1	Structure and Properties of Perovskite Oxides	1
	Tatsumi Ishihara	
1.1	Introduction	1
1.2	Structure of Perovskite Oxides	2
1.3	Typical Properties of Perovskite Oxides	7
1.4	Preparation of Perovskite Oxide	12
1.5	Perovskite Oxides for Solid Oxide Fuel Cells (SOFCs)	15
	References	16
2	Overview of Intermediate-Temperature Solid Oxide Fuel Cells	17
	Harumi Yokokawa	
2.1	Introduction	17
2.2	Characteristic Features of Solid Oxide Fuel Cells	18
2.2.1	Merits and Demerits of SOFCs	18
2.2.2	Issues for Intermediate-Temperature SOFCs	20
2.2.3	Stack Design	35
2.3	Development of Intermediate Temperature SOFC Stacks/ Systems	36
2.3.1	Kyocera/Osaka Gas	36
2.3.2	Mitsubishi Materials Corporation	37
2.3.3	Micro SOFCs by TOTO	38
2.4	Perspective	38
2.4.1	Applications	38
2.4.2	Fuel Flexibility and Reliability in Relationship to Intermediate-Temperature SOFCs	41
2.4.3	Hybrid Systems	41
2.5	Summary	42
	References	42
3	Ionic Conduction in Perovskite-Type Compounds	45
	Hiroyasu Iwahara	
3.1	Introduction	45
3.2	Conduction Behavior of Perovskite-Type Compounds	46

3.3	Early Studies on Ionic Conduction in Perovskite-Type Oxides	49
3.4	Oxide Ion Conduction	52
3.5	Proton Conduction	55
3.6	Lithium Ion Conduction	59
3.7	Halide Ion Conduction	60
3.8	Silver Ion Conduction	61
	References	62
4	Oxide Ion Conductivity in Perovskite Oxide for SOFC	
	Electrolyte	65
	Tatsumi Ishihara	
4.1	Introduction	65
4.2	Oxide Ion Conductivity in Oxide	66
4.3	Oxide Ion Conductivity in Perovskite Oxides	68
4.4	LaGaO ₃ -Based Oxide Doped with Sr and Mg (LSGM) as a New Oxide Ion Conductor	71
	4.4.1 Effects of Dopant for La and Ga Site	71
	4.4.2 Transition Metal Doping Effects on Oxide Ion Conductivity in LSGM	74
4.5	Basic Properties of the LSGM Electrolyte System	77
	4.5.1 Phase Diagram of La-Sr-Ga-Mg-O	77
	4.5.2 Reactivity with SOFC Component	77
	4.5.3 Thermal Expansion Behavior and Other Properties	78
	4.5.4 Behavior of Minor Carrier	79
	4.5.5 Diffusivity of Oxide Ion	82
4.6	Performance of a Single Cell Using LSGM Electrolyte	84
4.7	Preparation of LaGaO ₃ Thin-Film Electrolytes for Application at Temperatures Lower Than 773 K	87
4.8	Oxide Ion Conductivity in the Perovskite-Related Oxides	89
4.9	Summary	92
	References	92
5	Diffusivity of the Oxide Ion in Perovskite Oxides	95
	J. A. Kilner, A. Berenov, and J. Rossiny	
5.1	Introduction	95
	5.1.1 Definitions of Diffusion Coefficients	96
	5.1.2 The Oxygen Tracer Diffusion Coefficient	96
	5.1.3 The Surface Exchange Coefficient	98
	5.1.4 Defect Chemistry and Oxygen Transport	99
	5.1.5 Defect Equilibria	99
5.2	Diffusion in Mixed Electronic-Ionic Conducting Oxides (MEICs)	102
	5.2.1 Effect of A-Site Cation on Oxygen Diffusivity	103

5.2.2	The Effect of B-Site Cation on Oxygen Diffusivity. . . .	104
5.2.3	The Effect of A-Site Cation Vacancies on Oxygen Diffusivity	105
5.2.4	Temperature Dependence of the Oxygen Diffusion Coefficient	105
5.2.5	The Effect of Oxygen Pressure	108
5.3	Oxygen Diffusion in Ionic Conducting Perovskites.	108
5.4	Oxygen Diffusion in Perovskite-Related Materials	110
5.5	Correlations Between Oxygen Diffusion Parameters.	110
5.6	Conclusions	112
	References	113
