

# Contents

## Part I. Keynote

<b>Nonparametric Methods for Estimating Periodic Functions, with Applications in Astronomy</b> .....	3
<i>Peter Hall</i>	

## Part II. Advances on Statistical Computing Environments

<b>Back to the Future: Lisp as a Base for a Statistical Computing System</b> .....	21
<i>Ross Ihaka, Duncan Temple Lang</i>	
<b>Computable Statistical Research and Practice</b> .....	35
<i>Anthony Rossini</i>	
<b>Implicit and Explicit Parallel Computing in R</b> .....	43
<i>Luke Tierney</i>	

## Part III. Classification and Clustering of Complex Data

<b>Probabilistic Modeling for Symbolic Data</b> .....	55
<i>Hans-Hermann Bock</i>	
<b>Monothetic Divisive Clustering with Geographical Constraints</b>	67
<i>Marie Chavent, Yves Lechevallier, Françoise Vernier, Kevin Petit</i>	
<b>Comparing Histogram Data Using a Mahalanobis–Wasserstein Distance</b> .....	77
<i>Rosanna Verde, Antonio Irpino</i>	

## Part IV. Computation for Graphical Models and Bayes Nets

<b>Iterative Conditional Fitting for Discrete Chain Graph Models</b>	93
<i>Mathias Drton</i>	
<b>Graphical Models for Sparse Data: Graphical Gaussian Models with Vertex and Edge Symmetries</b> .....	105
<i>Søren Højsgaard</i>	

<b>Parameterization and Fitting of a Class of Discrete Graphical Models</b> .....	117
<i>Giovanni M. Marchetti, Monia Lupporelli</i>	

## Part V. Computational Econometrics

<b>Exploring the Bootstrap Discrepancy</b> .....	131
<i>Russell Davidson</i>	

<b>On Diagnostic Checking Time Series Models with Portmanteau Test Statistics Based on Generalized Inverses and <math>\{2\}</math>-Inverses</b> .....	143
<i>Pierre Duchesne, Christian Francq</i>	

<b>New Developments in Latent Variable Models: Non-linear and Dynamic Models</b> .....	155
<i>Irini Moustaki</i>	

## Part VI. Computational Statistics and Data Mining Methods for Alcohol Studies

<b>Estimating Spatiotemporal Effects for Ecological Alcohol Systems</b> .....	167
<i>Yasmin H. Said</i>	

<b>A Directed Graph Model of Ecological Alcohol Systems Incorporating Spatiotemporal Effects</b> .....	179
<i>Edward J. Wegman, Yasmin H. Said</i>	

<b>Spatial and Computational Models of Alcohol Use and Problems</b> .....	191
<i>William F. Wieczorek, Yasmin H. Said, Edward J. Wegman</i>	

## Part VII. Finance and Insurance

<b>Optimal Investment for an Insurer with Multiple Risky Assets Under Mean-Variance Criterion</b> .....	205
<i>Junna Bi, Junyi Guo</i>	

<b>Inhomogeneous Jump-GARCH Models with Applications in Financial Time Series Analysis</b> .....	217
<i>Chunhang Chen, Seisho Sato</i>	

<b>The Classical Risk Model with Constant Interest and Threshold Strategy .....</b>	<b>229</b>
<i>Yinghui Dong, Kam C. Yuen</i>	

<b>Estimation of Structural Parameters in Crossed Classification Credibility Model Using Linear Mixed Models .....</b>	<b>241</b>
<i>Wing K. Fung, Xiaochen Xu</i>	

## **Part VIII. Information Retrieval for Text and Images**

<b>A Hybrid Approach for Taxonomy Learning from Text .....</b>	<b>255</b>
<i>Ahmad El Sayed, Hakim Hacid</i>	

<b>Image and Image-Set Modeling Using a Mixture Model .....</b>	<b>267</b>
<i>Charbel Julien, Lorenza Saïtta</i>	

<b>Strategies in Identifying Issues Addressed in Legal Reports ...</b>	<b>277</b>
<i>Gilbert Ritschard, Matthias Studer, Vincent Pisetta</i>	

## **Part IX. Knowledge Extraction by Models**

<b>Sequential Automatic Search of a Subset of Classifiers in Multiclass Learning .....</b>	<b>291</b>
<i>Francesco Mola, Claudio Conversano</i>	

