<b>1. Lactose: Chemistry and Properties</b> .....	1
<b>P.F. Fox</b>	
1.1. Introduction .....	1
1.2. Properties of Lactose .....	5
1.2.1. Modification of the Concentration of Lactose in Milk Through Genetic Engineering .....	8
1.2.2. Nutritional Problems Associated with Lactose .....	8
1.2.3. Production and Utilization of Lactose .....	9
1.3. Derivatives of Lactose .....	10
1.4. Significance of Lactose in Dairy Products .....	12
1.5. Conclusion .....	13
References .....	13
<b>2. Solid and Liquid States of Lactose</b> .....	17
<b>Y.H. Roos</b>	
2.1. State Diagram of Lactose .....	19
2.2. Stickiness and Caking .....	22
2.3. Crystallization and Recrystallization .....	25
2.4. Crystallization and Recrystallization in Frozen Systems .....	30
References .....	30
<b>3. Significance of Lactose in Dairy Products</b> .....	35
<b>I. Manufacture of Sweetened Condensed Milk and the Significance of Lactose Therein</b> .....	36
<b>R. Tan</b>	
I.1 Introduction .....	36
I.2 Variants of Sweetened Condensed Milk .....	38
I.3 Standards for Sweetened Condensed Milk .....	38
I.4 Limitations of Lactose in Foods .....	41
I.5 Crystallization of Lactose in Sweetened Condensed Milk and Related Products .....	42

I.6 Seeding Sweetened Condensed Milk with Lactose . . . . .	43
I.6.1 Derivation of Equations . . . . .	45
I.7 Effect of Crystal Size on the Viscosity of Sweetened Condensed Milk . . . . .	47
I.7.1 Heat Treatment Before Evaporation . . . . .	47
I.8 Controlling Lactose Crystal Size by Cooling . . . . .	49
I.8.1 Seeding/Cooling Temperature . . . . .	49
I.8.2 Cooling After Complete Crystallization of Lactose . . . . .	52
I.8.3 Effect of Lactose Crystallization on the Water Activity of Sweetened Condensed Milk. . . . .	53
I.8.4 Effect of Lactose Crystallization on the Measurement of Moisture/ Total Solids in Sweetened Condensed Milk. . . . .	53
I.8.5 Effect of Water Activity on the Microbial Stability of Sweetened Condensed Milk. . . . .	54
References . . . . .	55
 <b>II. Lactose in Dulce de Leche . . . . .</b>	 58
<b>E. Hynes and C. Zalazar</b>	
II.1 Introduction. . . . .	58
II.2 Technology . . . . .	59
II.3 Significance of Lactose in Dulce de Leche . . . . .	61
II.3.1 Lactose Crystallization . . . . .	61
II.3.1.1 Texture . . . . .	61
II.3.2 Non-enzymatic Browning Reactions . . . . .	65
II.3.2.1 Colour and Flavour . . . . .	66
II.3.2.2 Nutritional Value . . . . .	66
II.4 Conclusions . . . . .	67
References . . . . .	67
 <b>III. Significance of Lactose in Ice Cream. . . . .</b>	 69
<b>H. Douglas Goff</b>	
III.1 Overview of Ice Cream Ingredients and Manufacture . . . . .	69
III.2 Sources of Lactose in Ice Cream . . . . .	71
III.3 Contribution of Lactose to Freezing Point Depression . . . . .	72
III.4 Potential for Lactose Crystallization . . . . .	74
III.5 Development of Lactose-Reduced Products . . . . .	76
References . . . . .	77
 <b>IV. Significance of Lactose in Milk Powders . . . . .</b>	 80
<b>P.M. Kelly</b>	
IV.1 Milk Protein Standardization. . . . .	81

