <i>Shu-Min Liao, Michael Akritas</i> . . . . .	279
<b>QR-Decomposition from the Statistical Point of View</b> <i>Hilmar Drygas</i> . . . . .	293
<b>On Penalized Least-Squares: Its Mean Squared Error and a Quasi-Optimal Weight Ratio</b> <i>Burkhard Schaffrin</i> . . . . .	313
<b>Optimal Central Composite Designs for Fitting Second Order Response Surface Linear Regression Models</b> <i>Sung Hyun Park, Hyuk Joo Kim, Jae-Il Cho</i> . . . . .	323
<b>Does Convergence Really Matter?</b> <i>Jörg Drechsler, Susanne Rässler</i> . . . . .	341

<b>OLS-Based Estimation of the Disturbance Variance Under Spatial Autocorrelation</b>	
<i>Walter Krämer, Christoph Hanck</i> .....	357
<b>Application of Self-Organizing Maps to Detect Population Stratification</b>	
<i>Nina Wawro, Iris Pigeot</i> .....	367
<b>Optimal Designs for Microarray Experiments with Biological and Technical Replicates</b>	
<i>Rashi Gupta, Panu Somervuo, Sangita Kulathinal, Petri Auvinen</i>	389
<b>Weighted Mixed Regression Estimation Under Biased Stochastic Restrictions</b>	
<i>Christian Heumann, Shalabh</i> .....	401
<b>Coin Tossing and Spinning – Useful Classroom Experiments for Teaching Statistics</b>	
<i>Helmut Küchenhoff</i> .....	417
<b>Linear Models in Credit Risk Modeling</b>	
<i>Thomas Nittner</i> .....	427
<b>Index</b> .....	441

Recent Advances in Linear Models and Related Areas

Essays in Honour of Helge Toutenburg

Shalabh; Heumann, C. (Eds.)

2008, XV, 445 p., Hardcover

ISBN: 978-3-7908-2063-8
