## Part I The Original Book

<b>1 A Pool Table, Irrational Numbers, and Integral Independence .....</b>	<b>3</b>
1.1 A Pool Table Problem .....	3
1.2 Numbers Rational and Irrational .....	7
1.3 Integral Independence .....	8
<b>2 How Does One Cut a Triangle? I .....</b>	<b>15</b>

<b>3</b>	<b>Excursions in Algebra</b> .....	25
3.1	A Good Try .....	25
3.2	Excursion in Linear Algebra .....	27
3.3	Excursion in Algebraic Equations .....	34
<b>4</b>	<b>How Does One Cut a Triangle? II</b> .....	37
<b>5</b>	<b>Excursion in Trigonometry</b> .....	41
<b>6</b>	<b>Is There Anything Beyond the Solution?</b> .....	47
<b>7</b>	<b>Pursuit of the Best Result</b> .....	51
7.1	Birth of a Problem .....	51
7.2	The Optimal Result .....	55
7.3	Second Solution to the Five-Point Problem .....	60
<b>8</b>	<b>Convex Figures and the Function <math>S(F)</math></b> .....	65
8.1	Creating a Function .....	65
8.2	Study of Convex Figures: The Upper Bound of $S(F)$ .....	70
8.3	Study of Convex Figures: A Lower Bound of $S(F)$ .....	77
8.4	A Very Brief Introduction to Affine Geometry .....	79
8.5	Study of Convex Figures: The Best Lower Bound of $S(F)$ .....	86
8.6	A One-Hundred-Dollar Problem .....	96
8.7	Triangle in Ellipse .....	99
<b>9</b>	<b>Paul Erdős: Our Joint Problems</b> .....	107
9.1	PGOM Erdős .....	107
9.2	Problems .....	109
9.3	Solutions .....	110
<b>10</b>	<b>Convex Figures and Erdős' Function <math>S_\alpha(F)</math></b> .....	121

**Part II   Developments of the Subsequent 20 Years**

<b>11   An Alternative Proof of Grand Problem II .....</b>	<b>127</b>
<b>12   Miklós Laczkovich on Cutting Triangles .....</b>	<b>129</b>
<b>13   Matthew Kahle on the Five-Point Problem .....</b>	<b>137</b>
<b>14   Soifer’s One-Hundred-Dollar Problem and       Mitya Karabash .....</b>	<b>143</b>
<b>15   Coffee Hour and the Conway–Soifer Cover-Up .....</b>	<b>147</b>
<b>16   Farewell to the Reader.....</b>	<b>157</b>
<b>Appendix A   Cutting a Triangle into Congruent Triangles.</b>	<b>161</b>
<b>Appendix B   The Five-Point Problem .....</b>	<b>163</b>
<b>References .....</b>	<b>167</b>
<b>Notation .....</b>	<b>171</b>
<b>Index .....</b>	<b>173</b>

How Does One Cut a Triangle?

Soifer, A.

2009, XXX, 174 p. 83 illus., Softcover

ISBN: 978-0-387-74650-0