IV.2 Behaviour of Lactose During Spray Drying .....	81
IV.2.1 Hygroscopicity .....	82
IV.2.2 Lactose Crystallization in Milk Powders .....	83
IV.3 Microstructure of Milk Powders .....	84
IV.4 Phase Transitions During Milk Drying .....	85
IV.4.1 Glass Transition .....	86
IV.4.2 Caking .....	87
IV.4.3 Stickiness and Caking of Milk Powders .....	89
IV.4.4 Instantization/Agglomeration .....	91
IV.4.5 Maillard Reactions .....	92
IV.5 Some Ingredient Applications Where the Role of Lactose Is Emphasized .....	93
IV.5.1 Infant Milk Formula .....	93
IV.5.2 Chocolate .....	94
IV.6 Role of Lactose in Microencapsulation .....	94
References .....	95
 <b>V. Reduced Lactose and Lactose-Free Dairy Products .....</b>	<b>98</b>
<b>Shakeel-Ur-Rehman</b>	
V.1 Introduction .....	98
V.2 Methods for the Manufacture of Lactose-Free or Lactose-Reduced Milk Products .....	98
V.2.1 Treatment of Milk with $\beta$ -Galactosidase .....	99
V.2.1.1 Reduced Lactose or Lactose-Free Fluid Milks .....	99
V.2.1.2 Lactose-Free Ice Creams .....	100
V.2.1.3 Condensed Milks .....	101
V.2.2 Reduction of Lactose by Membrane Technology Techniques .....	101
V.2.3 Reduction of Lactose in Milk by Chromatographic Methods .....	103
V.3 Conclusion .....	103
References .....	103
 <b>4. Production and Uses of Lactose .....</b>	<b>105</b>
<b>A.H.J. Paterson</b>	
4.1. Theoretical Approach to Production .....	105
4.2. Edible-Grade Lactose .....	108
4.3. Pharmaceutical-Grade Lactose .....	113
4.3.1. Anhydrous Lactose .....	114
4.3.2. Spray-Dried Lactose .....	114
4.4. Uses of Lactose .....	114
4.5. The Future for Lactose .....	118
References .....	119

<b>5. Galacto-oligosaccharides and Other Products Derived from Lactose</b>	<b>121</b>
<b>M.J. Playne and R.G. Crittenden</b>	
5.1. Introduction	121
5.1.1. Definitions	122
5.2. History of Prebiotics	124
5.2.1. The Genus <i>Bifidobacterium</i>	124
5.2.2. Bifidus Factors	124
5.2.3. Oligosaccharides as Prebiotics	125
5.2.4. Use of $\beta$ -Galactosidases for the Synthesis of Oligosaccharides	127
5.3. Chemistry – Structures and Reactivity	127
5.4. Synthesis and Manufacturing Methods	128
5.4.1. $\beta$ -Galacto-oligosaccharides	129
5.4.2. Lactulose	148
5.4.3. Lactosucrose ( $\beta$ -D-Gal-(1 $\rightarrow$ 4)- $\alpha$ -D-Glu-(1 $\rightarrow$ 2)- $\beta$ -D-Fru)	150
5.4.4. Lactitol	152
5.4.5. Lactobionic Acid	153
5.4.6. Tagatose	154
5.5. Commercial Producers and Products	155
5.5.1. Estimated Production of the Lactose Derivatives	155
5.5.2. $\beta$ -Galacto-oligosaccharides	156
5.5.3. Lactulose	156
5.5.4. Lactosucrose	158
5.5.5. Lactitol	159
5.5.6. Lactobionic Acid	159
5.5.7. Tagatose	159
5.6. Analytical Methods	161
5.7. Properties	163
5.7.1. Properties of Oligosaccharides	163
5.7.2. Properties of Lactulose	165
5.7.3. Properties of Lactosucrose	166
5.7.4. Properties of Lactitol	166
5.7.5. Properties of Lactobionic Acid	166
5.7.6. Properties of D-tagatose	167
5.8. Uses and Applications	167
5.8.1. Galacto-oligosaccharides	167
5.8.2. Lactulose	168
5.8.3. Lactosucrose	169
5.8.4. Lactitol	169
5.8.5. Lactobionic Acid	169
5.8.6. Tagatose	170
5.9. Physiological and Health Effects	170
5.9.1. Dental Health	171
5.9.2. Prevention and Treatment of Constipation	171