<b>Possibilistic PLS Path Modeling: A New Approach to the Multigroup Comparison .....</b>	<b>303</b>
<i>Francesco Palumbo, Rosaria Romano</i>	

<b>Models for Understanding Versus Models for Prediction .....</b>	<b>315</b>
<i>Gilbert Saporta</i>	

<b>Posterior Prediction Modelling of Optimal Trees .....</b>	<b>323</b>
<i>Roberta Siciliano, Massimo Aria, Antonio D'Ambrosio</i>	

## **Part X. Model Selection Algorithms**

<b>Selecting Models Focussing on the Modeller's Purpose .....</b>	<b>337</b>
<i>Jean-Patrick Baudry, Gilles Celeux, Jean-Michel Marin</i>	

<b>A Regression Subset-Selection Strategy for Fat-Structure Data .....</b>	<b>349</b>
<i>Cristian Gatu, Marko Sysi-Aho, Matej Orešič</i>	

<b>Fast Robust Variable Selection</b> .....	359
<i>Stefan Van Aelst, Jafar A. Khan, Ruben H. Zamar</i>	

## Part XI. Models for Latent Class Detection

<b>Latent Classes of Objects and Variable Selection</b> .....	373
<i>Giuliano Galimberti, Angela Montanari, Cinzia Viroli</i>	

<b>Modelling Background Noise in Finite Mixtures of Generalized Linear Regression Models</b> .....	385
<i>Friedrich Leisch</i>	

<b>Clustering via Mixture Regression Models with Random Effects</b> .....	397
<i>Geoffrey J. McLachlan, Shu Kay (Angus) Ng, Kui Wang</i>	

## Part XII. Multiple Testing Procedures

<b>Testing Effects in ANOVA Experiments: Direct Combination of All Pair-Wise Comparisons Using Constrained Synchron- ized Permutations</b> .....	411
<i>Dario Basso, Fortunato Pesarin, Luigi Salmaso</i>	

<b>Multiple Comparison Procedures in Linear Models</b> .....	423
<i>Frank Bretz, Torsten Hothorn, Peter Westfall</i>	

<b>Inference for the Top-<math>k</math> Rank List Problem</b> .....	433
<i>Peter Hall, Michael G. Schimek</i>	

## Part XIII. Random Search Algorithms

<b>Monitoring Random Start Forward Searches for Multivariate Data</b> .....	447
<i>Anthony C. Atkinson, Marco Riani, Andrea Cerioli</i>	

<b>Generalized Differential Evolution for General Non-Linear Optimization</b> .....	459
<i>Saku Kukkonen, Jouni Lampinen</i>	

<b>Statistical Properties of Differential Evolution and Related Random Search Algorithms</b> .....	473
<i>Daniela Zaharie</i>	

**Part XIV. Robust Statistics**

<b>Robust Estimation of the Vector Autoregressive Model by a Least Trimmed Squares Procedure.....</b>	<b>489</b>
---	------------

*Christophe Croux, Kristel Joossens*

<b>The Choice of the Initial Estimate for Computing MM-Estimates.....</b>	<b>503</b>
---	------------

*Marcela Svarc, Víctor J. Yohai*

<b>Metropolis Versus Simulated Annealing and the Black-Box-Complexity of Optimization Problems .....</b>	<b>517</b>
--	------------

*Ingo Wegener*

**Part XV. Signal Extraction and Filtering**

<b>Filters for Short Nonstationary Sequences: The Analysis of the Business Cycle.....</b>	<b>531</b>
---	------------

*Stephen Pollock*

<b>Estimation of Common Factors Under Cross-Sectional and Temporal Aggregation Constraints: Nowcasting Monthly GDP and Its Main Components .....</b>	<b>547</b>
--	------------

*Tommaso Proietti*

<b>Index .....</b>	<b>559</b>
--------------------	------------

<b>Contributed Papers on the CD .....</b>	<b>563</b>
---	------------

<b>Tutorial Texts on the CD .....</b>	<b>573</b>
---------------------------------------	------------

COMPSTAT 2008

Proceedings in Computational Statistics

Brito, P. (Ed.)

2008, XVII, 573 p. With CD-ROM., Softcover

ISBN: 978-3-7908-2083-6

A product of Physica-Verlag Heidelberg
