

Contents

1	Introduction to Acoustics	1
1.1	Fundamental Physical Principles	1
1.1.1	Sound Pressure	1
1.1.2	Particle Velocity	2
1.1.3	Sound Power	3
1.1.4	Frequency	4
1.1.5	The Speed of Sound	4
1.1.6	Wavelength	5
1.2	Characteristics of the Auditory System	6
1.2.1	The Sensation of Loudness	6
1.2.2	Masking	10
1.2.3	Directional Characteristics	13
1.2.4	Directional Hearing	15
1.2.5	The Cocktail Party Effect	16
1.2.6	Masking for the Musician	18
1.2.7	Sensitivity to Changes in Frequency and Sound Pressure Level	20
2	Structure of Musical Sound	23
2.1	Introducing the Model	23
2.2	Frequency- and Level: Structures	26
2.2.1	The Harmonic Tone Structure of Sound Spectra	26
2.2.2	The Frequency Range of Sound Spectra	28
2.2.3	Formants	30
2.2.4	The Effect of Individual Partial	32
2.2.5	Frequency Width of Partial	33
2.2.6	Noise Contributions	33
2.2.7	Dynamics and the Sound Spectrum	35
2.2.8	Dynamic Range and Sound Power	36
2.3	Time Structures	37
2.3.1	Deviations from a Steady Vibration Process	37
2.3.2	The Starting Transient	38

2.3.3	Inharmonic Components	40
2.3.4	Decay of Resonating Systems	42
2.3.5	Decay Time and Reverberation Time	42
2.3.6	Fluctuations in the Quasistationary Part	44
3	Tonal Characteristics of Musical Instruments	45
3.1	Brass Instruments	45
3.1.1	The French Horn	45
3.1.2	The Trumpet	53
3.1.3	The Trombone	58
3.1.4	The Tuba	62
3.2	Woodwind Instruments	64
3.2.1	The Flute	64
3.2.2	The Oboe	70
3.2.3	The Clarinet	74
3.2.4	The Bassoon	79
3.3	String Instruments	85
3.3.1	The Violin	85
3.3.2	The Viola	95
3.3.3	The Cello	97
3.3.4	Double Bass	100
3.4	The Piano	103
3.4.1	Sound Spectra	103
3.4.2	Dynamics	105
3.4.3	Time Structure	105
3.5	The Harpsichord	111
3.5.1	Sound Spectra	111
3.5.2	Dynamics	112
3.5.3	Time Structure	113
3.6	The Harp	114
3.6.1	Sound Spectra	114
3.6.2	Dynamics	115
3.6.3	Time Structure	115
3.7	Percussion Instruments	116
3.7.1	Timpani	116
3.7.2	The Bass Drum	118
3.7.3	Snare Drum	119
3.7.4	Gong	120
3.7.5	Cymbals	122
3.7.6	The Triangle	122
3.8	The Singing Voice	123
3.8.1	Sound Spectra	123
3.8.2	Dynamics	124
3.8.3	Time Structure	125
3.8.4	Choral Singing	127

4	Directional Characteristics	129
4.1	Foundations of Directional Sound Radiation	129
4.1.1	Directional Effects and Polar Diagrams	129
4.1.2	Evaluation and Representation	130
4.2	Brass Instruments	133
4.2.1	The Trumpet	133
4.2.2	The Trombone	135
4.2.3	The Tuba	136
4.2.4	The French Horn	137
4.3	Woodwind Instruments	140
4.3.1	The Flute	140
4.3.2	The Oboe	143
4.3.3	The Clarinet	146
4.3.4	The Bassoon	147
4.4	String Instruments	148
4.4.1	General Considerations	148
4.4.2	The Violin	152
4.4.3	The Viola	156
4.4.4	The Cello	159
4.4.5	The Double Bass	161
4.5	The Grand Piano	163
4.5.1	Lid Open	163
4.5.2	Lid Closed	167
4.5.3	Lid Half Open	167
4.5.4	Lid Removed	168
4.5.5	The Harpsichord	168
4.6	The Harp	169
4.7	Percussion Instruments	170
4.7.1	The Timpani	170
4.7.2	The Drum	172
4.7.3	Gongs	173
4.8	The Singing Voice	175
	Color Plates Following Page	178
5	Foundations of Room Acoustics	179
5.1	Reflection and Refraction	179
5.1.1	Reflection from a Flat Surface	179
5.1.2	Reflection from Curved Surfaces	180
5.1.3	Influence of the Wavelength	182
5.2	Absorption	186
5.3	Reverberation	188
5.4	Direct Sound and Diffuse Field	190
5.4.1	The Energy Density	190

5.4.2	The Direct Sound	192
5.4.3	Diffuse-Field Distance	194
5.5	Temporal Structure of the Sound Field	196
6	Acoustical Properties of Old and New Performance Spaces	203
6.1	Concert Halls	203
6.1.1	Tonal Requirements	203
6.1.2	Reverberation Time and Hall Size	205
6.1.3	Sound Field and Hall Shape	215
6.1.4	Acoustic Conditions on the Stage	224
6.1.5	The Location of the Conductor	231
6.2	Opera Houses	234
6.2.1	Reverberation Time and Room Size	234
6.2.2	Direct Sound and Early Reflections	238
6.3	Churches	245
6.4	Chamber Music Halls	250
6.5	Studios	254
6.6	Special Purpose Rooms	256
6.7	Open Air Stages	258
7	Seating Arrangement in the Concert Hall	263
7.1	Customary Positioning of Instrument Groups	263
7.2	The Tonal Effect in the Hall	273
7.2.1	String Instruments	273
7.2.2	Woodwind Instruments	294
7.2.3	Brass Instruments	305
7.2.4	Timpani	322
7.2.5	Grand Pianos	325
7.2.6	Harps	328
7.2.7	Combined Sound of the Orchestra	328
7.2.8	Singing Voices	343
8	Acoustic Considerations for Instrumentation and Playing Technique	347
8.1	Strength of Ensembles	347
8.1.1	Historical Development	347
8.1.2	Adapting to the Hall	350
8.2	Dynamics	359
8.3	Performance Technique	370
8.3.1	Articulation and Tone Presentation	370
8.3.2	Vibrato	377
8.3.3	Playing Positions of Wind Instruments	380
8.4	Tempo and Room Acoustics	384

9	Acoustical Problems in the Opera House	389
9.1	Strength of the Orchestra	389
9.1.1	Historical Development	389
9.1.2	Sound Level in the Hall	390
9.1.3	Sound Level in the Orchestra Pit	393
9.2	Seating Arrangement in the Orchestra Pit	394
9.2.1	Customary Arrangements of Instrument Groups	394
9.2.2	The Tonal Effect in the Hall	397
9.3	Balance between Singers and Orchestra	403
9.4	Arrangement of Choirs and Music on Stage	407
9.4.1	Musicians in the Scene	407
9.4.2	Musicians behind the Scene	410
Appendix	Table for Angular Dependence of the Statistical Directivity Factor	413

Acoustics and the Performance of Music
Manual for Acousticians, Audio Engineers, Musicians,
Architects and Musical Instrument Makers

Meyer, J.

2009, XIII, 446 p., Hardcover

ISBN: 978-0-387-09516-5