5.9.3. Treatment of Hepatic Encephalopathy. . . . .	171
5.9.4. Prebiotic Effects . . . . .	172
5.9.5. Farm and Companion Animals . . . . .	182
5.10. Product Safety, Dose Rates and Regulatory Issues . . . . .	182
5.10.1. Galacto-oligosaccharides . . . . .	182
5.10.2. Lactulose . . . . .	184
5.10.3. Lactosucrose . . . . .	185
5.10.4. Lactitol . . . . .	185
5.10.5. Lactobionic Acid. . . . .	185
5.10.6. Tagatose . . . . .	186
5.11. Conclusions . . . . .	186
5.11.1. Future Directions and Challenges. . . . .	186
Acknowledgments. . . . .	188
References . . . . .	188

## **7. Non-Enzymatic Degradation Pathways of Lactose and Their Significance in Dairy Products . . . . . 231**

**John O'Brien**

7.1. Introduction . . . . .	231
7.2. Isomerization and Degradation of Sugars . . . . .	233
7.2.1. Lactulose. . . . .	236
7.3. Chemistry of the Maillard Reaction . . . . .	241

7.3.1. Reaction Mechanisms and Pathways . . . . .	241
7.3.2. Reactions of Amadori and Hynes Products . . . . .	243
7.3.3. Deoxyglycosuloses . . . . .	245
7.3.4. Formation of Low Molecular Weight Maillard Products in Dairy Products . . . . .	247
7.4. Factors that Influence Maillard Reactions . . . . .	252
7.4.1. Reactants . . . . .	252
7.4.2. pH . . . . .	255
7.4.3. Mutarotation . . . . .	256
7.4.4. Moisture Content and $a_w$ . . . . .	257
7.4.5. Miscellaneous Factors . . . . .	259
7.5. Interaction of Oxidation and Maillard Reactions. . . . .	260
7.6. Methods for the Analysis of LA-Transformation Products and Degradation Products of Lactose . . . . .	263
7.7. Methods for Monitoring Maillard Reactions in Milk Products. . . . .	264
7.7.1. Determination of Available Lysine. . . . .	265
7.7.2. Determination of Amadori Products: The Furosine Assay . . . . .	266
7.7.3. Determination of Amadori Products: Direct Determination of Lactulosyl Lysine . . . . .	268
7.7.4. Determination of 5-hydroxymethyl-2-furaldehyde. . . . .	268
7.7.5. Fluorescence Spectroscopy . . . . .	269
7.7.6. $\epsilon$ -Pyrrole Lysine . . . . .	269
7.7.7. Carboxymethyl Lysine . . . . .	269
7.7.8. Pyrraline . . . . .	270
7.7.9. Immunoassays. . . . .	270
7.8. Consequences of Undesirable Maillard Reactions in Milk Systems. . . . .	271
7.8.1. Nutritional Implications . . . . .	271
7.8.2. Milk Protein Allergy . . . . .	274
7.8.3. Changes in Functional Properties. . . . .	275
7.8.4. Formation of Toxic Compounds . . . . .	277
7.9. The Future. . . . .	278

