
Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 1.1 | Challenges and motivation | 1 |
| 1.2 | Literature review | 6 |
| 1.3 | Overview of the content of the book | 10 |
| 2 | Multiscale finite element methods for linear problems and overview | 13 |
| 2.1 | Summary | 13 |
| 2.2 | Introduction to multiscale finite element methods | 13 |
| 2.3 | Reducing boundary effects | 20 |
| 2.3.1 | Motivation | 20 |
| 2.3.2 | Oversampling technique | 22 |
| 2.4 | Generalization of MsFEM: A look forward | 23 |
| 2.5 | Brief overview of various global couplings of multiscale basis functions | 25 |
| 2.5.1 | Multiscale finite volume (MsFV) and multiscale finite volume element method (MsFVEM) | 25 |
| 2.5.2 | Mixed multiscale finite element method | 27 |
| 2.6 | MsFEM for problems with scale separation | 31 |
| 2.7 | Extension of MsFEM to parabolic problems | 33 |
| 2.8 | Comparison to other multiscale methods | 34 |
| 2.9 | Performance and implementation issues | 38 |
| 2.9.1 | Cost and performance | 39 |
| 2.9.2 | Convergence and accuracy | 40 |
| 2.9.3 | Coarse-grid choice | 41 |
| 2.10 | An application to two-phase flow | 41 |
| 2.11 | Discussions | 45 |
| 3 | Multiscale finite element methods for nonlinear equations | 47 |
| 3.1 | MsFEM for nonlinear problems. Introduction | 47 |
| 3.2 | Multiscale finite volume element method (MsFVEM) | 52 |

| | | |
|----------|--|-----------|
| 3.3 | Examples of \mathcal{P}_h | 53 |
| 3.4 | Relation to upscaling methods | 54 |
| 3.5 | Multiscale finite element methods for nonlinear parabolic equations | 55 |
| 3.6 | Summary of convergence of MsFEM for nonlinear partial differential equations | 58 |
| 3.7 | Numerical results | 59 |
| 3.8 | Discussions | 65 |
| 4 | Multiscale finite element methods using limited global information | 67 |
| 4.1 | Motivation | 67 |
| 4.1.1 | A motivating numerical example | 69 |
| 4.2 | Mixed multiscale finite element methods using limited global information | 71 |
| 4.2.1 | Elliptic equations | 71 |
| 4.2.2 | Parabolic equations | 73 |
| 4.2.3 | Numerical results | 75 |
| 4.3 | Galerkin multiscale finite element methods using limited global information | 84 |
| 4.3.1 | A special case | 84 |
| 4.3.2 | General case | 85 |
| 4.3.3 | Numerical results | 86 |
| 4.4 | The use of approximate global information | 89 |
| 4.4.1 | Iterative MsFEM | 90 |
| 4.4.2 | The use of approximate global information | 91 |
| 4.5 | Discussions | 92 |
| 5 | Applications of multiscale finite element methods | 95 |
| 5.1 | Introduction | 95 |
| 5.2 | Multiscale methods for transport equation | 96 |
| 5.2.1 | Governing equations | 96 |
| 5.2.2 | Adaptive multiscale algorithm for transport equation .. | 96 |
| 5.2.3 | The coarse-to-fine grid interpolation operator | 99 |
| 5.2.4 | Numerical results | 100 |
| 5.2.5 | Results for a two-dimensional test case | 101 |
| 5.2.6 | Three-dimensional test cases | 104 |
| 5.2.7 | Discussion on local boundary conditions | 107 |
| 5.2.8 | Other approaches for coarsening the transport equation | 107 |
| 5.2.9 | Summary | 112 |
| 5.3 | Applications to Richards' equation | 112 |
| 5.3.1 | Problem statement | 112 |
| 5.3.2 | MsFVEM for Richards' equations | 113 |
| 5.3.3 | Numerical results | 115 |
| 5.3.4 | Summary | 118 |

| | | |
|----------|--|-----|
| 5.4 | Applications to fluid–structure interaction | 119 |
| 5.4.1 | Problem statement | 119 |
| 5.4.2 | Multiscale numerical formulation | 120 |
| 5.4.3 | Numerical examples | 122 |
| 5.4.4 | Discussions | 124 |
| 5.5 | Applications of mixed MsFEMs to reservoir modeling and simulation (by J. E. Aarnes) | 124 |
| 5.5.1 | Multiscale method for the three-phase black oil model .. | 126 |
| 5.5.2 | Adaptive coarsening of the saturation equations | 129 |
| 5.5.3 | Utilization of multiscale methods for operational decision support | 133 |
| 5.5.4 | Summary | 136 |
| 5.6 | Multiscale finite volume method for black oil systems (by S. H. Lee, C. Wolfsteiner and H. A. Tchelepi) | 136 |
| 5.6.1 | Governing equations and discretized formulation | 137 |
| 5.6.2 | Multiscale finite volume formulation | 138 |
| 5.6.3 | Sequential fully implicit coupling and adaptive computation | 142 |
| 5.6.4 | Numerical examples | 142 |
| 5.6.5 | Remarks | 144 |
| 5.7 | Applications of multiscale finite element methods to stochastic flows in heterogeneous media | 146 |
| 5.7.1 | Multiscale methods for stochastic equations | 148 |
| 5.7.2 | The applications of MsFEMs to uncertainty quantification in inverse problems | 160 |
| 5.8 | Discussions | 163 |
| 6 | Analysis | 165 |
| 6.1 | Analysis of MsFEMs for linear problems (from Chapter 2) ... | 166 |
| 6.1.1 | Analysis of conforming multiscale finite element methods | 166 |
| 6.1.2 | Analysis of nonconforming multiscale finite element methods | 171 |
| 6.1.3 | Analysis of mixed multiscale finite element methods ... | 173 |
| 6.2 | Analysis of MsFEMs for nonlinear problems (from Chapter 3) . | 178 |
| 6.3 | Analysis for MsFEMs with limited global information (from Chapter 4) | 187 |
| 6.3.1 | Mixed finite element methods with limited global information | 187 |
| 6.3.2 | Galerkin finite element methods with limited global information | 198 |
| A | Basic notations | 203 |

| | | |
|----------|---|-----|
| B | Review of homogenization | 205 |
| B.1 | Linear problems | 205 |
| B.1.1 | Special case: One-dimensional problem | 206 |
| B.1.2 | Multiscale asymptotic expansions. | 207 |
| B.1.3 | Justification of formal expansions..... | 209 |
| B.1.4 | Boundary corrections | 209 |
| B.1.5 | Nonlocal memory effect of homogenization..... | 210 |
| B.1.6 | Convection of microstructure | 210 |
| B.2 | Nonlinear problems | 212 |
| | References | 217 |

Multiscale Finite Element Methods

Theory and Applications

Efendiev, Y.; Hou, T.

2009, XII, 234 p., Softcover

ISBN: 978-0-387-09495-3
