

Contents

1	Introduction	1
1.1	Properties	2
1.1.1	Oscillations	2
1.1.2	Short time solution	3
1.2	Cyclic behaviors	5
1.3	Car-following models	7
1.4	Population dynamics	9
1.5	Nonlinear optics	13
1.6	Fluid dynamics	15
1.7	Economics	17
1.8	Mechanical engineering	20
1.9	Combustion engines	21
1.10	Classes of DDEs	23
1.10.1	Delay recruitment equation	23
1.10.2	Harmonic oscillator with delay	24
1.11	Analytical tools	26
2	Stability	27
2.1	The characteristic equation	28
2.1.1	Roots	29
2.1.2	Hopf bifurcation point	30
2.2	Position control and sampling	31
2.3	Reduction of payload oscillations	34
2.4	Traffic stability	36

2.4.1	Car-following models	37
2.4.2	Local and asymptotic stability	39
2.5	Bistability	41
2.6	Metastability	44
3	Biology	47
3.1	Population periodic cycles	48
3.2	The Hopf bifurcation	50
3.3	Time-delayed negative feedback	54
3.3.1	Circulating red blood cells	54
3.3.2	Pupil light reflex	58
3.3.3	Periodic breathing	59
3.3.4	Genetic oscillations	62
3.4	Human postural control	65
3.5	The inverted pendulum	69
4	Bernoulli's equation	73
4.1	The clarinet	74
4.2	Sleep disorders	79
4.3	Cascaded control of a liquid level system	83
5	Chemistry	89
5.1	Illuminated thermochemical reaction	91
5.1.1	Reformulation	91
5.1.2	Feedback	93
5.2	The bistable iodate–arsenous acid reaction	95
5.3	Weak delayed feedback	98
5.3.1	Experiments	98
5.3.2	A piecewise linear oscillator	100
6	Mechanical vibrations	107
6.1	Control engineering	107
6.2	The method of multiple scales	109
6.3	Minorsky's equation	111
6.3.1	Hopf bifurcation	111
6.3.2	Hopf bifurcation for large delay	113
6.3.3	Torus bifurcation	114
6.3.4	Map	115
6.3.5	Large delay asymptotics: Ginzburgh–Landau equation	117
6.4	Johnson and Moon's equation	119
6.4.1	Unusual Hopf bifurcation	120
6.5	Machine tool vibrations	122
6.5.1	Formulation and stability	125
6.6	Experiments	128
6.6.1	Linear theory	129

6.6.2	Nonlinear theory	130
7	Lasers	133
7.1	Optoelectronic feedback	134
7.2	Delayed incoherent feedback	135
7.2.1	Small feedback rate	136
7.2.2	Moderate feedback rate	140
7.2.3	Bifurcation near a double Hopf point	144
7.3	Delayed coherent feedback	150
7.3.1	Single-mode solutions	152
7.3.2	Two mode solutions and mode beating	154
7.3.3	Numerical simulations and bridges	155
7.4	Imaging using OFB	157
7.4.1	Stability analysis	158
7.4.2	Low feedback rate approximation	160
7.5	Optoelectronic oscillators	162
8	Phase equations	167
8.1	Weakly coupled oscillators	169
8.1.1	Basic solutions	169
8.1.2	Experiments	174
8.2	Strongly coupled oscillators	174
	References	179
	Index	199
