

SOBOLEV SPACES IN MATHEMATICS I

SOBOLEV TYPE INEQUALITIES

Contents

My Love Affair with the Sobolev Inequality	1
David R. Adams	
1 The Trace Inequality	4
2 A Mixed Norm Inequality	7
3 A Morrey–Sobolev Inequality	9
4 A Morrey–Besov Inequality	12
5 Exponential Integrability	13
6 Vanishing Exponential Integrability	18
7 Concluding Remarks	20
References	21
Maximal Functions in Sobolev Spaces	25
Daniel Aalto and Juha Kinnunen	
1 Introduction	25
2 Maximal Function Defined on the Whole Space	27
2.1 Boundedness in Sobolev spaces	27
2.2 A capacitary weak type estimate	32
3 Maximal Function Defined on a Subdomain	33
3.1 Boundedness in Sobolev spaces	33
3.2 Sobolev boundary values	38
4 Pointwise Inequalities	41
4.1 Lusin type approximation of Sobolev functions	45
5 Hardy Inequality	49
6 Maximal Functions on Metric Measure Spaces	54
6.1 Sobolev spaces on metric measure spaces	55
6.2 Maximal function defined on the whole space	57
6.3 Maximal function defined on a subdomain	62
6.4 Pointwise estimates and Lusin type approximation .	64
References	65

Hardy Type Inequalities via Riccati and Sturm–Liouville Equations	69
Sergey Bobkov and Friedrich Götze	
1 Introduction	69
2 Riccati Equations	71
3 Transition to Sturm–Liouville Equations	75
4 Hardy Type Inequalities with Weights	77
5 Poincaré Type Inequalities	83
References	85
Quantitative Sobolev and Hardy Inequalities, and Related Symmetrization Principles	87
Andrea Cianchi	
1 Introduction	87
2 Symmetrization Inequalities	89
2.1 Rearrangements of functions and function spaces	89
2.2 The Hardy–Littlewood inequality	92
2.3 The Pólya–Szegő inequality	96
3 Sobolev Inequalities	101
3.1 Functions of Bounded Variation	101
3.2 The case $1 < p < n$	103
3.3 The case $p > n$	106
4 Hardy Inequalities	108
4.1 The case $1 < p < n$	108
4.2 The case $p = n$	111
References	113
Inequalities of Hardy–Sobolev Type in Carnot–Carathéodory Spaces	117
Donatella Danielli, Nicola Garofalo, and Nguyen Cong Phuc	
1 Introduction	117
2 Preliminaries	121
3 Pointwise Hardy Inequalities	127
4 Hardy Inequalities on Bounded Domains	139
5 Hardy Inequalities with Sharp Constants	145
References	149
Sobolev Embeddings and Hardy Operators	153
David E. Edmunds and W. Desmond Evans	
1 Introduction	153
2 Hardy Operators on Trees	154
3 The Poincaré Inequality, $\alpha(E)$ and Hardy Type Operators	158
4 Generalized Ridged Domains	162
5 Approximation and Other s -Numbers of Hardy Type Operators	170

6	Approximation Numbers of Embeddings on Generalized Ridged Domains	181
	References	182
Sobolev Mappings between Manifolds and Metric Spaces		185
Piotr Hajłasz		
1	Introduction	185
2	Sobolev Mappings between Manifolds	187
3	Sobolev Mappings into Metric Spaces	197
	3.1 Density	202
4	Sobolev Spaces on Metric Measure Spaces	205
	4.1 Integration on rectifiable curves	205
	4.2 Modulus	207
	4.3 Upper gradient	208
	4.4 Sobolev spaces $N^{1,p}$	208
	4.5 Doubling measures	209
	4.6 Other spaces of Sobolev type	211
	4.7 Spaces supporting the Poincaré inequality	214
5	Sobolev Mappings between Metric Spaces	215
	5.1 Lipschitz polyhedra	218
	References	219
A Collection of Sharp Dilation Invariant Integral Inequalities for Differentiable Functions		223
Vladimir Maz'ya and Tatyana Shaposhnikova		
1	Introduction	223
2	Estimate for a Quadratic Form of the Gradient	226
3	Weighted Gårding Inequality for the Biharmonic Operator ..	230
4	Dilation Invariant Hardy's Inequalities with Remainder Term	233
5	Generalized Hardy–Sobolev Inequality with Sharp Constant	241
6	Hardy's Inequality with Sharp Sobolev Remainder Term ...	244
	References	245
Optimality of Function Spaces in Sobolev Embeddings		249
Luboš Pick		
1	Prologue	249
2	Preliminaries	256
3	Reduction Theorems	258
4	Optimal Range and Optimal Domain of Rearrangement- Invariant Spaces	261
5	Formulas for Optimal Spaces Using the Functional $f^{**} - f^*$	264
6	Explicit Formulas for Optimal Spaces in Sobolev Embeddings	267
7	Compactness of Sobolev Embeddings	270
8	Boundary Traces	275
9	Gaussian Sobolev Embeddings	276
	References	278

On the Hardy–Sobolev–Maz’ya Inequality and Its Generalizations	281
Yehuda Pinchover and Kyril Tintarev	
1 Introduction	281
2 Generalization of the Hardy–Sobolev–Maz’ya Inequality	284
3 The Space $\mathcal{D}_V^{1,2}(\Omega)$ and Minimizers for the Hardy–Sobolev–Maz’ya Inequality	292
4 Convexity Properties of the Functional Q for $p > 2$	293
References	296
Sobolev Inequalities in Familiar and Unfamiliar Settings	299
Laurent Saloff-Coste	
1 Introduction	299
2 Moser’s Iteration	300
2.1 The basic technique	300
2.2 Harnack inequalities	302
2.3 Poincaré, Sobolev, and the doubling property	303
2.4 Examples	310
3 Analysis and Geometry on Dirichlet Spaces	312
3.1 First order calculus	312
3.2 Dirichlet spaces	312
3.3 Local weak solutions of the Laplace and heat equations	314
3.4 Harnack type Dirichlet spaces	316
3.5 Imaginary powers of $-A$ and the wave equation	318
3.6 Rough isometries	320
4 Flat Sobolev Inequalities	322
4.1 How to prove a flat Sobolev inequality?	322
4.2 Flat Sobolev inequalities and semigroups of operators	324
4.3 The Rozenblum–Cwikel–Lieb inequality	326
4.4 Flat Sobolev inequalities in the finite volume case	329
4.5 Flat Sobolev inequalities and topology at infinity	330
5 Sobolev Inequalities on Graphs	330
5.1 Graphs of bounded degree	331
5.2 Sobolev inequalities and volume growth	332
5.3 Random walks	333
5.4 Cayley graphs	335
References	339
A Universality Property of Sobolev Spaces in Metric Measure Spaces	345
Nageswari Shanmugalingam	
1 Introduction	345
2 Background	347
3 Dirichlet Forms and $N^{1,2}(X)$	349
4 Axiomatic Sobolev Spaces and $N^{1,p}(X)$	356

References	358
Cocompact Imbeddings and Structure of Weakly Convergent Sequences	361
Kiril Tintarev	
1 Introduction	361
2 Dislocation Space and Weak Convergence Decomposition ...	363
3 Cocompactness and Minimizers	368
4 Flask Subspaces	372
5 Compact Imbeddings	373
