

# Contents

<b>Preface</b> .....	v
<b>1 Cybernetics: Origins and Aims</b> .....	1
Origins .....	1
Understanding .....	3
Theories .....	3
Neuroscience .....	5
Visual Pathways .....	7
Microtubule Computation .....	8
Memory .....	8
C fibres .....	9
Orange, New Jersey .....	10
Artificial Intelligence .....	11
Wider Applications .....	13
Appendix to Chapter 1: Early History .....	15
Summary of Chapter 1 .....	15
<b>2 Where to Start?</b> .....	17
Brains and Computers .....	17
Discrete Logic .....	17
Meaning of “Logic” .....	18
Laws of Form .....	19
Associative Recall .....	20
The Binding Problem .....	21
Models .....	22
Conditioned Reflex .....	23
Application to Process Control .....	25
Boxes .....	26
Learning Filters .....	29
Classification versus Tuning .....	33
Nontrivial Machines .....	34
Conclusion .....	34
Summary of Chapter 2 .....	35

<b>3</b>	<b>Continuous versus Discrete</b>	37
	The Continuous Environment	37
	Catastrophe Theory and Dissipative Structures	39
	Nervous System	39
	Evolution and Learning	41
	Near Misses	46
	Logic	47
	AI and Computers	49
	The Ashby–Bellman Debate	52
	Summary of Chapter 3	54
<b>4</b>	<b>Adaptation, Self-Organisation, Learning</b>	57
	Adaptation in Continuous Environments	57
	Even and Odd Objective Functions	59
	Optimisation without a Model	61
	Optimisation with a Model	63
	Models	65
	Error Decorrelation	67
	Self-Organisation	68
	JANET	70
	Checkers	70
	Pandemonium	71
	Emergence of Concepts	72
	Bacterial Chemotaxis	75
	Daisyworld	76
	Appendix to Chapter 4: Statistics as Running Values	78
	Running Values	78
	Weighting Patterns	78
	Exponential Smoothing	79
	Digital Precision	80
	Summary of Chapter 4	82
<b>5</b>	<b>Backpropagation</b>	85
	Learning in Nets	85
	Multilayer Operation	87
	Local Goals	87
	Significance Feedback	90
	Evidence from Biology	96
	Structured Feedback	100
	Summary of Chapter 5	103
<b>6</b>	<b>Self-Reference</b>	105
	Consciousness	105
	Hierarchies	105
	Everyday Self-Reference	107

Nontrivial Machines and Paradox . . . . .	108
Gödel's Incompleteness Theorem . . . . .	109
Induction and Deduction . . . . .	109
Double Bind and Creativity . . . . .	110
Summary of Chapter 6 . . . . .	110
<b>7 Fractal Intelligence . . . . .</b>	<b>113</b>
Is Intelligence Fractal . . . . .	113
Elementary Exemplification . . . . .	113
Fractal Intelligence . . . . .	115
Summary of Chapter 7 . . . . .	115
<b>8 Conclusions . . . . .</b>	<b>117</b>
Motivation . . . . .	117
Is Artificial Intelligence Possible? . . . . .	118
Probably Academic . . . . .	123
Summary of Chapter 8 . . . . .	126
<b>References . . . . .</b>	<b>127</b>
<b>Index . . . . .</b>	<b>137</b>

A Missing Link in Cybernetics

Logic and Continuity

Andrew, A.M.

2009, XI, 139 p. 4 illus., Hardcover

ISBN: 978-0-387-75163-4