## **9. Milk Salts: Technological Significance . . . . . 351**

**J.A. Lucey and D.S. Horne**

9.1. Introduction . . . . .	351
9.2. Methods of Analysis . . . . .	353
9.3. Secretion of Milk Salts . . . . .	354
9.4. Factors Influencing the Milk Salts Equilibria. . . . .	356
9.4.1. Temperature . . . . .	356
9.4.2. pH . . . . .	357
9.4.3. Concentration of Milk . . . . .	358
9.4.4. Ca Sequestrants or Chelating Agents . . . . .	359
9.4.5. High Pressure . . . . .	361
9.5. Impact of Milk Salts on the Buffering Properties of Milk and Dairy Products . . . . .	362
9.6. Interactions Between Milk Salts and Casein. . . . .	365
9.6.1. Introduction . . . . .	365
9.6.2. Casein Micelle Formation. . . . .	366
9.6.3. Nature of Colloidal Calcium Phosphate. . . . .	369
9.7. Functional Properties of Milk Products . . . . .	370
9.7.1. Rennet-Induced Gels . . . . .	371
9.7.2. Acid-Induced Milk Gels . . . . .	372
9.7.3. Heat-Induced Whey Protein Gels. . . . .	373
9.7.4. Cold-Set Whey Protein Gels . . . . .	374
9.7.5. Emulsions . . . . .	374
9.7.6. Foaming and Rehydration Properties After Spray Drying . . . . .	375
9.7.7. Stability of Caseins . . . . .	375
9.7.8. Cheese Texture and Functionality . . . . .	379
9.8. Other Uses/Applications of Milk Salts . . . . .	379
9.9. Concluding Remarks. . . . .	380
References . . . . .	380

## **10. Nutritional Aspects of Minerals in Bovine and Human Milks . . . . . 391**

**C.D. Hunt and F.H. Nielsen**

10.1. Introduction . . . . .	391
10.2. Sodium, Chloride and Potassium . . . . .	399

10.3. Calcium . . . . .	405
10.4. Phosphorus . . . . .	412
10.5. Magnesium . . . . .	414
10.6. Iron . . . . .	416
10.7. Zinc . . . . .	420
10.8. Copper . . . . .	422
10.9. Manganese . . . . .	423
10.10. Selenium . . . . .	425
10.11. Iodine . . . . .	429
10.12. Molybdenum . . . . .	432
10.13. Cobalt . . . . .	433
10.14. Fluoride . . . . .	434
10.15. Boron . . . . .	435
10.16. Chromium . . . . .	437
10.17. Arsenic . . . . .	438
10.18. Nickel . . . . .	439
10.19. Silicon . . . . .	440
10.20. Vanadium . . . . .	441

## **15. Physico-chemical Properties of Milk . . . . . 691**

### **O.J. McCarthy and H. Singh**

15.1. Introduction . . . . .	691
15.2. Acid–Base Equilibria . . . . .	692
15.2.1. The pH and Buffering Properties of Milk . . . . .	692
15.2.2. Titratable Acidity . . . . .	694
15.3. Oxidation–Reduction Equilibria . . . . .	695
15.4. Surface and Interfacial Tension . . . . .	697
15.5. Optical Properties . . . . .	699
15.5.1. Light Absorption and Scattering . . . . .	699
15.5.2. Refractive Index . . . . .	702
15.6. Freezing Point . . . . .	703
15.7. Density . . . . .	705
15.8. Rheological Properties . . . . .	710
15.8.1. Newtonian Behaviour . . . . .	710
15.8.2. Non-Newtonian Behaviour in Milks and Creams . . . . .	714
15.8.3. Effects of Technological Treatments on the Viscosity of Milk . . . . .	718
15.8.4. Technologically Useful Phenomenological Relationships for Predicting the Rheological Properties of Milks and Creams . . . . .	721
15.8.5. Rheology of Concentrated Milks . . . . .	723
15.8.6. Rheometry . . . . .	729
15.9. Thermal Properties . . . . .	730
15.9.1. Specific Heat Capacity and Enthalpy . . . . .	730
15.9.2. Thermal Conductivity . . . . .	735
15.9.3. Thermal Diffusivity . . . . .	737
15.9.4. Measurement of Thermal Properties . . . . .	738

15.10. Electrical and Dielectric Properties . . . . .	738
15.10.1. Electrical Conductivity . . . . .	738
15.10.2. Dielectric Properties . . . . .	744
15.11. Acoustic Properties . . . . .	746
References . . . . .	749
